# Highlights 2021

The year 2021 marks an exciting milestone for TietoEVRY; we completed our two-year integration programme and announced a new direction for the company with a new strategy. In the beginning of 2022, we also unveiled a refreshed brand and identity, and a company purpose: Creating purposeful technology that reinvents the world for good. Our new purpose reflects the company values, as well as the direction the world around us is taking.

We achieved all this in extraordinary circumstances, with the new waves of the pandemic and large-scale remote work continuing worldwide – underlining the importance of a reliable digital backbone and services across businesses and societies, writes our CEO Kimmo Alkio.

## 2021 highlights

- **Announcing a new focused, specialized and expansion-driven strategy.**  
The new strategy will drive customer value and growth through specialization with six new end-to-end businesses focusing on cloud, data and software.
- **Winning the contract for next generation IT services for City of Stockholm.**  
TietoEVRY will offer the City of Stockholm an IT environment covering state-of-the-art digital services, including automation and AIOps, to modernize the city's application and infrastructure landscape.

- **Recognized for tackling climate change.**  
TietoEVRY has been recognized for leadership in corporate sustainability by global environmental non-profit CDP, securing a place on the organization's prestigious 'A List' for tackling climate change.
- **Tackling cyber bullying with innovation.**  
Working together with the Swedish anti-bullying organization Friends and Örebro University, TietoEVRY continues to make the online world safer via "The digital twin of bullying" pilot project.

- **Divesting Oil & Gas software business.**  
This divestment is part of the company's strategy to seek focus and scale. Through the transaction the Oil & Gas software business will have greater global market reach and growth opportunities.

- **Recognized for sustainability ambitions.**  
TietoEVRY achieved platinum level in Ecovadis ranking and was recognized for its long-term commitments especially in CO<sub>2</sub> reductions and gender balance ambitions.
- **Upgrading tomorrow.**  
TietoEVRY launched a three-year sustainability strategy, the Sustainability game plan. The plan outlines the company's ambitions and describes our actions for the climate, ethical conduct and creating an exciting place to work – with targets stretching to 2023.

- **Promoting equality and inclusion.**  
Efforts have been carried out to promote equal opportunities in TietoEVRY and the ICT industry. Initiatives include collaboration with Pride across the Nordics, and an initiative for more inclusive language used in job ads to attract more female applicants.
- **The Polite Type awarded as Best of the Best at Red Dot Awards.**  
The innovative corporate responsibility initiative The Polite Type, aimed at tackling cyber bullying was recognized in the Red Dot Award design competition. The Polite Type received a Best of the Best award for a particularly innovative and meaningful idea in the Advertising/Digital Campaigns category.

- **Partner of the year in Finland.**  
TietoEVRY was awarded a Partner of the year award by Microsoft for demonstrating excellence in innovation and the implementation of customer solutions based on Microsoft technology.
- **Recognized as Nordic leader.**  
ISG named TietoEVRY a leader in 24 of the ISG Provider Lens™ Nordic quadrants in 2021. Recognitions included, amongst others, Intelligent Automation, Public Cloud, Private/Hybrid Cloud, Next-Gen Application Development, Maintenance and more.

- **Piloting European digital, state-guaranteed cash alternative.**  
Riksbanken, Sweden's central bank, invited TietoEVRY to join the second phase of its e-krona pilot. The initiative could enable central banks to meet future payment needs, foster innovation, and enhance cross-border payments.

- **Building digital trust.**  
TietoEVRY is a founding member of Findynet Cooperative which is broad public-private organization that develops a national digital identity network for Finland. The aim is to promote an ethically, socially and economically sustainable data economy by increasing Europe's sovereignty in key enabling technologies and infrastructures.
- **Utilizing technology to create responsible banking solutions.**  
Together with Sparebanken Sør, we launched a sustainable payment card for the bank's customers in the payments market. The new card is made of biological materials, which can reduce the CO<sub>2</sub> emissions associated with payment cards by 75%.

# Enabling digital futures – with a new strategy and renewed identity

The year 2021 marks yet another exciting milestone for TietoEvry; we completed our two-year integration programme, announced a new direction for the company with a new strategy, and unveiled a renewed brand and identity. We achieved all this in extraordinary circumstances, with the new waves of the pandemic and large-scale remote work continuing worldwide – underlining the importance of a reliable digital backbone and services across businesses and societies.

## Positioning for growth

The post-merger integration has been central in our activities during the past two years. After building the basic operational capabilities for the combined company in 2020, the work during 2021 centered on enhancing the common ways of working through launch of core processes, focusing on employee growth and leadership through MyGrowth dialogues – our new development and performance management framework. The work for company culture and renewal of the brand and identity continued during the year. Considering the global pandemic and majority of the employees working remotely, we can be proud of the achievement and the successful completion of our corporate-wide integration program.

As the natural next step, we announced during the autumn a new strategy that focuses on driving customer value and growth through specialization. The technology industry is being reshaped with cloud as a foundation,

providing expansion opportunities for the company, especially in areas of cloud-native services, data, software engineering and scalable software businesses. To capture this momentum, we established six specialized end-to-end businesses with full operational responsibility, including go-to-market, service portfolio, investments and partnerships. The service businesses; TietoEvry Create, TietoEvry Transform and TietoEvry Connect as well as the software businesses; TietoEvry Banking, TietoEvry Care and TietoEvry Industry started their operations 1 January 2022. Reflecting the distinct market dynamics of each, the individual businesses will have the optionality to scale and prioritize their investments for growth.

Our financial performance developed favorably during the year, with revenue turning to growth in the second half of the year. The reported growth was 1% and organically revenue remained at the previous year's level. Operating

profit (EBIT) rose to EUR 382.0 (146.7) million, including substantial capital gains of EUR 104.0 million from the divestments implemented during the year. Adjusted operating profit (EBITA) improved to EUR 367.8 (355.0) million, representing 13.0% (12.7) of revenue. Merger synergies materialized well according to the plan and profitability improved. Total performance of the company was driven especially by strong software businesses, Product Development Services, and International Operations – forming solid ground for our future focus in cloud, data and software engineering. Organic growth in International Operations and software businesses was solid, 22% and 8%, respectively. Full-year operating cash flow was at record levels at EUR 367.5 (354.7) million, which enabled us to deleverage ahead of schedule. Based on our strong balance sheet, we are able to continue with attractive dividend levels as defined in our financial targets.

## Employee wellbeing and customer experience – drivers of the hybrid work

The unusual past two years led us to rethink our future ways of working also post-pandemic. Staying true to our values of openness, trust and diversity, we invited all our 24,000 employees globally to co-create the “new normal” for us at TietoEVRY. During spring, employees were invited to share their views and wishes through virtual ideation workshops and surveys. Through crowdsourcing, we received around 43,000 ideas on how to create a strong company culture, how to utilize digital collaboration tools for more efficient remote work, and what is the role of offices in the future.

Our employees’ input was utilized in the Hybrid Working guidelines which outline the principles for our new ways of working. We want to allow our employees to combine work at the office and from home – considering the diverse needs and preferences of individuals, teams and our customers. We believe that flexibility encourages everyone to give their best, contributes positively to both employee and customer experience as well as our company culture – and supports our sustainability ambitions.

Ability to provide meaningful assignments and attractive career opportunities is essential in our dynamic and talent-intensive global industry. During the year, we were pleased to welcome around 5,700 new experts join the company to support our growth ambitions. The commitment and dedication of our employees was also demonstrated by our internal engagement scores, which continued to develop favorably throughout the year.

## Towards more equal and sustainable societies

In 2020, we launched our Sustainability 2023 game plan outlining the company’s key priorities for ethical conduct, climate actions and creating an exciting place to work. In 2021, we uplifted our ambitions, aligned our carbon reduction targets with the Paris agreement and made our commitments to the Science Based Targets initiative.

Building an inclusive and diverse workplace is a business imperative for us at TietoEVRY; we develop new digital services for diverse users and as there is a shortage of key talent, utilization of the full potential of our markets is essential. When competing for the best talent, the company culture plays a vital role. Our culture is built on our core values of openness, trust and diversity – and we see that as an advantage for us in this industry with global competition. Achieving gender balance in the company is our long-term ambition, and in 2021 we took the first steps towards the target by looking into our recruitment and successor practices. While the development during the first year was moderate, we saw some units standing out as good examples. In 2022, we maintain our focus even stronger with new initiatives across all our new businesses.

We have been proceeding well towards our carbon reduction ambitions and in 2021, embarked on the work for circular economy practices, i.e., recycling of the hardware, laptops and mobile phones.

Our sustainability work was also recognized for the long-term commitments especially in CO<sub>2</sub> reductions and gender balance ambitions with a platinum level on EcoVadis rating as well as A-list by CDP, the Carbon Disclosure Project.

We have started to implement the new EU taxonomy – assessing eligibility of our solutions and preparing for alignment reporting as the next step.

Sustainability is becoming increasingly important for all key stakeholders, employees, customers and investors alike. We recognize the opportunities digitalization is bringing to significantly reduce emissions and environmental burden for our customers and for the society at large.

## Market outlook

Creating superior experiences enabled by data continues to be a strong driver for investments across industries. This change is enabled by a number of technology-led advancements and new applications, including ones that utilize artificial intelligence and machine learning. The divide between traditional managed services and cloud-native services and software is widening and the polarized market calls for specialization.

Innovations driving digital experiences are enabled by cloud technologies. Coupled with cloud enablement, agile development methods, DevOps, are becoming a standard way of delivering services faster. In parallel with cloud-native development, our customers are continuing the modernization of their business processes, applications and infrastructure.

The exceptional past years have continued to accelerate the digitalization of our societies. We believe that with our new strategy and the six specialized businesses, we are well positioned to take advantage of the opportunities in the market and further support our customers advancing their digital agendas.

## Creating purposeful technology

To accelerate our renewal, we also unveiled a refreshed brand and identity, and a company purpose: Creating purposeful technology that reinvents the world for good. Our new purpose reflects the company values, as well as the direction the world around us is taking. Now more than ever it matters for companies to be active on societal issues. At TietoEVRY, we want to be the company that develops digital futures where technology, humanity and responsibility are at the core. We will focus on making our new identity come to life in 2022.

I strongly believe that the foundation we built and the new era we have started for the company in 2021 will offer inspiring opportunities and enhanced learning for our employees, and long-term value for our customers, partners and shareholders. We look forward to 2022 with a clear strategic focus and a great deal of enthusiasm and confidence. I want to sincerely thank all our stakeholders for a successful 2021 and look forward to continuing close collaboration in the years ahead.

## Kimmo Alkio

President and CEO

# IT market development

- Hyperconnected data, enabled by cloud, is reshaping the technology industry.
- The divide between traditional managed services and cloud-native services and software is widening. This polarized market is calling for specialization reflecting distinctive competitive advantage in each service segment to capture the opportunities identified.
- Cloud-native services with high growth potential provide clear expansion opportunities for TietoEVRY.
- In traditional managed services, automation and scale are important drivers for competitiveness.

The rapidly changing market provides significant growth opportunities for TietoEVRY. Creating superior experiences enabled by hyperconnected data continues to be a strong driver for investments across industries. Customers are considering how to utilize the benefits of data even faster to be able to launch highly advanced digital experiences supported by real-time and personalized services.

Innovations driving digital experiences are enabled by cloud technologies. Cloud enablement and agile development methods, DevOps, are becoming a standard way of delivering services. The focus is clearly geared towards

cloud-native development, with investments in data and analytics, data management, data engineering and data platforms on the one hand, and investments in cloud-native application development on the other.

In parallel with cloud-native development, customers will continue the modernization of their business processes, applications and infrastructure. Hence, investments are also being geared towards the market with modernization programmes. As price erosion in these traditional segments will accelerate further, competitiveness requires scale.

# New strategy launched in 2021 – growth through specialization

TietoEvry announced a new strategy in October 2021, driving growth and expansion through specialization. Investments will be focused on businesses where we see competitive advantages and sustainable growth:

- cloud-native services
- data and software engineering
- scalable software businesses, including their global expansion potential.

In the areas of traditional managed application and infrastructure services, the company sees new partnerships as potential means to build scale and pursue joint investments.

## Six specialized businesses established

To capture the momentum of the cloud-native and software market, TietoEvry has established six specialized end-to-end businesses. The businesses, forming the reportable segments as from the first quarter of 2022, are described below:

**TietoEvry Create** accelerates customers digital agenda to create competitive products and data driven businesses utilizing design, data and cloud technologies. This is a global business with software and data engineering at its core.

**TietoEvry Transform** drives enterprise-wide transformation across customers' business processes, applications and infrastructure. Deep customer knowledge, global cloud and data competencies and automated operations form its foundation.

TietoEvry established six end-to-end businesses to capture the momentum of cloud-native and software market.

**TietoEvry Connect** is a multi-cloud platform provider with a full range of infrastructure choices at scale – ensuring security, resilience and compliance for customers' business.

**TietoEvry Banking** aims to be the market-leading financial-software products, platform and services partner in the Nordics and beyond.

**TietoEvry Care** aims to reinvent the Nordic health and social care sector with modular, open and interoperable software – enhancing care personnel and citizen experience.

**TietoEvry Industry** is a portfolio of distinct competitive software and data solutions across a wide variety of industry domains. These include the public sector, pulp and paper and utilities.

TietoEvry Group continues to support the businesses through scalable common functions (Finance, Strategy, global Operations and HR) driving portfolio development, performance management and efficiency across the company. The new structure took effect on 1 January 2022.

## Investment priorities to support scale in distinct businesses

The following investment priorities will drive competitiveness and value creation in each business:

- **Invest to expand** in TietoEvry Create, TietoEvry Care and TietoEvry Banking – invest to accelerate products, services and capabilities; prioritized M&A.
- **Partner to scale** in TietoEvry Transform and TietoEvry Connect – invest in capabilities to drive scale and automated managed services; seek partners (operational and structural) to jointly invest and build scale.
- **Focus for value** in TietoEvry Industry – optimized investments for selected businesses and develop portfolio to increase focus.

# Operating model

## Six specialized businesses established

To capture the momentum of the cloud-native and software market, TietoEvry has established six specialized end-to-end businesses. These businesses have full operational responsibility, including go-to-market, service portfolio, investments and partnerships. Reflecting the distinct market dynamics of each, the individual businesses have optionality to build scale and prioritize investments.

The businesses, forming the reportable segments as from the first quarter of 2022, are described in the Strategy section.

## Renewed structure to drive specialized end-to-end businesses

Specialized businesses with broader options to scale, including M & A & D

End-to-end businesses with full operational responsibility covering:

- Go-to-market
- Business models and service portfolio
- Culture, talent and rewarding
- Investments and partnerships
- Financial performance

Specialized end-to-end businesses to drive fast decision making, experts at customer front and employee attractiveness

Common Group functions driving portfolio development, performance management and efficiency: HR, Operations, Strategy and Finance

## We're making it our business to reinvent the world for good

The extraordinary times in the past few years have resulted in changes in the expectations of our key stakeholders. Today, having a view and being active on societal issues is more important than ever for companies. At TietoEvry, we want to be the company that develops technology with responsibility at the core – acknowledging also how to counter any negative effects the technological advancements may bring. TietoEvry focuses on developing digital futures where businesses, societies, and humanity thrive.

We are a leading technology company with a strong Nordic heritage and global capabilities. Our main role is to drive customer value and growth through specialization. Our role varies from advisory and service design to building and running solutions and services. We look at the world from our customers' perspective and aim to offer the best services and solutions from our wide-ranged portfolio. This enables our customers to focus on their core business and create value in their respective domains. The world is increasingly driven by technology and data. We see this as an opportunity and aim to use the data to create social, economic and environmental value.

# Managing sustainability

TietoEVRY regards sustainability as both a responsibility and an opportunity. We need to be environmentally, socially and financially responsible in our operations in order to meet the requirements and expectations set by our stakeholders. Our innovative solutions drive more sustainable outcomes for our customers and society. We make all this happen through effective governance, compliance, processes, tools and ways of working.

As a company, we align our sustainability practices with international norms, frameworks and legislation covering anti-corruption, environment, human rights and labour rights. Our sustainability approach is based on the principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises, and is aligned with the UN Sustainable Development Goals.

But our sustainability efforts are not merely a question of complying with laws and regulations. We are determined to

show the way and be an ethical leader, which sometimes means going above and beyond regulations and applying even higher standards.

With the purpose of jointly promoting long-term and sustainable industry development and regulation at the local, national and international levels, we affiliate ourselves with several voluntary industry organizations and initiatives. These include:

- CDP (Carbon Disclosure Project)
- Cleantech Finland
- CSR Sweden
- FIBS (in Finland)
- Fossilfritt Sverige (in Sweden)
- Digitaliseringskonsulterna (in Sweden)
- The European AI Alliance
- UN Global compact

Our innovative solutions drive more sustainable outcomes for our customers and society.

## Sustainability game plan 2023

TietoEVRY's three-year Sustainability strategy, called Sustainability game plan 2023, is the roadmap guiding our efforts towards integrated sustainable practices across our value chain.

The plan is based on a materiality analysis conducted in 2020, and a process to identify areas where sustainability is a driver for value creation and customer engagement. It's a two-fold plan, with one part ensuring that TietoEVRY has responsible operations, and the other part focusing on the business and impact opportunities we have together with our customers.

Responsible operations comprise three broad themes – climate action, ethical conduct and TietoEVRY as an exciting place to work – with focus areas under each theme. Our business impact opportunities lie in a range of solutions and services that can accelerate and improve our customers' sustainability performance, and create a positive large-scale impact for society. The plan also details how we contribute to the UN Sustainable Development Goals. The goals were selected with the help of principled prioritization, in line with the document [“Integrating the SDGs into corporate reporting: A practical guide”](#) developed by GRI and Un Global Compact. This means that we have aligned our company strategy, efforts and allocated resources that reflect our most significant impacts assessed as a part of our materiality analysis.

### Governance and responsibilities

TietoEVRY's sustainability work is facilitated by the company's Sustainability team and is supported by the Sustainability Steering Group, chaired by the Vice President, Communications and Sustainability. The steering group advises the Group Leadership Team and the Board of

Directors, and approves the sustainability section of the company's integrated annual report. The members of the Sustainability Steering Group represent different functions and units at TietoEVRY, including members of the Group Leadership Team, and meet on a bi-monthly basis.

Daily sustainability activities are facilitated by the Sustainability team, led by the Head of Sustainability, who is also responsible for the company's sustainability policies and processes. The Head of Sustainability reports directly to the Vice President of Communications and Sustainability, who in turn reports to the Head of Operations. The management of specific responsibility areas and business-opportunity areas is handled by appointed area owners, each of whom is responsible for reporting on area-specific goal performance. Long-term sustainability goals are presented in the Sustainability game plan 2023, which has been approved by the Sustainability Steering Group and the CEO. The management of specific responsibility areas is presented in more detail in the respective sections of this report.

### Policies and rules providing strategic direction and practical guidance

The company's ethical principles are summarized in the Code of Conduct, which applies to all our employees and any third party contributing to TietoEVRY's services, products and other business activities. The Code of Conduct is aligned with international frameworks and norms, as well as with local legislation.

A separate Supplier Code of Conduct clarifies the ethical guidelines that apply to TietoEVRY's suppliers. Our ambition is to ensure that the Supplier Code of Conduct is implemented in all new supplier contracts and when contracts with current suppliers are renewed.

# Sustainability game plan 2023

## Sustainability impact analysis

Analyzing and quantifying the environmental, societal and financial impacts of our service.

## Ethical design

Development of ethical software.

## Solutions to reduce carbon footprint

We help to optimize production and logistics, digitalize processes and support in the re-use and recycling of material.

## Services for data-driven sustainability

Solutions to collect, compile and visualize the current state and thereby enable customers to integrate accurate sustainability data into decision-making and plans.

Business ethics and anti-corruption

Cybersecurity and privacy

Human rights

Responsible sourcing

Diversity and inclusion

Employee experience

Energy usage and greenhouse gas emissions

Circular economy practices

Our Anti-Corruption Rule provides practical guidelines on how to evaluate and avoid unethical behaviour, and the Environmental Rule - which is compliant with ISO 14001 requirements - outlines our precautionary approach to environmental management within the company and throughout the value chain. In addition, we have several other policies and rules supporting the management of specific sustainability areas. All policies, rules and processes covering sustainability apply to our entire organization and are reviewed each year as part of our compliance program.

TietoEVRY's Whistleblowing Rule defines our common way of managing all whistleblowing notifications made to our centralized channel or to Internal Audit, Human Resources and Legal and Compliance functions. Our Whistleblowing Unit is responsible for logging and investigating the cases and following up on escalations, as well as for initiating preventive actions based on the case experience. We are committed to a culture where employees feel safe to speak up and report concerns, and we adhere to the principle of non-retaliation. The handling of escalations is described in [more detail here](#).

## Implementing sustainability in daily business operations

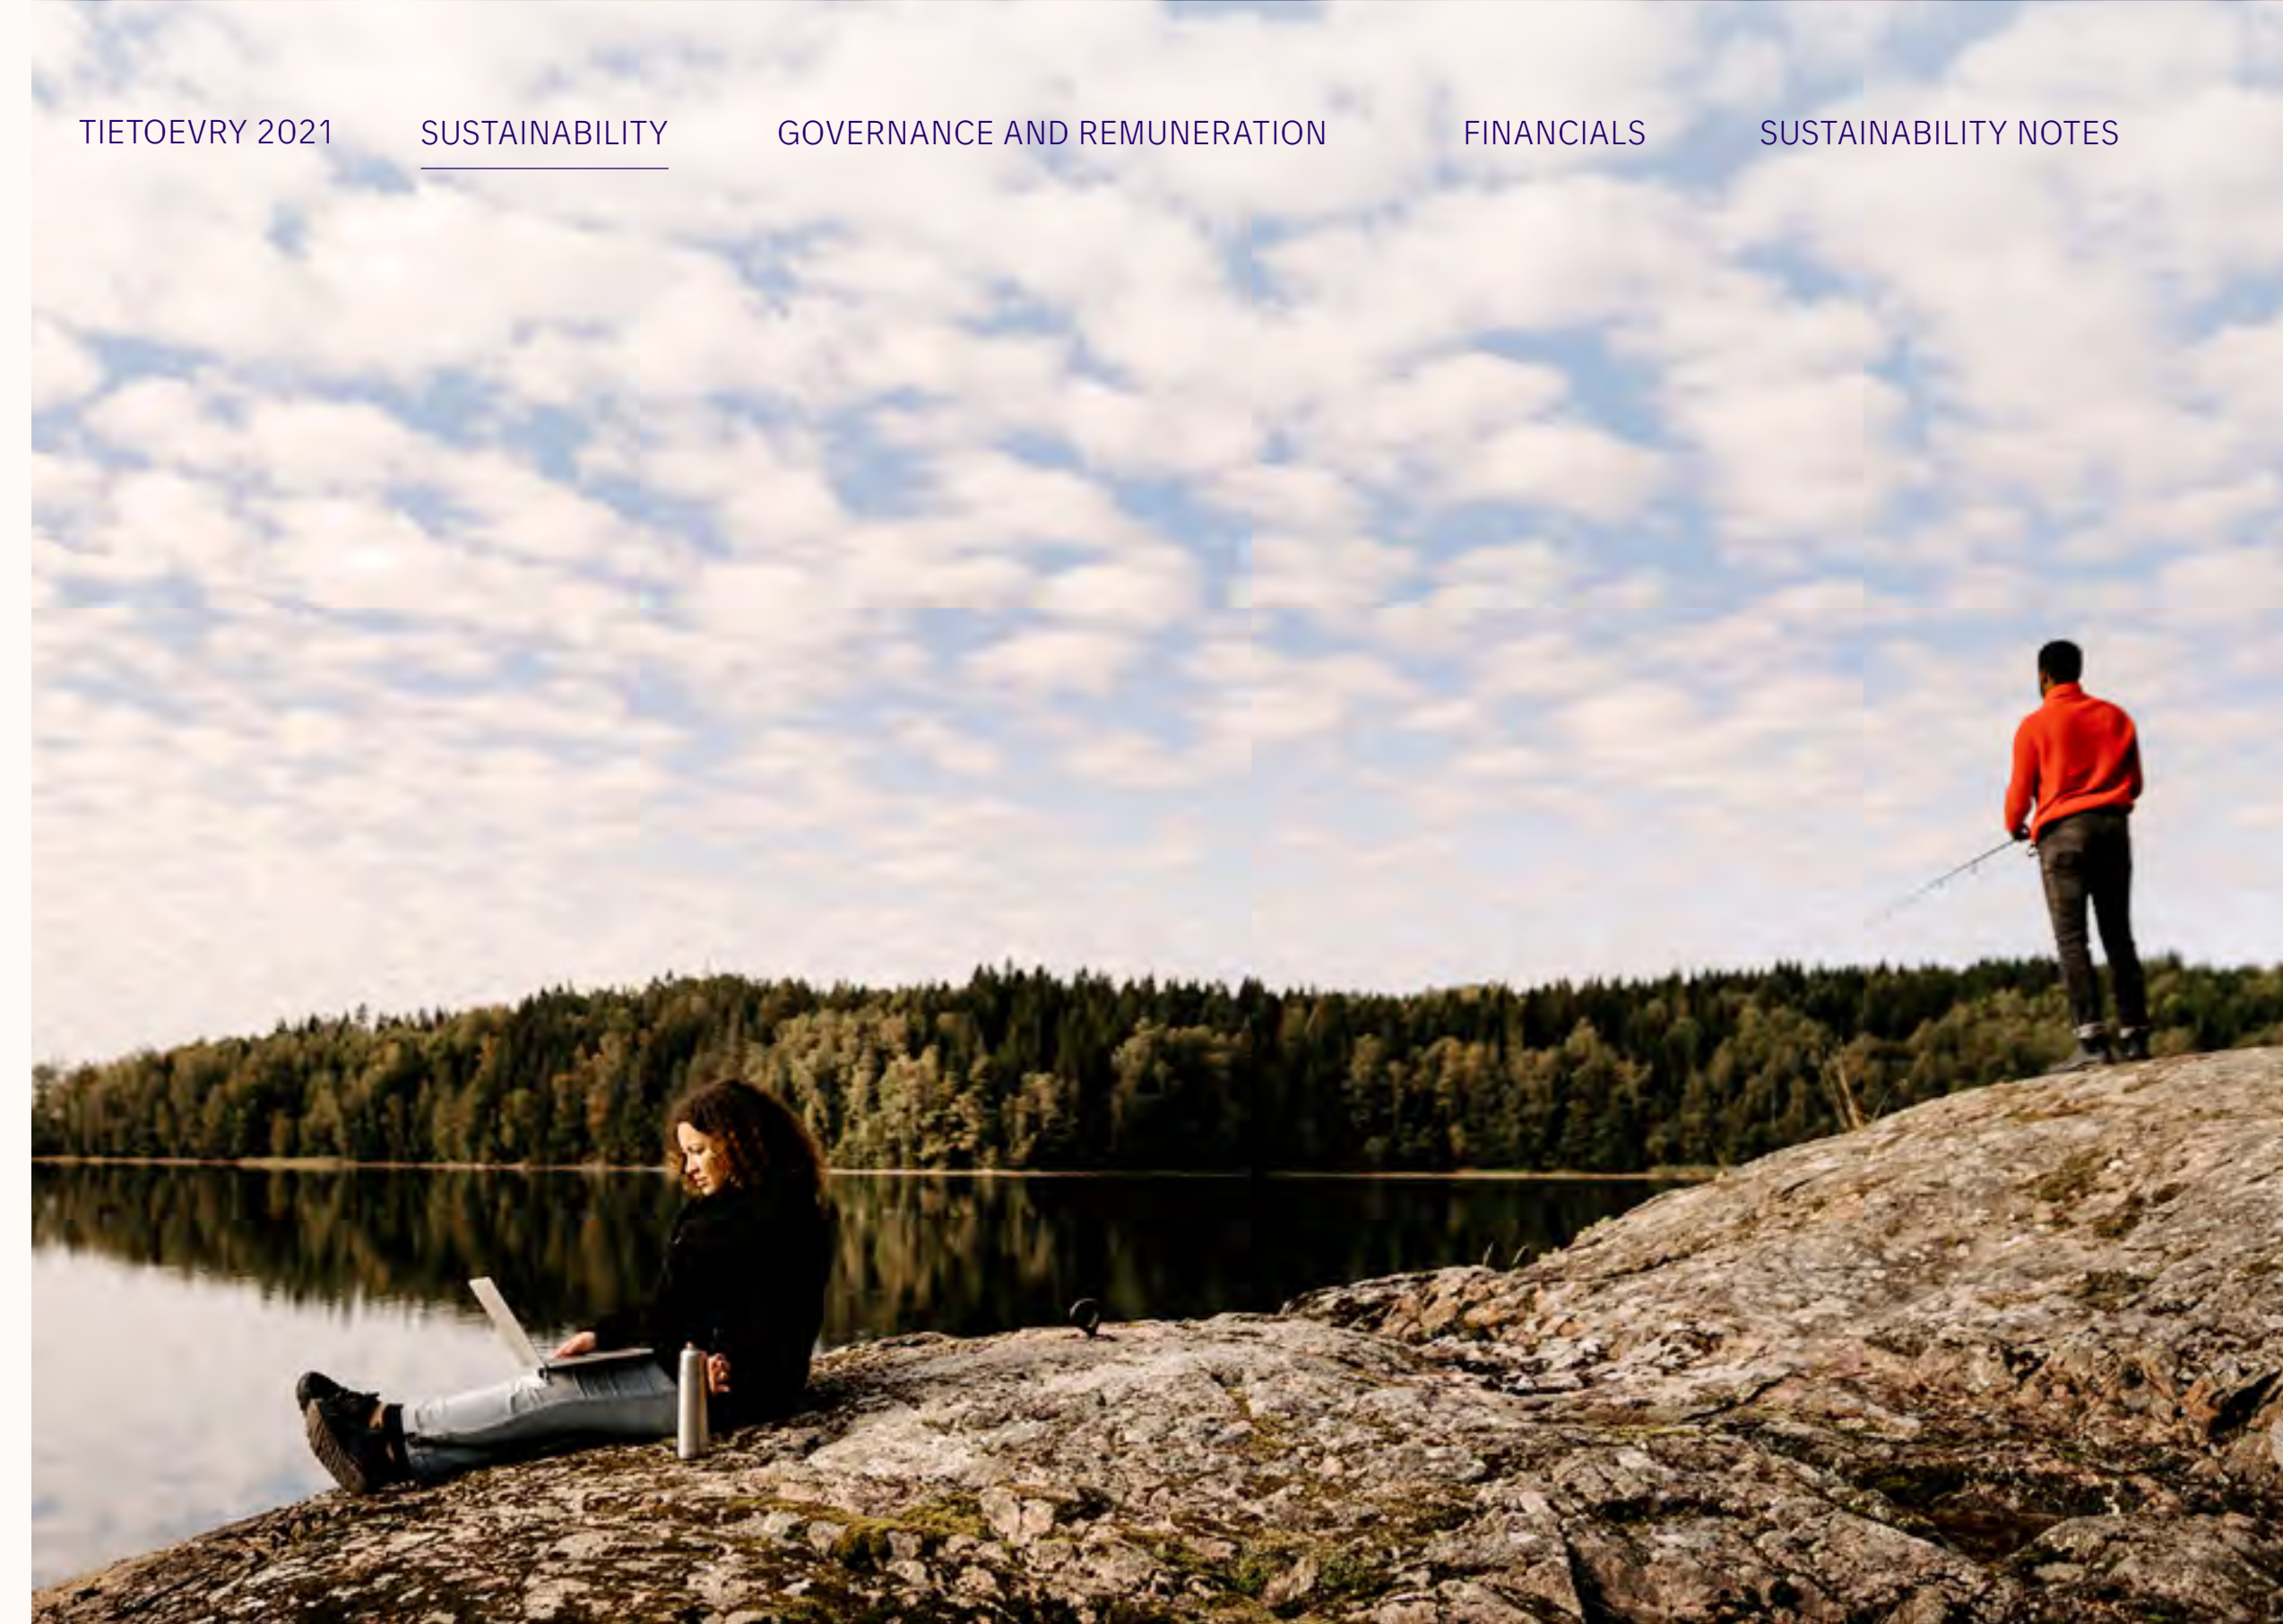

To support our organization in further implementing sustainability in daily business operations, we have a Sustainability Management Process, which is included in our business system. This process utilizes best practices from the UN Global Compact Management Model and GRI Standards. The Sustainability Management Process formally outlines the role of a Responsible Area Owner. Our Code of Conduct e-learning further supports the implementation of sustainable and ethical business practices across the

entire organization. In addition, we have an environmental e-learning that supports the implementation of our Environmental Management System and related ISO 14001 certifications. An annual training curriculum "TietoEVRY Essentials" also covers e-learning in GDPR as well as a general security training.

The Sustainability "HIT Team", a network of colleagues in business, play a key role in integrating sustainability into our business and delivering sustainable solutions to our customers. The cross-service-line team comprises multiple sustainability and technology consultants, enabling a networked way of working with sustainability-related customer projects. During 2021, the team focused on experience sharing and business development, with the aim of identifying and capturing synergies across similar types of customer projects. The structure and focus of business-related sustainability efforts in the new organizational setup will be defined during 2022.

We encourage our employees to engage in the corporate-wide sustainability ambitions as well as deepen their knowledge on the topic to enhance sustainability in our customer engagements. Therefore, a learning module called Sustainability Curriculum was built and launched during Q3, 2021. The Curriculum contains modules on the key elements of our Sustainability game plan.

The Sustainability team, together with the responsible area owners, support internal functions such as Procurement, HR, and our customer teams in sustainability matters. Our sustainability approach and ambitions are also included in the company's sales materials. These materials help our sales teams to communicate about sustainability at TietoEVRY and respond to our customers' sustainability requests.

TietoEVRY's Sustainability game plan 2023 guides our sustainability efforts.

## EcoVadis

TietoEVRY achieved platinum level in EcoVadis ranking and was recognized for its long-term commitments especially in CO<sub>2</sub> reductions and gender balance ambitions.

## OMX GES Sustainability Finland Index

Based on our sustainability performance, TietoEVRY is now listed as part of the OMX Finland Sustainability Index calculated by NASDAQ OMX and GES Investment Services. This is a benchmark index that comprises NASDAQ OMX Helsinki listed companies that lead in sustainability.

## SHE Index

TietoEVRY in Norway was ranked 14th out of a total of 92 companies in SHE Index. In Sweden, TietoEVRY ranked 3rd out of a total of 30 companies. She Index will do a proper market entry to Finland in 2022.

# Stakeholder engagement and materiality analysis

Understanding what our stakeholders expect from us is key to ensuring business success. Collaboration and continuous dialogue bring Tietoevry insights about stakeholders' concerns and expectations, as well as point out emerging risks and also business opportunities. With sustainability expectations growing all the time, stakeholder dialogue is a vital tool helping us to develop our ways of working across the value chain.

We are committed to meet our stakeholders' sustainability requirements and needs both in our daily business and our long-term strategy. Our approach to stakeholder engagement is based on both structured and sporadic dialogue and interactions. We engage with a wide range of stakeholders, including employees, customers, business partners, authorities, governments, and society at large. Our most important stakeholders are those directly affected by Tietoevry's operations, or the ones who have the potential

to affect our operations (all these groups are marked in dark blue in the illustration to the right).

We interact with our key stakeholders in multiple ways; regular surveys are conducted with customers and employees, and important information is received for example through our escalation channels. Social media is an important platform for us to engage in a dialogue with both employees and external stakeholders. We actively monitor topical discussions and respond to questions. We also have ongoing formal and informal conversations with suppliers, business partners, customers, investors and authorities as an integrated part of our operations. More information about our stakeholder engagements throughout 2021 can be found [here](#).

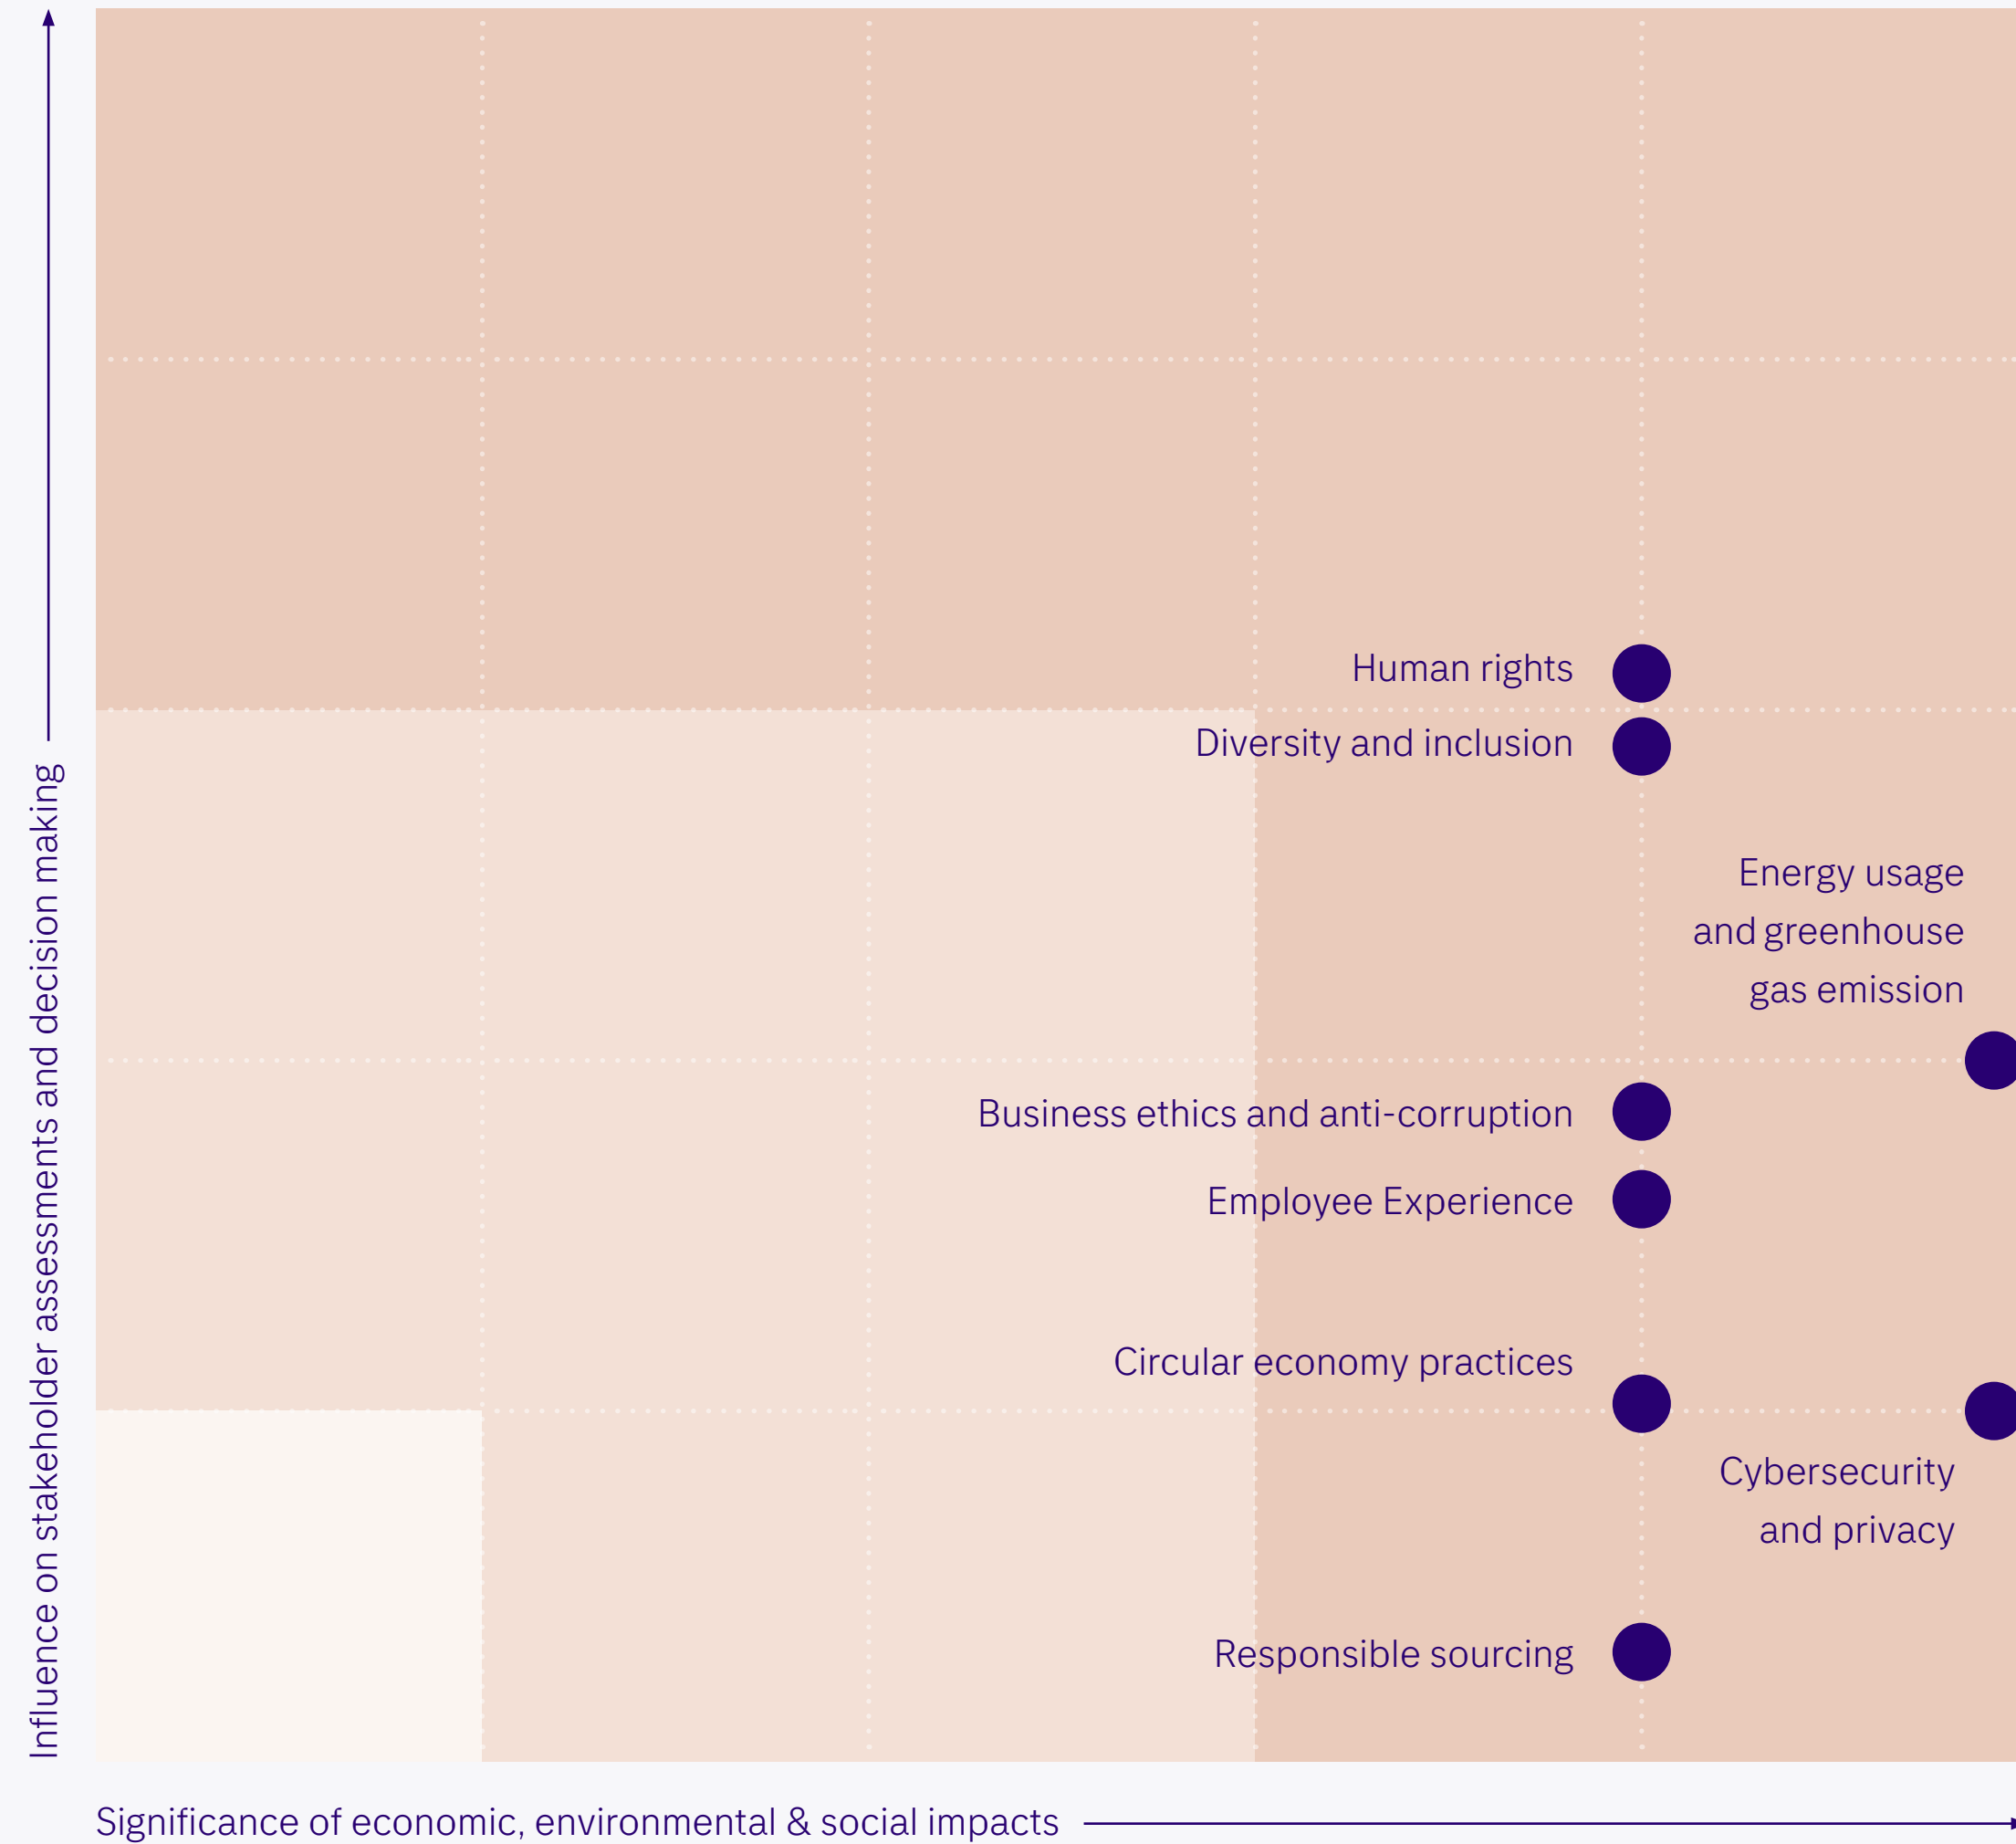

Our stakeholder relations are managed throughout the organization, except for Investor Relations which is centralized within the Finance function.

## Tietoevry's stakeholders

## Materiality matrix according to GRI Standards

### Materiality analysis

A materiality analysis is used to identify and prioritise the most important material topics based on the industry, our business and ambitions as well as the impact we have on society, market trends and the UN's Sustainable Development Goals.

In 2020, we examined stakeholders' perceptions through a survey conducted among customers, investors, employees, potential employees, suppliers and partners. We also carried out in-depth interviews with key internal and external stakeholders – including subject-matter experts, customers and investors – to gather insights for our sustainability focus areas.

Based on our materiality analysis and our vision, strategy and operations, we have developed our sustainability strategy: the [TietoEvry Sustainability game plan 2023](#). The materiality analysis also forms the basis of our sustainability reporting in accordance with GRI Standards, Core option.

### Impact in our value chain

As a company, we may cause impacts either through our own activities and operations, or through our business relationships. The table to the right indicates where in our value chain each material area is of most importance, and where the impact most likely occurs. Cybersecurity and privacy are areas of great importance in our interactions with our customers and the end users of our services and solutions. Business ethics, anti-corruption and human rights are topics that we can impact and be impacted by throughout our entire value chain.

# Climate action

Through leading technologies and the smart use of data, we believe we can positively impact the environment and build solutions that benefit everyone – from our customers to society at large. We strive to carry out our operations in a responsible manner, reduce carbon emissions in our value chain and unlock growth without compromising the earth we share.

Circular economy practices – where we recycle and reuse our hardware – are crucial in our mission of becoming even more responsible in our operations. We strive to explore how to further grow our environmental handprint with the innovations and solutions we provide our customers. Together with them and our ecosystem of partners, we are creating purposeful technology that reinvents the world for good.

# Energy usage and greenhouse gas emissions

Climate change is one of the biggest challenges of our time. Corporations have a significant role to play in tackling the challenge and TietoEVRY is no exception. We take it upon ourselves to reduce our own carbon footprint and help our customers and society at large to become more efficient in energy and resource usage. Together we can pave the way towards carbon neutrality with sustainable IT solutions and innovative technology.

## Our approach to reducing our own carbon footprint

As technology is created by people, and as global warming derives from human activities, we who are behind the technology and the creation of tomorrow's society have a responsibility to make a positive impact on climate change. Companies of today are expected to take responsibility for their energy usage to minimize greenhouse gas (GHG) emissions. The challenge is now part of every industry's and

customer's agenda, so we as a tech provider want to be and should be part of the solution and the shift to greener ways of doing business.

We believe the most effective ways to fight climate change are reducing our own energy consumption and GHG emissions, as well as aiming for net-zero carbon in our operations. We understand the opportunity we have to help customers and societies reduce their emissions with the help of our products and services. We approach our role as an enabler of the transformation to a low-carbon society with great respect.

For our own operations – our offices and data centers, we aim to use electricity, heating and cooling produced with renewable and carbon-free sources – such as wind or solar power – as much as possible. We understand that the location of our data centers plays a key role in enabling the circularity of the energy the centers produce. Innovative technology allows the energy produced by the centers to feed nearby district-heating networks to warm

## Percentage of carbon free electricity in data centers and offices

Target 2023, %

100

Result 2021, %

92

up households. By doing so, we are adding a circularity dimension to our power usage in a few of our data center locations. In 2021, 680 houses were warmed with excess heat from our data center in Espoo.

As a natural consequence of the Covid-19 pandemic in both 2020 and 2021, the business travelling has been dramatically reduced. With the adaptation to new hybrid ways of working – both culturally and through the use of modern conference tools – “no-fly” meetings and less travelling are becoming the new norm. In 2021, we reduced our CO<sub>2</sub> emissions from business travel by 63% per employee from 2020 levels. The reduction in emissions was a consequence of TietoEVRY’s pandemic-related travel restrictions in 2021.

As we need to procure goods for our own operations, we also need to reduce supply chain related emissions. Thus, we need to consider the whole lifecycle of the products and services we purchase and the emissions they cause – both upstream and downstream. We maintain a close dialogue with our suppliers and subcontractors, encouraging them to follow and set their own science-based targets according to the Paris Agreement. We expect 70% of our biggest suppliers to have absolute GHG targets by 2023.

### Towards carbon neutrality

Tackling environmental challenges to protect and save our planet for future generations requires commitment, a proactive approach, and an aspiration to continuously improve. Our long-term targets are defined in our Sustainability game plan 2023. In the plan, we have set ambitious targets to achieve net-zero carbon emissions in own operations by 2025, and we are working to cut 80% of our market-based energy-related GHG emissions by 2023.

For 2021, we see our progress to be well on track, with a reduction of 44% from the previous year. By 2023, we aim to use 100% renewable and carbon-free electricity in our offices and our own data centers (scope 2). In 2021, the result was 92% due to increase of renewable electricity in offices in the Nordic countries. The 2021 result shows that we are well on track towards our target for 2023. Our co-location data centers are reported as part of scope 3 (indirect emissions).

Our total energy consumption for 2021 was reduced by 5% compared to the previous year. The main reason for this was the increased transition to cloud solutions. The transition to cloud is much more energy efficient and reduces the energy consumption in general.

Our carbon handprint is an important tool to exemplify the positive impact increased use of digital solutions and services can have on customers’ emissions. We estimated that the avoided CO<sub>2</sub> emissions for our customers during 2021 were 75 kttons of CO<sub>2</sub>, thereby meeting our goal of an annual increase of avoided emissions by 10%. The scope includes smart transaction solutions in financial services and document handling systems within the public sector. We are looking into further developing our handprint calculation model during 2022.

By 2030, we aim to reduce the average carbon footprint per employee from business-travel-related emissions by 47% compared to the levels in 2019 levels (prior to the pandemic). TietoEVRY’s Travel Rule encourages employees to always prioritize virtual “no-fly” meeting alternatives over travel. The Travel Rule also recommends choosing environmentally-friendly options such as train travel over flying, or to use environmentally-classified vehicles.

## Energy consumption and GHG emissions

Emission class	Unit	2019	2020	2021	% Change 2020–2021

TietoEVRY is committed to the Paris Agreement, and in 2021 we have set our goals in alignment with the Science Based Targets. Our goals, covering our own operations and our supply chain, will be communicated more broadly in 2022 after validation by the Science Based Targets initiative (SBTi).

Our Environmental Rule outlines the environmental approach in our operations. The Rule covers three dimensions: our own operations, the impact we have on our customers' carbon handprint, and our overall value chain. The Rule applies to all TietoEVRY companies and employees in all our operating countries. Each of our businesses are responsible for implementing processes and actions linked to this rule, ensuring alignment across our operations.

The Environmental Rule defines, among other things, our aspiration to reduce direct and indirect energy consumption in our offices and data centers by implementing more energy-efficient measures. When relocating or upgrading our facilities, we prioritize either BREEAM- or LEED-certified buildings where applicable. Other important criteria include the general energy efficiency of a building and the use of green energy. All our offices and data centers are covered by our Environmental Management System (EMS), which is ISO 14001 certified. This year, after the integration activities across former Tieto and EVRY, we achieved a single global ISO 14001 certificate for the combined TietoEVRY covering all businesses and sites.

All mentioned KPIs are tracked on an annual basis. Improvement actions are taken to ensure the best possible performance.

## Making it all work together

The Global Environment Team is responsible for developing, coordinating and supporting the implementation and continuous improvement of the Environmental Management System, EMS. The implementation of the system is the responsibility of the Environmental Manager appointed for one or several of our operating countries. Environmental Managers form a global network with regular meetings facilitated by a global EMS Manager and team.

The Sustainability Team owns the overall Sustainability game plan 2023, which defines the long-term targets for the EMS work. All our environment-related targets are managed in our EMS. The Global Environment Team works in close collaboration with the Sustainability Team to ensure the targets are met. All incidents related to environmental issues are reported through our EMS in each country. In addition, our global risk-reporting portal addresses environment-related risks.

Our Chief Procurement Officer is responsible for the environmental management of our offices and our procurement activities, including business travel. Our environmental coordinators implement the daily environmental activities in our offices. The Head of Data Centers has the same responsibility for the data centers, and the data center teams are responsible for monitoring the energy consumption.

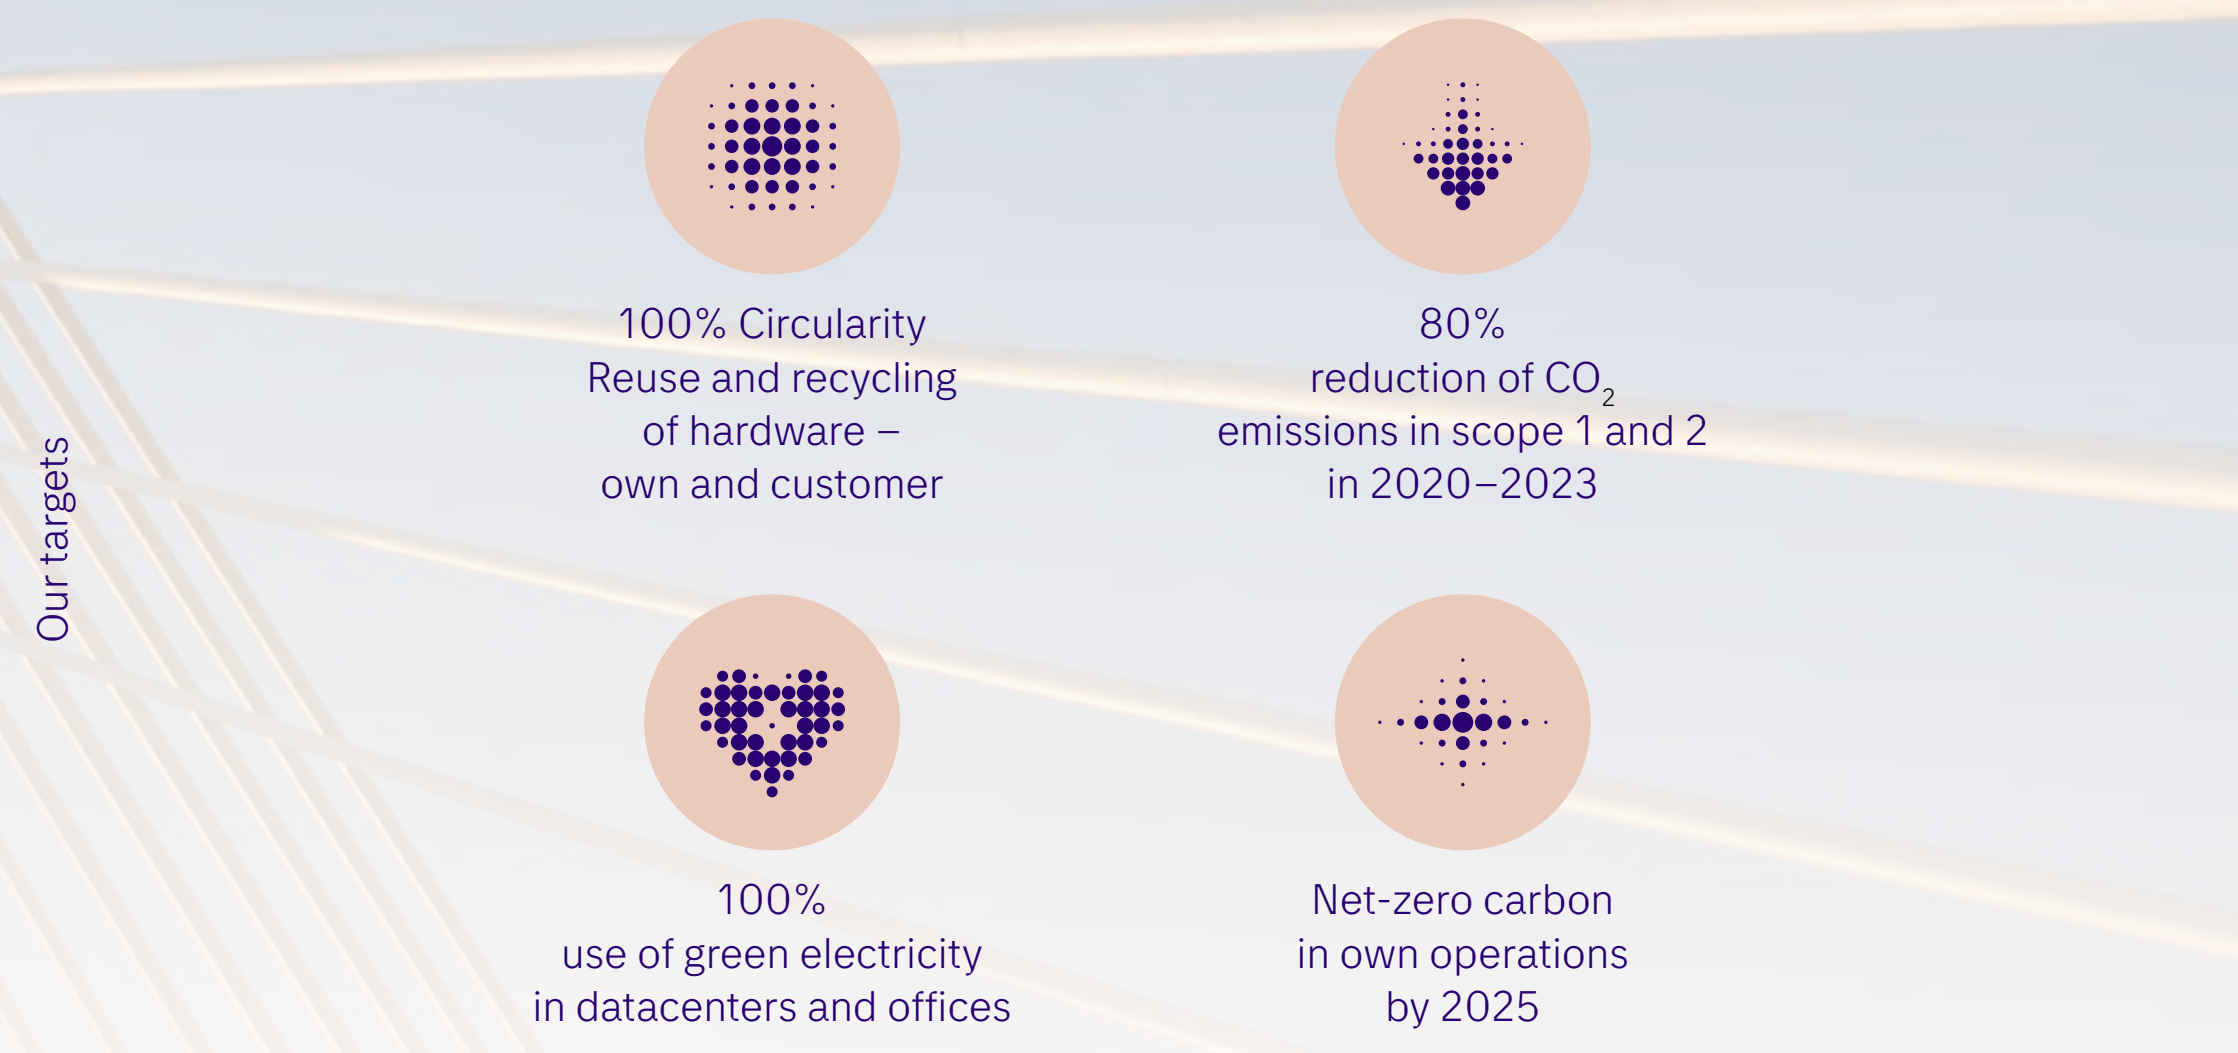

All our offices and data centers are covered by our Environmental Management System, which is ISO 14001 certified.

# Our sustainability ambitions — towards a carbon neutral world

TietoEVRY's total CO<sub>2</sub> emissions\*      Emission intensity

To create a more efficient global environmental management system, we worked on unifying our processes and guidelines during 2021. This work will continue in 2022.

Looking ahead, we continue focusing on ensuring efficient green energy consumption and decreasing GHG emissions by implementing circular-economy practices and responsible sourcing. Through supplier engagement and data collection we continue to manage the environmental footprint of our value chain.

The continued implementation of our Sustainability game plan 2023 will proceed in order to reach a reduction of 80% of our GHG emissions in our operations, and be net-zero carbon by 2025 in scope 1 and 2. We continue our ambitious actions to minimize, neutralize and limit all emissions, also those that cannot yet be completely eliminated.

We understand that we cannot reduce all GHG emissions within a short timeframe. As a responsible company, however, we aim to remove negative externalities that we indirectly cause. To achieve this, we look for sustainable solutions, such as buying carbon removal from trusted and externally verified sources that support carbon sequestration from the atmosphere. Our key actions to reduce emissions are related to the use of carbon-free energy in our own operations and in our value chain. A reduction of business travel, continuous improvement of technical solutions and processes, as well as a consciousness around the materials we use are all among our key actions to reduce emissions.

\* Covers emissions in Scope 1, 2 and 3. Scope 3 consists of emissions mainly from business travel and leased data centers.

We purchase a lot of goods and services via our supply chain and need to take into consideration the lifecycle-based emissions related to these actions. We will continue to work on reducing our emissions in our supply chain through new supplier engagement. Completely offsetting emissions is considered as a next step only after all our reduction ambitions are completed.

To increase the positive impact – our carbon handprint – we continue to provide our customers with solutions to support their transition to more sustainable operations. We are proud to work on projects that help customers measure and manage their emissions. The shift from old ways of working to utilizing new technologies has a positive effect on carbon handprints and we are committed to helping quantify that together with our customers.

# CASE

## Accelerating decarbonization in Europe via the Energy ESC project

30 participating organizations from eight European countries are paving the way for a new business and technology ecosystem aiming at tackling energy related challenges for the future of mobility. TietoEVRY is coordinating the initiative.

[The Energy Electronics, Components and Systems \(Energy ECS\)](#) project is a mix of areas that need increased attention for unlocking the potential to reduce greenhouse gas emissions in the mobility and energy sectors. As societies are becoming increasingly data-driven and are shaped by innovative technology, the Energy ECS project shapes the future of e-mobility by electrifying the mobility industry with the aim of reducing carbon footprints in Europe through energy transitions.

The Energy ECS project builds on six use cases that represent different angles on the future of mobility and energy. The use cases have the potential to solve real challenges related to carbon emissions and are aimed at creating viable business solutions. The initiative tackles the following areas: enablers of new logistic modes, energy-

independent intermodal transport, advanced charging technologies, grid stability responding to bi-directional charging, and enablers of safe autonomous driving.

The advancement of e-mobility is a key part of the green energy transition. Together with its direct role in reducing emissions, the adoption of e-mobility can have a crucial indirect role as a grid stability element if managed intelligently. E-mobility accelerates the transition to wind and solar energy production, thus reducing the use of fossil fuels in the energy mix.

This is an extensive three-year project that truly has the potential to contribute to the European Green Deal Objectives via its ambitions and targets. The project has received funding from the ECSEL Joint Undertaking (JU)

under grant agreement No. 101007247. The JU receives support from the European Union's Horizon 2020 research and innovation programme in Austria, Finland, Germany, Iceland, Ireland, Italy, Sweden and Switzerland. The effort is coordinated by TietoEVRY and is carried out by 16 small and mid-sized enterprises, eight large enterprises, and six research and technology organizations from countries across Europe.

# CASE

## Citizen data drives climate action in Norway

In 2021 Tietoevry partnered to develop Zero Emission Citizen – an interactive map providing Norwegian municipalities with greenhouse gas emission data down to the neighbourhood level. The tool is vital in linking citizen impact with Norway’s climate goals.

One of the challenges in the battle against climate change is that people often lack access to quality data on the carbon impact of their everyday lifestyle choices. Yet changes at the household level are fundamental to meeting national goals for emission reductions. In Norway, calculations from climate-tech expert Ducky indicate that average greenhouse gas emissions from citizens’ private consumption must be reduced from 13,5 tonnes to 3 tonnes in order to achieve the UN’s climate goals.

Against this background, Tietoevry joined forces with Ducky and urban-planning consultancy Asplan Viak to create an emissions data tool for Norway’s municipalities. Tietoevry gathers and assimilates publicly available data to help calculate the average emission impact per household in a given location. This data is then visualised on an interactive map.

“The world is on fire and we’re running out of time, so everybody needs to pitch in. Yet the emissions impact of private individuals is generally not included in municipal climate strategies due to a lack of good data,” says **Kim Remvik-Larsen**, Head of Business Concepts, Data Services at Tietoevry.

“One of the quickest ways to make a significant positive climate impact is to help people to change their habits a bit. We need to do this in such a way that people want to change, rather than feeling pushed to do so. Zero Emission Citizen is designed around this promise,” he says.

### Climate impact meets business value

The tool has been available to all Norwegian municipalities since June 2021. Average greenhouse gas emissions per

Zero emission citizen is vital in linking citizen impact with Norway’s climate goals.

capita are broken down into impact categories such as nutrition, transport and electricity. Municipal employees can drill into the data all the way down to the neighbourhood level. Groups of citizens can then be informed about the carbon impact of their choices, and can be offered initiatives to reduce their household's footprint.

TietoEVRY helps the municipalities to access data from public registries, from Norway's national bureau of statistics, and by performing life-cycle analyses on consumption habits. Work has also started to bring in data from energy companies, banks, telecom providers and grocery stores. Other partners will be included too, as TietoEVRY looks to build a multilateral ecosystem for exchanging carbon-impact data and insights.

"We're in a dialogue with companies from multiple sectors, as there is business value for them in being able to provide carbon-impact data and insights to their clients," says Remvik-Larsen. "For instance, one of the partners in Norway is a bank with 1.2 million private customers. The bank provides these customers with the option of seeing the carbon impact of their financial transactions. Services of this nature will clearly benefit from the data we gather."

### Same model, different contexts

The statistically relevant information from Zero Emission Citizen helps in identifying behavioural shifts and trends. Both public and private actors can use this knowledge to create campaigns that shift consumption in a more climate-favourable direction. Having the information available in near real-time is a big advantage, as until now there has

often been a significant time lag between gathering data and driving action.

While climate-change data is the basis for the model today, Remvik-Larsen says the principles can be applied in other contexts too. This is where TietoEVRY sees future opportunities.

"Sustainability is an extremely important topic, and also a very good learning domain for principles and approaches that are valuable and applicable elsewhere," he says. "By pulling together information from a range of different players, we're essentially providing a better basis for decision making. In the years to come, the bulk value of this approach can be realised in many different areas. We're learning more every day."

Having the information available almost real-time is a big advantage.

# Circular economy practices

As one of the largest IT companies in the Nordics, we use a lot of hardware in our operations. We also provide hardware such as laptops and mobile phones to our customers. Due to this our operations do generate electronic waste.

A report from 2020 indicates that global recycling of e-waste is not keeping pace with the growth of such waste. We are committed to take action in this area, contribute to improving these numbers and support the transition to a circular economy. Reusing and recycling hardware in a structured manner is our first step towards enabling circular economy practices for both ourselves and our customers.

## How we work

Production of hardware involves the extraction of raw materials, usage of water and generation of carbon

emissions. Today, around 83% of total global e-waste is not collected for recycling, which in turn increases the consumption of resources, the emission of greenhouse gases, and the release of toxic substances that may come from irresponsible waste-disposal procedures.

At TietoEVRY, we provide personal IT equipment for our 24,000 employees. As such, we are responsible for a hardware fleet comprising computers and mobile devices of various types. Through our customer operations we also support customers and around 400,000 end users with devices such as laptops and smartphones.

Our End-User Services business is responsible for purchasing the hardware delivered to TietoEVRY customers, while our Procurement function purchases hardware for our own employees. End-User Services also ensure that our customers' and TietoEVRY's own environmental requirements are met. This includes TCO certified certification, an independent sustainability certification for IT products,

## Percentage of reused and recycled hardware

Target 2023, %

100

Result 2021, %

Internal

70

Customer

83

\* Scope: result based on reuse of returned devices (mainly laptops).

Our ambition is to reuse or recycle 100% of all internal and customer hardware.

or Energy Star certification for hardware devices. All TietoEVRY's hardware suppliers and service providers are required to have relevant environmental certifications in place, such as ISO 14001 or the equivalent.

The standardized lifecycle management services provided by End-User Services include end-of-life handling. This covers taking back used hardware, secure erasing of data, the grading of hardware to determine its condition, and re-sale or recycling.

We collect information about the devices – including purchase date, purchase price, and technical specifications – and combine this with HR data to better understand the needs and usage patterns of our employees. When utilizing the Lifecycle Management (LCM) framework for our customers, we can collect the information about the devices they source from us and make it available to them.

By managing what, when and how we buy – and by taking responsibility for sustainable usage and end-of-life handling – we strive to minimize the negative impacts of production and logistics of the devices.

## Progress

The former Tieto and EVRY used different asset management systems. Our ambition as TietoEVRY has been to establish and implement a standardised approach to the purchasing and leasing of hardware devices for our customers and employees.

The Covid-19 pandemic had a positive impact on our circular economy practices, due to the savings actions that put a temporary stop on purchasing hardware for

employees. This boosted the reuse of available used devices within the company. We build on this and continue towards our ambition to reuse or recycle 100% of all internal and customer hardware – i.e. laptops and mobile phones by – the end of 2023.

In 2021, we started to track data regarding the reuse and recycling of the hardware usage in 2021 across TietoEVRY. We count the number of returned and recycled laptops, including our own devices and the ones leased to our customers. We set a monetary value for these devices, and get configured reports related to our sustainability targets (CO<sub>2</sub>, kWh) and our targets for the secure and safe handling of waste (including laptops and mobile phones). These reports are being managed by our End-User Services, Procurement and CIO Office.

We have also started to collect information related to waste, recycled rare materials and conflict materials, as reported by our hardware suppliers and take back system providers. By creating a framework and a baseline we can monitor and follow up on compliance and KPIs in this area.

In 2021, we recycled and reused 70% of the laptops used by our employees. In addition, 86% of the laptops delivered to our customers were reused or recycled.

We consider the devices that are returned to the take back system provider and are not reused but recycled, as waste. During 2021, TietoEVRY generated 4,2 tons of e-waste. The waste has been disposed through good environmental practices by our third-party provider. Due to lack of availability and quality of data, our current data source covers approximately 75% of the estimated total volume of laptops.

By utilizing a trusted vendor, and by closely following up our hardware life cycle through our central CIO office for devices used internally and End-User Services for customer devices, we are confident that our waste levels stay as low as possible and that the waste generated is being handled in an environmentally friendly way.

We also introduced a new mobile phone policy for the company, with a mobile phone lifecycle of three years. The new policy enables us to establish better management for the full life cycle of mobile phones together with our employees.

## Looking ahead

We continue our path towards the 2023 ambition with the focus in 2022 on implementation of the new policies and processes. We continue enhancing the targets and partner selections and defining a more detailed roadmap towards 100% reuse and recycling of hardware. Green hardware reporting with energy usage per hardware unit, carbon emissions generated throughout a device's lifecycle, waste per unit, and information related to rare and conflict minerals will also be further explored.

Our ambition is to extend hardware lifecycles and increase the usage of reused devices by supporting the end users with appropriate device-management services. We will also work on consolidating and standardizing our hardware models – focusing on TCO-certified devices – while minimizing the carbon footprint of our devices. Our future activities focus on increasing the length of lease periods, enhancing the climate-neutral hardware process and the circular economy. We aim to compensate the emissions for purchased and leased hardware.

# CASE

## Payment cards go beyond plastic

TietoEVRY's card-issuer customers are increasingly choosing materials other than virgin plastic for the payment cards they source from us.

Each year TietoEVRY delivers approximately 20 million payment cards. In 2020, just four of our card-issuer customers used sustainable materials for the body of the cards. A year later, and an additional 22 of our issuer customers have committed to launching payment cards based on sustainable materials.

We expect this trend to continue, which means that within two years more than 50% of the cards we provide in the Nordic countries will be made from sustainable materials.

"Cards are traditionally made from five different layers of polyvinyl chloride, or PVC, a material derived from oil. Sustainable cards replace some or all of these layers with a material other than virgin PVC," says **Jarmo Rouhiainen**, Head of Card Production and Personalization at TietoEVRY.

"There are essentially two approaches. The first is to use recycled plastic materials such as rPVC or rPET. The other is to use a completely biodegradable material such as polylactic acid, or PLA, which is made from corn starch. TietoEVRY is working with both approaches – it just depends on the customer's preferences," says Rouhiainen.

Towards the end of 2021, TietoEVRY announced an agreement with the Savings Bank group in Finland that would allow the bank to offer its customers payment cards made from plastic collected from oceans and coastal regions. According to the International Union for Conservation of Nature (IUCN), at least 14 million tons of plastic end up in the oceans every year. The plastic for the Savings Bank cards is collected in countries without adequate recycling facilities.

"The growing trend towards using materials other than virgin plastic for cards is a win-win for sustainability on the one hand, and market differentiation for our issuing customers on the other," says Rouhiainen.

"Even though people increasingly use their phones to make payments, the number of physical cards out in the market is growing each year. A payment card is a very strong brand token

that a customer sees and uses often, which is why many banks and fin-techs look at cards as a way to stand out. Sustainable materials provide more options for this differentiation, while doing good for the environment."

TietoEVRY has also kicked off a pilot project with Norwegian banking-alliance Sparebank 1 to assess the viability of recycling expired payment cards. When customers receive a new card, they also receive a return envelope and instructions to send back the old card. These are then sent to a partner for recycling. The overall CO<sub>2</sub> impact of the exercise is being assessed before potential wider roll out.

We are also helping our issuing customers to minimize the environmental impact of cards in other ways, including ordering them in larger batches from local factories to make deliveries more sustainable.

# CASE

## Data-driven insights reduce bus emissions in Helsinki

Helsinki's public transport authority worked with TietoEVRY to study bus-route data and find ways to reduce carbon emissions. We believe the project can be replicated in other cities too.

TietoEVRY's customer base in Finland includes public transport authorities, with some 90% of the country's public-transport data going through our systems. The Helsinki region alone comprises some 15,000 IP addresses and is one of the biggest IoT implementations in Europe. We offer everything needed from the IT side to run such a service, including ticketing, fleet management, data management in vehicles, background services, and other platforms.

One of our customers is the Helsinki Regional Transport Authority (HSL), which runs all public transport in Finland's capital region. With the majority of Finland's citizens living in the capital, it generates some 70% of the country's total public transport data. This makes Helsinki the ideal testbed

for public transport impact assessment and optimization projects, such as the emission-reduction initiative for buses that we carried out for HSL through 2021.

### Smooth driving, better scheduling

**Christian Sundell**, Head of Intelligent Transport and Logistics Systems at TietoEVRY, explains the background to the project:

"HSL already uses TietoEVRY's solutions to optimize bus routes based on how people jump on and off the vehicles," says Sundell. "Our systems know where the buses are moving or should be moving, how fast they go between bus stops, whether they are on schedule, and so forth."

"Now imagine if a bus driver is running late, for instance, so they push harder on the gas pedal to get to the next stop. Compared to smooth driving, the deviation from the ideal emission footprint on that bus stop goes into the red. This is the kind of thing we've been studying in the impact assessment for HSL," says Sundell.

The idea is for the findings to be used in how HSL plans its bus routes. Even if an individual driver can affect sustainability by how they handle the accelerator, the biggest emission-reduction gains are made in the planning phase. With the more complete data picture provided by TietoEVRY, route planners can study the benefits of shortening routes or making seasonal changes to them. The data will make it possible to properly study the trade-

offs between service continuity and sustainability targets. Sundell believes this approach can be applied in other cities too.

“We are using a very granular and accurate calculation model in Helsinki that can be extended elsewhere, as the environment and routing details are similar in other Finnish cities,” he says. “By using Helsinki as the example case, we will calculate national averages for public transport emissions based on vehicle type, route, weather and several other metrics. These can then be used as guides in other locations.”

### Green means more than go

In another boost for public transport sustainability, Tietoevry also works with partners on traffic-light prioritization services. Traffic lights and bus services in Finland are already synced so that a bus arriving at an intersection is met with a green light. This not only allows a smoother journey for passengers, it also makes better use of driver time and reduces the fuel consumed when starting from a stop. Now Tietoevry is studying the traffic-light prioritization data with the aim of making minor adjustments to bus schedules that would help with further reducing emissions.

“Eventually all this work and data will be available for the different applications through which HSL customers buy their tickets,” says Sundell. “Our solution will calculate accurate data on the emissions impact of each bus journey to show passengers the carbon footprint of their transport decisions.”

“We have a lot of data that can help public transport authorities to deliver a better and more sustainable service,” he says. “Digitizing cities in this way is not only good for sustainability, it also helps public transport authorities to strengthen relationships with their customers.”

Data can help public transport authorities to deliver a better and more sustainable service.

# Exciting place to work

We help to create smarter and more sustainable cities, increase wellbeing for citizens, and support our customers' digital transformation. Our employees are developers of digital futures using their specific sets of skills and expertise to create technology that reinvents the world for good. Our people are the key source of our competitive advantage, so employee experience is a top priority for us.

Our values – openness, trust and diversity – stem from our Nordic heritage and steer our work. Diverse skills, capabilities, perspectives, knowledge, and ideas are what build sustainable solutions that solve our customers' challenges for good, and allow us to create a workplace where everyone can thrive.

# Diversity and inclusion

A culture where everyone can grow helps employees to perform at their very best. Capitalizing on the perspectives of different people with diverse backgrounds improves innovation.

For TietoEVRY, diversity and inclusion are fundamental in the creation of an inspirational workplace and thinking differently is how we advance our own and our customers' competitiveness.

## Our approach

Diversity and inclusion are business critical, as a diverse workplace means more potential for finding better solutions to the problems our customers are facing. We need a diverse team when developing new digital services for a diverse group of users. There is also a shortage of talent in our industry, so for us to win the battle to attract talent we need to ensure that all current and future employees can thrive with us.

Our ambition is to be inclusive to all – majorities and minorities alike. Diversity means valuing differences and

having the utmost respect for everyone as an individual – regardless of sex, gender identity, nationality, religion, belief system, race, age, disability, sexual orientation, political opinion, union membership, or social or ethnic origin.

Inclusion in a workplace can be described as the realization of a professional environment in which all individuals are treated fairly and with respect, have equal access to opportunities and resources, and can contribute fully to the organization's success. To reach this state we work hard on creating a culture based on continuous learning, diversity and inclusion. Constantly developing our culture, mindset and processes is key to fostering an environment of open thinking where a truly eclectic mix of people join forces for common goals.

Our Code of Conduct and our Diversity and Inclusion Charter outline the principles for diversity and inclusion at TietoEVRY. Everyone plays a role in fostering a diverse and inclusive culture. Each manager is responsible for ensuring diversity in their teams. Managers have the responsibility to inform, engage and educate their team members on our

Target 2030, %

50

Result 2021, %

29

policies, promoting inclusive behaviour and minimizing bias in the workplace. The overall responsibility for ensuring a diverse workforce where people feel included lies with our CEO and the Group Leadership Team.

## Attracting a diverse workforce

Policies and statements are fundamental, but the proof lies in how diversity and inclusion manifest in each business unit and in our operations across the company. Diversity is a highly prioritized topic for the members of our Talent & Acquisition team. They work tirelessly towards our diversity goals when hiring and attracting new talent.

Our aspirational goal is to have 40% female employees by 2026, and a 50–50 male vs. female split by 2030. TietoEVRY's ambition is to have, at any given time, the proportion of female leaders equal to or greater than the overall share of female employees, and to ensure that there is at least one female successor for all positions in all manager level succession plans.

Our diversity ambitions also reflect the global markets we operate in, with a mix of around 80 different nationalities and cultures represented among our employees. We support internal mobility across national and business structures and our talent acquisition is based on a global talent pool. A healthy blend of age groups is good for the business, therefore we invest in the recruitment of graduates and young professionals. We see a competitive advantage in a combination of experience, subject-matter expertise, and industry knowledge with competences in relevant emerging technologies. We are also committed to ensuring an accessible workplace for everyone, regardless of their physical or cognitive abilities.

An inclusive culture, where people experience psychological safety, is a prerequisite for creating a diverse workplace. An inclusive workplace offers equal opportunities for jobs, wages, benefits, leadership and personal development, as well as access to training, depending on each individual's ability and performance.

We measure diversity and inclusion in multiple ways. A corporate-wide cultural assessment is part of our employee survey, OurVoice, which is run three times a year, while the 50/50 gender balance ambition is monitored on a regular basis across our businesses and countries. Our HR function provides the Group Leadership Team with quarterly updates on the developments in various aspects of the diversity and inclusion charter.

## Progress in 2021

According to the European Institute for Gender Equality, only around 17% of the almost eight million ICT specialists in Europe are women. Increasing the share of women is challenging, since women are less likely to apply for male-dominated jobs. For companies like TietoEVRY, changes in employer communications and the language of job ads can help to improve the situation.

With this knowledge, we decided to tackle the issue at a grassroots level by revisiting our recruitment ads with help of Laura Smith, a researcher within the field of diversity, equality and inclusion from VALIDEI Research. By changing gendered content in the ads we were able to increase the percentage of female applicants by 32%. This initiative was a pilot conducted in the Nordics and the plan is now to analyze the learnings and implement the initiative on a global level.

Employee turnover by region, 2021 (2020)

We also use anonymous recruiting for target groups, such as graduates. This means we receive no information about the candidate's age, gender or education in the early stages of the recruitment process. Instead, all applicants go through a game where certain themes are explored, such as how willing they are to take risks, level of engagement, and how fast the candidates perform different tasks. Basing decisions on data removes the risk of bias influencing the applicant's chances to proceed in the recruitment process, as the focus remain solely on the competence and skills needed for the job.

In 2021 we recruited a total of 209 (105) graduates of which 80 (46) were females. Compared to last year's figures, we have managed to recruit more graduates in total. However, we see a slight decrease in the percentage of women being recruited through our graduate programme. An explanation to this might be the increased need for highly technical software development roles. The share of females applying for highly technical roles as software developers is in general low. This is a problem we share with other companies in our industry. Naturally, this affects the total number of females hired through our graduate programme, and overall during the year. In total, during the years 2017–2021 we recruited 649 graduates of which 39% are women.

By the end of 2021, the share of women in senior management positions at TietoEVRY had reached 23% which is an increase in comparison with last year's figures. Overall, the share of female employees in the workforce remained at the same level as last year, at 29%, and the share of total females hired was 31%, which is an increase compared to last year when 27% of the new employees were female. On 31 December 2021, TietoEVRY's Group Leadership Team comprised eight men and two women and TietoEVRY's Board of Directors comprised nine members elected

by the Annual General Meeting, including six men and three women. In 2021 we took the first steps towards the gender balance target by looking into our recruitment and successor practices. The development during the first year was moderate, some units standing out as good examples, and we continue the work in 2022 with new initiatives and practices across our new businesses.

TietoEVRY contributes to transparency in gender equality by participating in the SHE Index. This is a voluntary measurement of how companies perform in terms of gender balance, gender equality policies, and diversity and inclusion. TietoEVRY has been included in the index for Norway since 2020, and in 2021 we were included in the indices for Sweden and Finland too. We have had a positive development on the index score in Norway where TietoEVRY ranked 14th out of a total of 92 companies. Similar success is being seen in Sweden, where TietoEVRY ranked 3rd out of a total of 30 companies. The SHE Index will be introduced in Finland in 2022.

Our commitment to diversity and inclusion is also shown in the composition of our workforce. We are proud of the 35 nationalities represented at our headquarters in Espoo, Finland. At our Stockholm office in Sweden we have 29 nationalities, and at our Fornebu office in Norway we have 32. Targeted efforts to recruit young professionals (aged 30 or younger) resulted in the onboarding of 593 young recruits (37% of our total recruitments during 2021). At the end of the year, the average age of TietoEVRY employees was 39,7 years.

We take part in a wide range of local initiatives and activities to highlight diversity, inclusion, and women in technology. For example, in 2021 we continued to partner in female networks such as Women in Tech in Finland and Sweden,

An inclusive culture is a prerequisite for creating a diverse workplace.

and with similar external networks in Norway. Publishing our aspirational goal to have a 50–50 male vs. female split by 2030 has created us many public speaking opportunities about these ambitions and activities, including the UN Women network as well as an YLE Aurora event focused on equality. We also partnered with Pride across the Nordics during 2021.

During the past few years we have also focused on neurodiversity. This is described as the concept of not viewing neurological conditions as deficits, but rather as strengths that can be utilized as a competitive advantage. TietoEVRY works together with the Norwegian Labour and Welfare Administration (NAV) to enable and accelerate this initiative. Coming out of the pandemic, we will continue to build awareness – both internally and in wider society – to increase the utilization of this mostly untapped talent pool. During 2021, we held internal sessions to engage our colleagues and we are currently investigating widening the scope of our neurodiversity work to a pan-Nordic level. With increased understanding about neurological differences, new opportunities will open up where digital talents can drive innovation, challenge the status quo, and in general aim to make the world a better place.

In Sweden we have continued our collaboration with Länsstyrelsen in Stockholm – as part of its “Vidga Normen i praktiken” project – to evaluate our internal work against discrimination based on skin colour or ethnicity. Through training conducted by Länsstyrelsen during spring 2021, this project helps to increase our knowledge and awareness of restrictive norms. Guidelines on vocabulary and examples to be used when talking about racism in the workplace are now part of the Swedish personnel handbook. The ambition is to ensure everyone understands their responsibility and becomes aware of any unconscious bias and the actions they can take to mitigate it.

During 2021 six allegations of discrimination cases were submitted through our escalation channels. All of them were thoroughly investigated and none were concluded to be a case of sexual harassment i.e. discrimination. All six cases has been closed following due investigation.

## Looking ahead

We kicked off our 2021 work by developing a clear action plan to support our ambitions set out in the Diversity and Inclusion charter. An inventory seeking to map all the ongoing initiatives and actions related to diversity and inclusion at our offices around the world will help us understand how to scale up and accelerate our efforts. Each country in which we operate may face different challenges when it comes to acknowledging diversity and ensuring inclusiveness.

Due to the launch of our new business strategy and the operations being split to six end-to-end businesses, there will be a need to review how we work with diversity and inclusion, including the further establishment of related KPIs. Our actions going forward will include setting measurable goals for diversity and gender balance per business unit, identifying successors and final candidates for leadership positions of both sexes, as well as scanning and shaping our recruitment practices in general.

We also aim to increase development and mentoring initiatives for female leaders, as well as build awareness across the organization through initiatives such as bias trainings. Salary comparisons across the various roles and countries will be one of the key initiatives going forward. It will also be vital to establish a transparent and systematic way to follow-up on the development of gender balance in our new businesses to ensure progress towards our long-term ambition.

# Employee experience

Our people are the heart of TietoEVRY, and we are committed to building an engaging workplace with an excellent employee experience. We want our employees to feel a sense of pride and commitment to our company and have the opportunity to grow and develop with us.

## Our approach

TietoEVRY is one of the largest communities of technology and business professionals in the Nordic region. We employ over 24,000 professionals and operate in more than 90 countries around the world. Continuous focus on improving engagement throughout the organization is an investment in the success of our people, and subsequently in the success of our customers. Thus, employee experience is vital for us.

To help our customers be more competitive, we need people with deep understanding of digitalization and the latest technologies, as well as an understanding of specific industry and customer needs. As our societies digitize faster than ever – with industries merging and all companies becoming technology companies – the need for new skills is constant and competition over talent is fierce. Understanding of local market environments, legislation and regulations is also important for our customers. All these factors together mean we need to constantly both re skill and up skill our current employees, as well as recruit new talent with the right experience.

## Employee engagement score

Target 2023, %

75

Result 2021, %

78

## Employee engagement

Continuously bringing employee's perspective and voice to the development of TietoEVRY

### Our voice

Establishing a regular solid feedback and dialogue cycle across the organization

TietoEVRY's Human Resources (HR) function facilitates and develops our workforce, making sure our practices and employee experience improve. The function is led by our Chief HR Officer, while HR leads are responsible for country-specific and service-line-specific HR operations and agendas. Leaders and employees in all countries are also responsible for living our culture and acting as role models for it. Overall, the governance for the employee experience lies with the Learning & Development unit within HR. Employee engagement activities are followed up through OurVoice, an employee engagement survey where employees give feedback on how we are doing in key areas three times a year. The survey results are reviewed and discussed in the Group Leadership Team, as well as within the business networks and teams across the organization.

We support freedom of association and collective bargaining as defined in the International Labour Organization Declaration on Fundamental Principles and Rights at Work, and as stated in our Code of Conduct. Local employment laws and practices, collective agreements, and individual contract terms are followed. In the countries of operation where collective bargaining is not applied – such as China and India – we facilitate local forums where these topics can be addressed.

European Works Councils (EWC) are bodies representing European employees. TietoEVRY's management works constructively with the employee organizations through both the EWCs and the local works councils and unions. This is both to inform and consult on the business and any significant decisions at a European level that could affect our people's employment or working conditions.

We also look to collaborate closely with personnel representation bodies. Our personnel elect members and

deputy members to the company's Board of Directors. This is done by the personnel representatives in accordance with the Personnel Representation Cooperation Agreement and Nordic practices.

In 2021, 45.8% of our employees were covered by collective bargaining agreements. However, the differences between countries are extensive, with the highest participation being in Sweden (93%) and in Finland (95%). Just as in 2020, this year too we mapped our operations in relation to geographical areas in which employees' rights to exercise their freedom of association or collective bargaining may be violated or are at significant risk. The majority of our operations take place in areas where the risks are low, but a large proportion of our operations are also taking place in areas where there are large risks for violations or no guarantee of rights (34% of total operations). In these countries of operation – such as in China, Ukraine, Poland, Russia and Serbia – we strive to facilitate local forums where these topics can be addressed.

### Keep Learning – boost learning for the future

Curiosity and lifelong learning are crucial parts of our culture and keys to success in our dynamic industry, so developing and nurturing a learning culture is essential. We call it "Keep Learning".

Our global processes to support this include our voluntary competence based Learning Communities and the Cornerstone learning platform, which has various learning modules on areas like data, analytics and the cloud. Both forums provide opportunities for our employees to learn and share experiences, and have turned them into active creators and curators of so called learning playlists, i.e.

suggested curriculums. By the end of 2021, 99% of our employees had used the learning platform, with an average of 19 training sessions completed per employee.

To further boost the learning culture during 2021, two Keep Learning weeks were organized to highlight the importance of learning and maintaining new skills. Keep Learning weeks included a total of 76 themed sessions and involved more than 3,200 learners in the activities.

Our customers demand that we have the competencies to solve the challenges they face. To understand them and ultimately fulfil their needs, the right components, skills and expertise must be brought into the dialogue with the customer. In 2020, we launched a development program together with our strategic partner Microsoft to certify 3,000 Microsoft Azure-cloud professionals at TietoEvry. By the end of the year 2021, the number of completed Azure certifications were 2,343, and we are proceeding well in our ambitions towards building the largest Azure professional network in the Nordics.

Microsoft Azure trainings are meant for all, from sales to technical experts and leadership to project managers. Upskilling helps in understanding the bigger picture, not just one customer project or delivery at a time, and it also creates a wider benefit for our customers and for us as a company.

## Progress in 2021

The year 2021 was marked by the continued global pandemic, and it created an extensive focus on our employees' well-being and engagement. Since the pandemic began in 2020 we have been practicing the remote ways of working, which has become the new normal for us. We call it Hybrid Work. This has given many of us the

# Hybrid Working at TietoEvry

## Flexibility & well-being

Flexibility to choose where you work increases well-being.

Possibility to decide where to do tasks that require concentration and less interruptions or collaboration and brainstorming.

## Digital tools

Tools to increase collaboration virtually and across geographics.

## Attractive offices

More effective and holistic use of the offices for social meetups, collaboration, innovation and concentration.

## Remote work

Time saved thanks to less commuting and running between meeting rooms.

Opportunity to fit the workday into your private schedule.

## Sense of belonging

More focus on strengthening team culture and collaboration across teams.

Trainings help us to explore new ways to engage our teams and create a sense of belonging.

Inclusion is everyone's responsibility.

What's in it for you?

Enhanced Employee Experience

opportunity to better balance our work and our daily lives. According to a survey among our employees, most are also experiencing a greater level of productivity when working from home.

As in many other companies, a smaller group of colleagues have found the changes brought by the pandemic to be more challenging. They miss the social interaction with others, and to some extent lack a clear physical distinction between work and home life. Considering the long-term consequences that these new behaviours may have on the well-being has therefore been an important focus area for us during 2021.

In the spring of 2021, all TietoEvry colleagues were invited to co-create our future ways of working through a virtual Upgrading Working Life ideation platform and workshops. About 11,000 employees across the world participated, submitting more than 43,000 ideas and comments. According to the results, most of our employees stated that they prefer coming to the office 1–2 days per week, but preferences in ways of working differed.

The inputs received in the ideation were used for the creation of the Hybrid Working Guidelines launched in September. For us at TietoEvry, the new normal needs to be flexible enough to fit our different needs, hence our future way of working is hybrid – a combination of working remotely and from the office. We trust our employees to judge how to work, balancing global and local regulations with the needs and wishes of customers, their team – and carefully considering the well-being, development and productivity of each individual.

As difficult as the past years have been for many people and businesses, we are hopeful that the pandemic has also had positive effects in terms of work-life balance. Our hybrid way of working aims to enable even greater flexibility, proximity to customers, and less business traveling. We welcome any long-lasting impacts on sustainability, as we also need to mitigate the effects of climate change.

Personal and professional growth is highly valued among our employees, and it strengthens engagement and motivation across the whole organization. This is why in 2021 we launched our new development and performance management framework, MyGrowth.

The framework was created to drive personal and professional growth through dynamic goal setting, continuous feedback, and frequent development conversations with one's closest manager about wellbeing, the employee experience, challenges and achievements. The process puts the employee in the driver's seat. This means that everyone should take responsibility for their development and actively invite their manager for check-in sessions throughout the year. Training needs are also discussed and agreed upon during the MyGrowth conversation. To ensure skills development, engagement at work, and to address any specific needs, we at TietoEvry believe that continuous dialogue is key. The MyGrowth conversation covers the needs of those starting with us directly from university, as much as it does for those entering into retirement. It is to ensure that our employees' needs are captured and followed up.

## The Culture Code

After 2020, the year of integration, 2021 has been a year of building on the fundamentals for our future success. Creating a common company culture has been highly prioritized.

An important step in the integration phase was to create our own culture code to understand, manage and align cultural factors across the company. TietoEvry's Culture Code defines our cultural guidelines and represents what the company stands for. Our Culture Code comprises four principles that describe the code in practice:

- **Customer Driven:**  
We put the customer at the center of everything we do.
- **Achieving Together:**  
We purposefully collaborate to achieve the right outcomes.
- **Keep Learning:**  
We continuously grow, aiming to be world class.
- **Always Genuine:**  
We build trust by being good role models.

The company culture sets the tone and affects every aspect of our business and the interaction with our customers. Going forward, the purpose is to enable our employees to continuously develop and sustain these values together.

## The culture code

### Customer Driven

- We put the customer at the centre of everything we do.
- I am passionate about understanding our customers' business and making an impact.
- I continuously explore how we can bring value to our customers to make them successful.
- I take pride in creating high-quality solutions for our customers and keeping our promises.

### Achieving Together

- We purposefully collaborate to achieve the right outcomes.
- I am proactive and take accountability for my team's goals.
- I understand that success will only happen through the collaboration of diverse teams.
- I always involve and inspire colleagues and customers with a passion for making a difference.

### Keep Learning

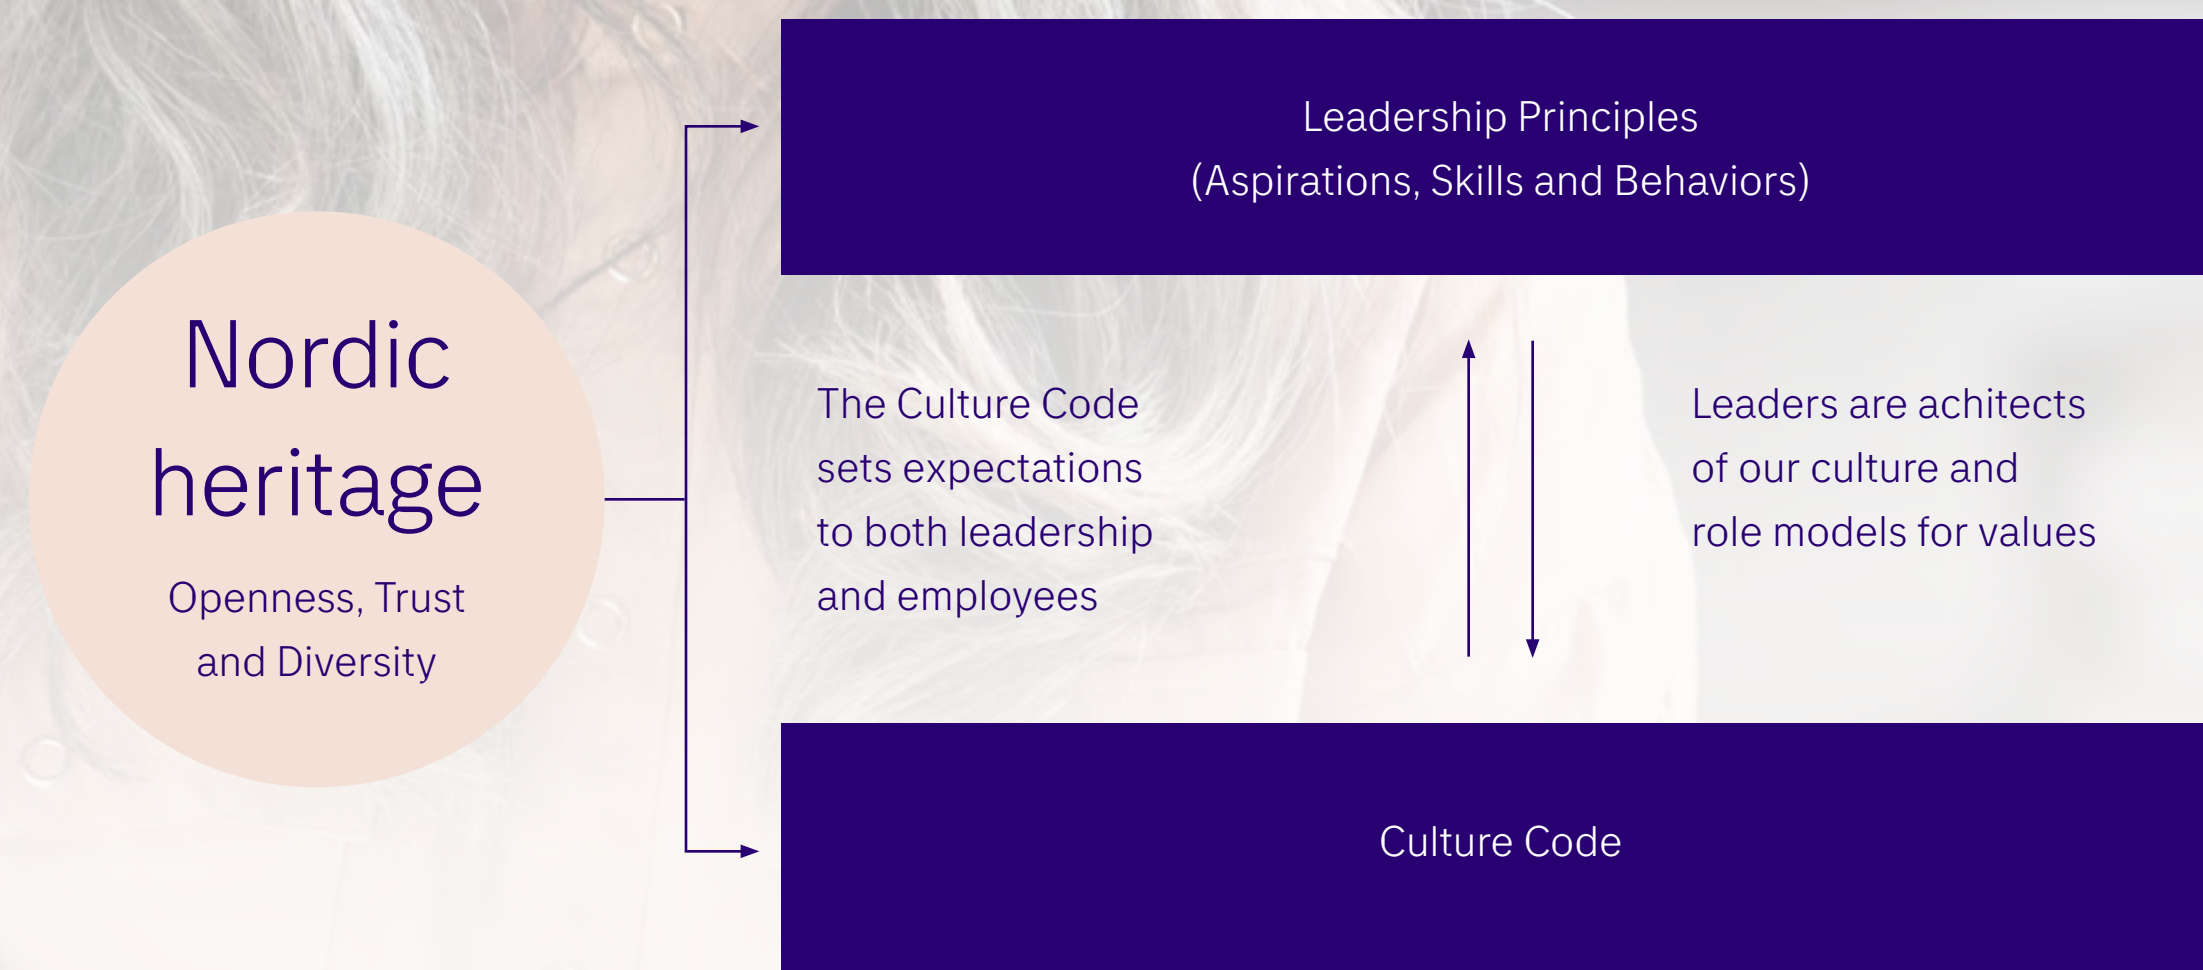

- We continuously grow, aiming to be world class.
- I strive to develop my skills and stay curious and relevant.
- I actively challenge the way we work and strive for continuous development.
- I dare to share my opinions and ideas, and learn from mistakes.

### Always Genuine

- We build trust by being good role models.
- I am always open-minded, strive for inclusion and embrace different perspectives.
- I have integrity and show respect and care for others.
- I am honest and transparent in everything I do.

## Re-enforcing Tietoevry identity and culture with leaders as role models

## Results from OurVoice engagement survey

To continue improving employee engagement within Tietoevry, we need to listen to and act upon the feedback from our employees. The OurVoice engagement survey helps us to measure and gain insight into what matters to our employees, and what to improve. With OurVoice, we aim to ensure a continuous dialogue, bringing the employee perspective and voice to the development of the company. The survey is run three times a year and all employees are invited to contribute.

Our measurement for employee engagement is the Tietoevry Engagement Index, where the result was 78/100 for 2021. This is an increase from the 2020 result of 76/100, indicating that we are improving on matters important for our employees despite remote working during the pandemic. The scores in the category for understanding our direction as a company and what we are trying to achieve have improved, thanks to the strategy launch and related communications from October 2021 onwards. Other categories that have improved are opportunities for professional growth, feeling respected and valued by a manager, and how clearly employees see how their work contributes to achieving our company's overall goals.

In addition to the overall scores, we received an average of almost 5,000 individual written comments per survey, which with AI-driven semantic analysis give us further insights on areas to improve. An engagement survey only has value if it is backed up by a process that facilitates acting on the insights. Managers are therefore equipped with tools for how to interpret the results, run workshops, create involvement and engage with their teams remotely.

## Leadership aspirations

Great leaders drive engagement in all organizations. This is why we define aspirations for leadership and align these aspirations with our ambitions to build a great company that enables people to grow and deliver value to our customers.

Our three leadership aspirations are:

1. **Build the future:**
  - Ensure clarity of vision and inspire ourselves to shape customer agendas
  - Be an awesome place to work
2. **Lead performance:**
  - Focus on things that matter today and pursue the right outcomes
  - Empower
  - Be adaptive
3. **Role model for values:**
  - Be authentic, always
  - Embrace diversity
  - Care for those around you

Our leadership aspirations are further supported by defined leadership skills and expected leadership behaviours. These act as a foundation both for leadership selection and for the development activities of leaders in the company. Clear aspirations are aimed at increasing employee engagement through clarity on what to expect from leaders, bringing value for customers through purposeful collaboration, and accelerating the growth of both our people and our company.

## Looking forward

The OurVoice engagement survey is a key tool for us to better understand the needs of our employees. The results help us act upon signals received. OurVoice is our navigation map, while MyGrowth, our Culture Code, and our Leadership principles are the tools that we will use as key ingredients for initiatives to make sure we all work in the same direction. Going forward, we will further improve the process of utilizing the insights gained in the survey in order to facilitate continuous dialogue and development across the entire organization, taking into consideration our newly established specialized businesses and their distinct focus, needs and ambitions.

In 2022, we will continue implementing the Culture Code and Leadership aspirations as part of our daily activities.

# Building a brighter future through our societal engagements

At TietoEVRY we believe we can create long-lasting value by engaging with partners that develop societies, while at the same time supporting our business strategy, values and sustainability goals.

We believe the future lies in the youth of today and that technology is shaping this future. This is why we invest in young people and help children and youth in less fortunate circumstances in some of our operating countries to advance in their lives and avoid exclusion. We are also continuing to focus on improving digital equality in society by strengthening digital competencies and skills among disadvantaged groups.

In 2021 we collaborated with:

## The Children and Youth Foundation

The Children and Youth Foundation in Finland supports young people in achieving their dreams by organizing workshops for discussion about the skills needed in future working life. The operations of the Finnish Children and Youth Foundation focus on building good self-esteem, strong social skills, and the courage to act and try out different things. Our latest joint initiative is the Polite Type (see more on this below/on page 058).

## Friends

The Swedish organization Friends has a vision of achieving zero victims of bullying. Every day, Friends visits schools, pre-schools and sports clubs to provide training and develop methods for preventing bullying and discrimination. TietoEVRY and Friends collaborated by organizing a series

of workshops in Swedish high schools during the spring of 2021. In these workshops our Polite Type anti-cyberbullying initiative was used as part of the discussion. Students had the opportunity to discuss online culture, the importance of language, and how a single word can have serious consequences.

### Startup Refugees

Startup Refugees is an organization supporting newcomers in starting businesses and integrating into Finnish society. We have been collaborating with the organization for many years, offering asylum seekers, refugees and immigrants support in strengthening the digital competencies needed when entering the Finnish labour market. In 2021, we worked with Startup Refugees to enhance their own CV tool, "Match". The tool is used to connect newcomers looking for a job with companies looking for employees.

### Press

Together with Press – Save The Children's youth organization in Norway – we have conducted workshops with children and youth across the country focusing on responsible online behaviour as part of our The Polite Type initiative. From the workshops we prepared a report that summarizes all the input from the kids, alongside Press's recommended actions. We feel adults must take children seriously and listen to what actions the children themselves believe can help. All children deserve a safe upbringing, both in the physical and digital worlds.

### Identity Foundation

This charitable trust works with socio-economically challenged children in the city of Pune in India. We have supported Identity Foundation's Mobile Learning and Infotainment Center (MLIC) buses since 2007. In the two mobile-learning buses, children can receive literacy and life-skills education. The MLICs also serve as information facilities by giving children access to positive entertainment and useful information.

### Lila Poonawalla Foundation

The Lila Poonawalla Foundation in India is an educational trust with a vision of empowering Indian women. The foundation supports academically outstanding and financially challenged girls with scholarships that allow them to pursue higher education. Our long partnership with the Lila Poonawalla Foundation goes beyond financial support for the girls' education. We also engage with the foundation through employee volunteering, mentoring by leaders, providing industry exposure, and supporting employment opportunities.

### In addition, we collaborate with:

**UTTAM** in India: A community-based mutual model providing micro-insurance to the poor.

**NASSCOM** Foundation Program – Tech for Good in India: A volunteering program through which we offer technology mentorship and grants to social innovators.

**EDUCAIT**: A non-profit registered trust in India bringing education to underprivileged children.

We believe the future lies in the youth of today and that technology is shaping the future.

## Polite Type – taking a stand against cyber bullying

During autumn 2020, we launched the Polite Type initiative against online hate speech, aiming at more inclusive online behaviour. The initiative was started in Finland and Sweden, and it was further expanded to Norway and Austria in 2021.

Bullying is especially damaging to children and people at a young age. We want bullies to rethink the words they use and the meaning behind them. This is why we created the Polite Type, an open-source font that rewrites hurtful words and replaces them with more inclusive ones. Inclusion, diversity and the utmost respect for each individual are at the core of our values at Tietoevry. The Polite Type supports our vision, but more importantly it hopefully continues to inspire all audiences and stakeholders to consider how bullying could be tackled.

The project was initiated in Finland together with our long-term partner, the Children & Youth Foundation, and was expanded to Sweden where the initiative is supported by the Friends organization. In 2021 the campaign took off in Norway, as we announced we would initiate discussions in Norwegian schools too in collaboration with Press; a Norwegian NGO and a Save the Children affiliate. During spring, workshops across the country were organized where children were able to suggest actions that schools, parents and the Norwegian government can take to build a safer digital environment for children in Norway.

In addition to the Nordic countries, the font has reached a large worldwide audience and raised discussions on this important topic through social-media channels and other media outlets.

The Polite Type has received more than 15 nominations and awards globally for its efforts against online bullying. These many prestigious recognitions prove that simple ideas are often the best. The Polite Type also serves as a clear example of how the innovative use of technology can help us to tackle societal challenges.

# CASE

## New HIT team to boost our sustainability goals

TietoEVRY has set ambitious sustainability goals for the years ahead. Our new HIT team helps to identify and develop ways we can reach those together with our customers.

Sustainability always starts at home. Every person or company is responsible for getting their own backyard in order first. That's why we've put a lot of effort into developing our energy and circular-economy practises, diversity and inclusion policies, sourcing activities, and more.

But as an IT company, there's even more we can do in the area of sustainability. With the knowledge and the tools we work with every day, we have the power to help our customers improve their sustainability performance. This is also where TietoEVRY can make its biggest impact on sustainable business practises.

During early 2021, we formed a cross-functional sustainability HIT team tasked with developing this opportunity. The team is led by Senior Sustainability Manager **Ulrika Lagerqvist von Unge**.

"We saw that many of our customers are looking for new co-operations and solutions to fuel and advance their sustainability efforts, so we focused more closely at how we can help," says Lagerqvist von Unge. "We reached out to some of TietoEVRY's business leaders and asked them to nominate people within our different delivery organisations who could support us in realizing these

impact opportunities for our customers. This led to the establishment of what we now call the sustainability HIT team."

The HIT team comprises eight employees, with plans to add additional members in the years to come. The team kicked off its work in 2021 by an inventory of ongoing sustainability-related projects and partnerships TietoEVRY was involved in – and an assessment on how these could be scaled or repeated. A lot of work has also been done on building awareness – both inside and outside the company.

"TietoEVRY employees have a lot of knowledge about tech and business, but they may not always see how it connects with our sustainability agenda," says Lagerqvist von Unge. "So part of our job is to spread that knowledge and join customer teams in both internal and external dialogues on possibilities that we have at hand."

TietoEVRY Lead Business Consultant **Peter Mankenskiöld** is an industry and application advisor who is part of the HIT team too. He brings insights from the B2C world, specifically from working with public-sector customers and having been involved in sustainability initiatives since 2008.

"A lot about sustainability really comes down to information management," says Mankenskiöld. "When you have good control over your data, you can use it for different purposes. In this way sustainability KPIs can be a steering mechanism to provide a wider perspective on making business decisions."

"One of the HIT team's crucial roles is that we can collect all the relevant sustainability activities and initiatives from across TietoEVRY, so the customer can see that we have a palette of different services. This helps us with cross selling. As you get to know a customer better, you can offer them lots of different solutions from our portfolio," he says.

# Ethical conduct

In a time where technology makes societies thrive and businesses run, ethical considerations are more important than ever. Fostering ethical values and work practices is a vital part of our responsibility to our employees, our customers and to all our stakeholders. Implementing and maintaining responsible business practices across our business operations is how we build and maintain trust.

We are moving towards a world that runs on technology and is fueled by hyperconnected data – regardless of industry, geography, or function within our customers. When utilizing the data from individuals and organizations, privacy and security considerations grow increasingly important and a strong ethical foundation is required. Therefore, we actively develop our own ways of working in a transparent manner, and also take part in societal forums for an impact that is more far-reaching.

# Business ethics and anti-corruption

Ethical business conduct is a must at Tietoevry. We have zero tolerance for any unethical behaviour, and we view the implementation and continuous monitoring of ethical guidelines and work practices as vital parts of the company's responsibility. Our ethical guidelines are outlined in our company-wide Code of Conduct and related rules, which apply to all employees and subcontractors. In addition to our own policies, we always adhere to local legislation in our operating countries.

## How we work

Our key policies in the area of business ethics and anti-corruption are the Tietoevry Code of Conduct, the Supplier Code of Conduct, and the Whistleblowing Rule. In addition, in 2021 we updated our Know Your Counterparty Rule and our Anti-money Laundering Rule. Our business ethics efforts are led by the Audit and Risk Committee (ARC) of the Board of Directors, together with the Whistleblowing Unit within

our Legal function's Corporate Governance and Compliance team, and our Sustainability Steering Group. The work is driven in close cooperation with our Risk Management and Internal Audit teams.

The Corporate Governance and Compliance Team follows up on our policies. This means providing updates and suggesting continuous improvements, as well as ensuring awareness around the policies through training and communication. The team also follows up on concerns and questions raised through our whistleblowing channels. The Audit and Risk Committee of the Board of Directors is provided with bi-annual reports on our compliance work, as well as on the number and topics of whistleblowing cases processed by the Whistleblowing Unit during the previous six months. The Audit and Risk Committee is immediately informed in case any material compliance incidents occur.

In addition to our GRI Standards disclosures we have set an additional target of responding to a whistleblowing

Income taxes payable are based on the taxable results, against which confirmed tax losses have been utilized.

notification within four business days of receiving it, a target we reached in 2021. We believe this metric contributes to the effective processing of all whistleblowing notifications received, as well as ensures swift communication towards the whistleblower about the status of the case. The whistleblowing scheme allows anonymous and confidential reporting to the Whistleblowing Unit about violations of the Code of Conduct and related rules, or any unethical behaviour. The process is designed to ensure that persons reporting violations will not be subject to any retaliation. Failure to act in compliance with the Code of Conduct will result in appropriate disciplinary actions.

To identify and validate the risks of unethical behaviour, our Group Internal Audit function conducts audits to assess the effectiveness of governance, risk management and compliance controls. The aim is to ensure the company complies with the relevant laws and regulations in all operations, as well as with internal policies and rules. The Group Internal Audit function reports audit conclusions with auditor opinions to the Audit and Risk Committee. The audit plan is reviewed on a quarterly basis in the Audit and Risk Committee, where adjustments may be made based on changes in the risk landscape.

Our ambition is that all employees know our Code of Conduct and proactively foster an ethical culture across our operations. In addition to accepting the Code of Conduct when joining the company, employees are expected to refresh their knowledge on the content of the Code every year by taking the Code of Conduct e-learning. Our Human Resources function and the Group Compliance Officer further support employees in acting in accordance with our Code of Conduct throughout the employee lifecycle. This is done through awareness sessions that are organized during

onboarding, for example, as well as through role-based training sessions when becoming a manager.

### TietoEVRY Tax Principles

We are committed to operating in a responsible way and with high ethics in all our activities. Our firm aim is to comply with all local tax legislation and other regulations in all jurisdictions. This means that we fulfil all our reporting requirements and pay all legally-imposed direct, indirect and other taxes in those countries where TietoEVRY has operations.

Our objective is to avoid uncertain tax positions. In case of uncertainty, all tax positions taken should be supportable and likely to be upheld by relevant tax authorities. Furthermore, we shall always operate with full co-operation with the authorities, and aim to disclose all information that is needed for determining tax consequences. TietoEVRY Oyj has been in a co-operative compliance program with the Finnish Tax Authorities since 2017, with the aim of open co-operation and focus on preliminary discussions to ensure correct taxation. TietoEVRY operates in accordance with an approved Tax Policy, and the Group Tax team reports on the status of Group tax issues biannually to the Audit and Risk Committee.

### Progress

Our focus during the year has been on adapting to the EU Whistleblowing Directive and third-party screening activities. In addition, we have:

- Finalized the harmonisation of our policies and processes after the merger of Tieto and EVRY
- Conducted Code of Conduct training for managers before offering the training for all employees

- Continued learning sessions covering the Code of Conduct, security and GDPR, and organised mandatory training for all our employees
- Updated our Know Your Counterparty Rule and our Anti-money Laundering Rule Carried out global communication and awareness campaigns for our Tietoevry-essentials training modules, including our security, GDPR, environmental management, and Code of Conduct e-learnings
- Carried out sustainability awareness training – with components on business ethics – as part of Tietoevry’s ‘Take off’ days for new employees in the Nordic region
- Conducted training for customer teams about our tools and policies

Completion of our Code of Conduct e-learning is a mandatory goal in all employees’ scorecards and is formally evaluated as part of each employee’s annual-review process. We aim for 90% e-learning coverage each year. By the end of 2021, 93% of employees had carried out the Code of Conduct training which is an improvement compared to 91% completion in 2020. This year we have widened the scope and in addition to Tietoevry employees we are also including the completion rate of the Code of Conduct e-learning of employees at Infopulse and EVRY India.

As part of Tietoevry’s zero-tolerance approach to any unethical behaviour, the company has a goal that all employees should not only know the Code of Conduct, but also know how to report potential breaches. We also conduct assessments of our operations with the aim of identifying any risk for corruption and fraud. In 2021, our operations in three countries – covering 17% of our business – were assessed for risks related to fraud or corruption. No significant risks were identified through this assessment.

However, there is one public legal case related to an old corruption incident, where a former Tieto employee was found guilty and convicted for bribing a public official in 2018 (reported in the Sustainability Report FY2018). The trial concerned the person as an individual, not former Tieto as a company. In December 2020, the case was transferred to a prosecutor who decided to press charges against former Tieto Latvia for accused lack of controls. Tietoevry denies the charges. The case is currently subject to court proceedings in the Riga District Court.

One suspected case of anti-trust was detected in 2021. In December 2021 Infopulse Ukraine, a Tietoevry subsidiary, was fined for alleged collusion in relation to one Ukrainian government tender in 2017. Tietoevry takes the situation very seriously and has initiated an independent investigation with an external auditor to clarify the events thoroughly.

Tietoevry has a zero tolerance for corruption and all unethical behaviour. We continue our efforts to prevent and detect any acts of corruption and unethical behaviour, however we cannot fully remove the risk of wilful criminal conduct of employees. The result suggests that our continuous work to increase ethical awareness and strengthen internal controls is reducing the risk of corruption.

Internally, whistleblowing escalations in 2021 generated 24 investigations in five different countries. These investigations included analysis of fraud, misuse of company assets, corruption, antitrust, conflict of interest and inappropriate behaviour of individuals including bullying, racism and harrassment. In 2021, four breaches of the Code of Conduct were confirmed. No incident of corruption was identified in 2021.

Tietoevry has a zero tolerance for any unethical behaviour.

## Looking ahead

Business ethics and anti-corruption will continue to be high priorities for TietoEVRY going forward. Accordingly, we will continue implementing our Sustainability 2023 game plan and continue to conduct targeted trainings on business ethics on areas that may involve a bigger risk for unethical conduct.

Some key activities for 2022 include an update of our Code of Conduct to ensure it supports our hybrid working model, a new and updated Code of Conduct e-learning, and the implementation and roll-out of these two. Outcomes from our corporate-wide human-rights impact assessment – which will be concluded in early 2022 – may also result in further activities related to business ethics.

From a corporate governance and compliance point of view, we will focus on awareness and training to strengthen our compliance culture, review our third-party management practices, and coordinate with other functions – including Internal Audit and Procurement – to drive continuous improvement. Further, we will follow up on the recently launched Know Your Counterparty Rule and our Anti-money Laundering Policy to ensure awareness and effectiveness.

# Cybersecurity and privacy

In an increasingly complex IT landscape, where both organizational and human interactions take place through connected IT services, the role of the trusted IT service provider is vital. Security and privacy need to be at the core of every service, product, and process delivery.

Our ability to build resilience in our services and provide assurance to our customers is essential for earning and maintaining their trust, and for protecting individuals and their right to security and privacy. We are continuously developing our processes and the security services we provide, with the aim of keeping information safe under all circumstances.

## How we work

We are committed to building security into any delivery, solution and relationship. The importance of securing a safe

and secure digital world is increasing as human interactions, and the world at large, becomes more data driven. Privacy and risk management, business continuity, security and privacy awareness, and well-functioning security services and response routines – all of these are important building blocks for establishing good cybersecurity resilience and meeting our stakeholders' expectations.

Our comprehensive approach to security and data privacy covers confidentiality, integrity, and the availability of IT services and data. Updated on an annual basis and endorsed by our CEO, the policies cover risk, information security and privacy actions, comprising the following:

- TietoEvry Code of Conduct
- TietoEvry Security Policy
- TietoEvry Privacy Policy
- TietoEvry Privacy Notice
- TietoEvry Risk Management Policy
- TietoEvry Business Continuity Management Policy

## Total number of substantiated complaints regarding breaches of customers' privacy and losses of customer data

Target 2023, %

Result 2021, %

We strive to keep information safe in all circumstances.

Roles and responsibilities are defined at group and business levels. The group level responsibility for security is managed by our Chief Security Officer. The Chief Risk Officer heads the central risk management function. Our Data Protection Officers ensure, in an independent manner, that the organization adheres to the laws protecting an individual's personal data.

The group level roles work in tight collaboration with our businesses. Security, Risk and Privacy Managers support the organization with both expert advice and hands-on assistance for security, risk and privacy topics. Our dedicated Cybersecurity Services unit provides cybersecurity services and solutions to our external customers, as well as for the protection of TietoEvry itself. The Computer Incident Response Team handles security incidents in co-operation and collaboration with internal and external stakeholders, depending on the nature of the incident. Our Governance, Risk Management and Compliance platform supports the daily work of our security organization in areas such as risk management, security incident management, privacy risk assessments, and audit follow up.

Major Security Incidents are managed and resolved according to our Major Incidents and Escalation Process, designed to restore and protect business-critical IT services as fast as possible, and minimize the impact on our customers and their end users. Should a crisis arise, the well-trained Crisis Management Organization manages the crisis in accordance with our Crisis Management Process, ensuring that information is shared with all key stakeholders during the resolution process.

To ensure our compliance and security, we perform regular internal and external audits of our information-security

and data-privacy processes. Our Information Security Management System is audited and certified by an external accreditation service. Annual ISO 27001, ISAE 3402 and ISAE 3000 audits are conducted by external parties on our data centers, selected business units, and customer-specific infrastructure services. These audits describe and document how adequate internal controls for information security, privacy and financial reporting are implemented and maintained. Audit results are followed up by both the TietoEvry Group Leadership Team and by the Audit and Risk Committee within our Board of Directors.

## Progress

During 2021 we strengthened the TietoEvry Risk, Security and Privacy Governance Processes to ensure that we comply with the security and privacy levels that our stakeholders expect.

We initiated several internal projects to raise awareness of and resilience against the latest cybersecurity threats, and to ensure a good security baseline for our services. Online training courses, e-mail phishing simulations, conferences and training programs are all examples of our efforts to raise internal awareness of cybersecurity. All employees are expected to perform mandatory annual training on security and GDPR to maintain knowledge of our Security Policy, information- and IT-security, privacy, physical security, and travel security. The mandatory training covering our Code of Conduct includes modules on security and data-privacy topics, ensuring that our employees maintain a strong understanding of these. In 2021, 95% of our employees completed the security training, and 94% completed the GDPR training, a solid increase of completion from last year. We have thereby met our goal of 90% completion rate of the two trainings.

TietoEVRY is in regular contact with relevant external stakeholders, including authorities, regulators, and various security and privacy forums. By participating in these forums, we gain understanding of and can help to influence new regulations, share experiences and information with regulatory bodies and our peers, and build relationships with security and privacy experts working for other companies.

In 2021, we received zero substantiated complaints regarding breaches of our customers' privacy and losses of customer data, thereby meeting our annual target. Nevertheless, we see that cybersecurity related threats are constantly increasing. As with many other global companies, TietoEVRY was also affected by a few critical issues during the year 2021.

One example of these kinds of critical issues took place in July 2021, as a ransomware attack made use of a vulnerability in a widely-used IT system provided by a third-party. The ransomware encrypted servers and shared folders, affecting hundreds of different businesses worldwide. The event was widely considered to be the largest criminal ransomware attack in history. A number of TietoEVRY's small- and mid-sized customers in Sweden were affected, and we worked closely with them – following our Major Incident and Escalation Process – to restore their data and business-critical services from the backups after the attack. No loss of customer data was identified during the restoration process.

A good security profile – i.e. up-to-date systems, backups, logs and multi-factor authentication – is a must when fighting against cyber attacks. At TietoEVRY, we started a Cyber Security Uplift process in 2021 to improve our protection against ransomware attacks, and the work continues going forward. Good teamwork and transparent communication, both internally and towards our customers, are crucial when responding to these kinds of attacks and incidents.

## Looking ahead

We are committed to continuing to be a trusted service provider of secure IT solutions, by keeping a close dialogue with key stakeholders and guiding customers in the increasingly complex, hyperconnected IT landscape. We are committed to embedding security and privacy in all our service offerings, deliveries and processes – ensuring data subjects' rights are always considered – and always adhering to relevant security and privacy regulations.

To ensure a security-as-a-mindset internally, we will continue to offer guidance and training to employees, maintaining a thorough foundation of competence across our organization. We continue to measure our cybersecurity maturity against the evolving cybersecurity threat landscape, maturing regulatory requirements, annual audit findings, and the development of our customers' business needs.

The Schrems II decision from July 2020 demands stricter requirements on transferring personal data to countries outside the EU/EEA, due to insufficient privacy protections in several countries. Therefore, TietoEVRY has established a corporate program relating to the Schrems II EU decision to ensure we demonstrate Schrems II compliance as a processor and controller. To ensure and sustain long-term compliance, the program will also establish an updated personal-data-transfer governance model.

To continue to meet our stakeholders' expectations and comply with legislation, we will maintain an active dialogue on cybersecurity and privacy issues with our stakeholders – both internally, with customers, and on a societal level.

# Human rights

We strive to support and respect human rights across our operations; from the way we shape our internal environment, to how we manage our supply chain, foster our relationships, and how our products and solutions are being used. As a company in the technology industry, we have an opportunity to make a positive impact on human rights through smart and equal technical solutions, and the use of data. We understand that risks related to human rights may occur anywhere in our value chain. Therefore, we need to constantly identify, keep track of, and mitigate any possible risks.

## Setting a baseline

Human rights risks can occur in our own internal environment, in our operations, in indirect business activities within our supply chain, and in delivery and use of the products. At TietoEvry we are convinced that

respect for human rights must be an integral part of all activities and relationships. That is why we aim to integrate human rights considerations across our value chain and into all elements of our work. The UN Guiding Principles on Business and Human Rights and the Universal Declaration of Human Rights and its core conventions together create the foundation for our work.

The ethical anchor of our organization – the Code of Conduct – rests upon, among other international guidelines, the International Bill of Human Rights and the principles concerning fundamental rights as set out in the International Labour Organization's Declaration on Fundamental Principles and Rights at Work. Fundamental human rights shall be known, understood, respected and applied equally to all employees – whether temporarily or permanently hired or contracted. Employees sign the Code of Conduct when joining the company, and all employees are expected to complete the mandatory Code of Conduct e-learning annually. The training contains, among other human

## Human Rights Impact Assessment

### Target

Conduct a formal Human Rights Impact Assessment

### Result 2021

Corporate-wide Human Rights Impact Assessment initiated

rights-related topics, sections on how we at TietoEvry ensure respect for human rights.

TietoEvry safeguards the privacy rights of individuals by constantly maintaining the general overview of our processing of personal data. The sustainability function oversees our global Code of Conduct, and is responsible for ensuring that the code is known throughout the organization and that employees are trained on its content. Read more about our relevant policies, processes and outcomes under [diversity & inclusion](#), [employee experience](#), and [business ethics and anti-corruption](#).

Violations and complaints related to human rights – both current or past – are encouraged to be reported through our whistleblowing system, which comprises both internal channels as well as an external anonymous whistleblowing channel. All requests are tracked with the aim of responding to the violations and complaints within 30 days. Whistleblowers should receive a receipt of the notification within four business days. We encourage a speak-up culture and prohibit any retaliation against anyone who reports concerns and violations in good faith.

Procurement is responsible for ensuring that our suppliers and partners respect human rights in their operations and that they in turn require the same from their suppliers and partners. Our Supplier Code of Conduct covers topics including non-discrimination and equal opportunities, physical abuse, forced labour, and child labour, freedom of association and collective bargaining, pay and benefits, and health and safety. Compliance is followed up through screening, self-assessments, management review, trainings as well as on-site-audits. Read more on our efforts to respect human rights in our supply chain under Responsible Sourcing.

## Individuals' rights in service development

Transparency and respect for individuals' rights are part of our Privacy Policy. TietoEvry supports individuals' rights by following Privacy by Design principles in our product development process. By doing so we are enabling customers to fulfil – through our built-in product features – their needs to comply with individuals' human rights. In cases where this is not possible or feasible, we are committed to providing the necessary assistance to manually process such requests from individuals in close cooperation with our customers.

We safeguard the privacy rights of individuals in our own operations through an internal process for managing requests from individuals to exercise their privacy rights, and by maintaining an overview of personal data processing in the company. To further secure the freedom and rights of individuals, we ensure the embedding of privacy obligations in our core internal processes. This framework to ensure the fulfilment of privacy obligations, principles and individuals rights is found in core processes such as product development, sales, and service delivery.

We are convinced that technology can benefit and support human rights if applied and used in a proper manner. However, we also acknowledge the risks related to the development and application of technologies. As a large digital services company with Nordic heritage and values, we recognise that we have a responsibility to protect human rights when delivering digital solutions. Therefore, we have developed a system for due diligence to assess our ethical impact and any unforeseen consequences in software development. The model enables our development and delivery teams to uncover and mitigate any ethical risks in software developed.

Integrated in our risk management system is also the category of people risks. This concerns the framework for employees, project leaders and business leaders to report human rights risks related to deliveries, which are then followed up on according to our risk management process.

## Progress

During 2021 we initiated a corporate-wide human rights impact assessment covering our value chain. The aim is to identify the most prominent human rights risks to be able to improve risk mitigation through policies, processes, training sessions and awareness initiatives. The project will be finalized during spring 2022. The results will give us a better understanding of the risks related to human rights and serve as the foundation for the continued work, ensuring human rights are respected in all circumstances. This will be the starting point for efforts to improve management, processes and policies where needed to create a more holistic system for human rights risk management.

## Looking ahead

With human rights high on the agenda going forward, we will continue to further consolidate and develop our processes for managing this area across our organization and supply chain. We also recognize the need to continuously stay on top of the human rights risks that come along with the development of new innovative technologies.

As we are both a controller and a processor of personal data, we need to continue to consolidate and enhance the Individuals' Rights Requests management process to ensure that our services can fulfil these requests. We embed privacy in our offering development process, which ensures the protection of individual rights in our service development. We have also created a procedure at the Group level to assist with the Individuals' Rights Requests from our customers.

We can make a positive impact on human rights through smart technical solutions.

# Responsible sourcing

At Tietoevry we strive for sustainable development in all our operations and in our supply chain. We drive initiatives for higher standards and to increase the capabilities of our suppliers to uphold human rights, labour rights and fair conditions, health and safety legislation, business ethics as well as environmental practices.

Before any contractual commitment is made, each supplier is assessed for compliance with our policies. Through close collaboration with our suppliers and by making our requirements clear, we can support suppliers in applying sustainable practices that enable us deliver on our promise of creating value for our many stakeholders.

## How we work

Tietoevry's suppliers provide a wide range of solutions, products and services that are needed to deliver value to our customers and support our own operations. This includes hardware, software and IT consultants as well as services related to human resources, facility management, travel and many more. The main expenditure categories are hardware, software and IT consultants as part of customer deliveries and in support of our business organization.

Our group level Procurement function is driving the consolidation of our supplier base and the selection of preferred suppliers, with the aim of ensuring increased compliance with our standards, as well as mitigating supply chain risks. Our work is guided by the Tietoevry Supplier Code of Conduct, which includes a common set of ethical and business principles for our daily work with suppliers. The Supplier Code of Conduct is based on the

Target 2023, %

100

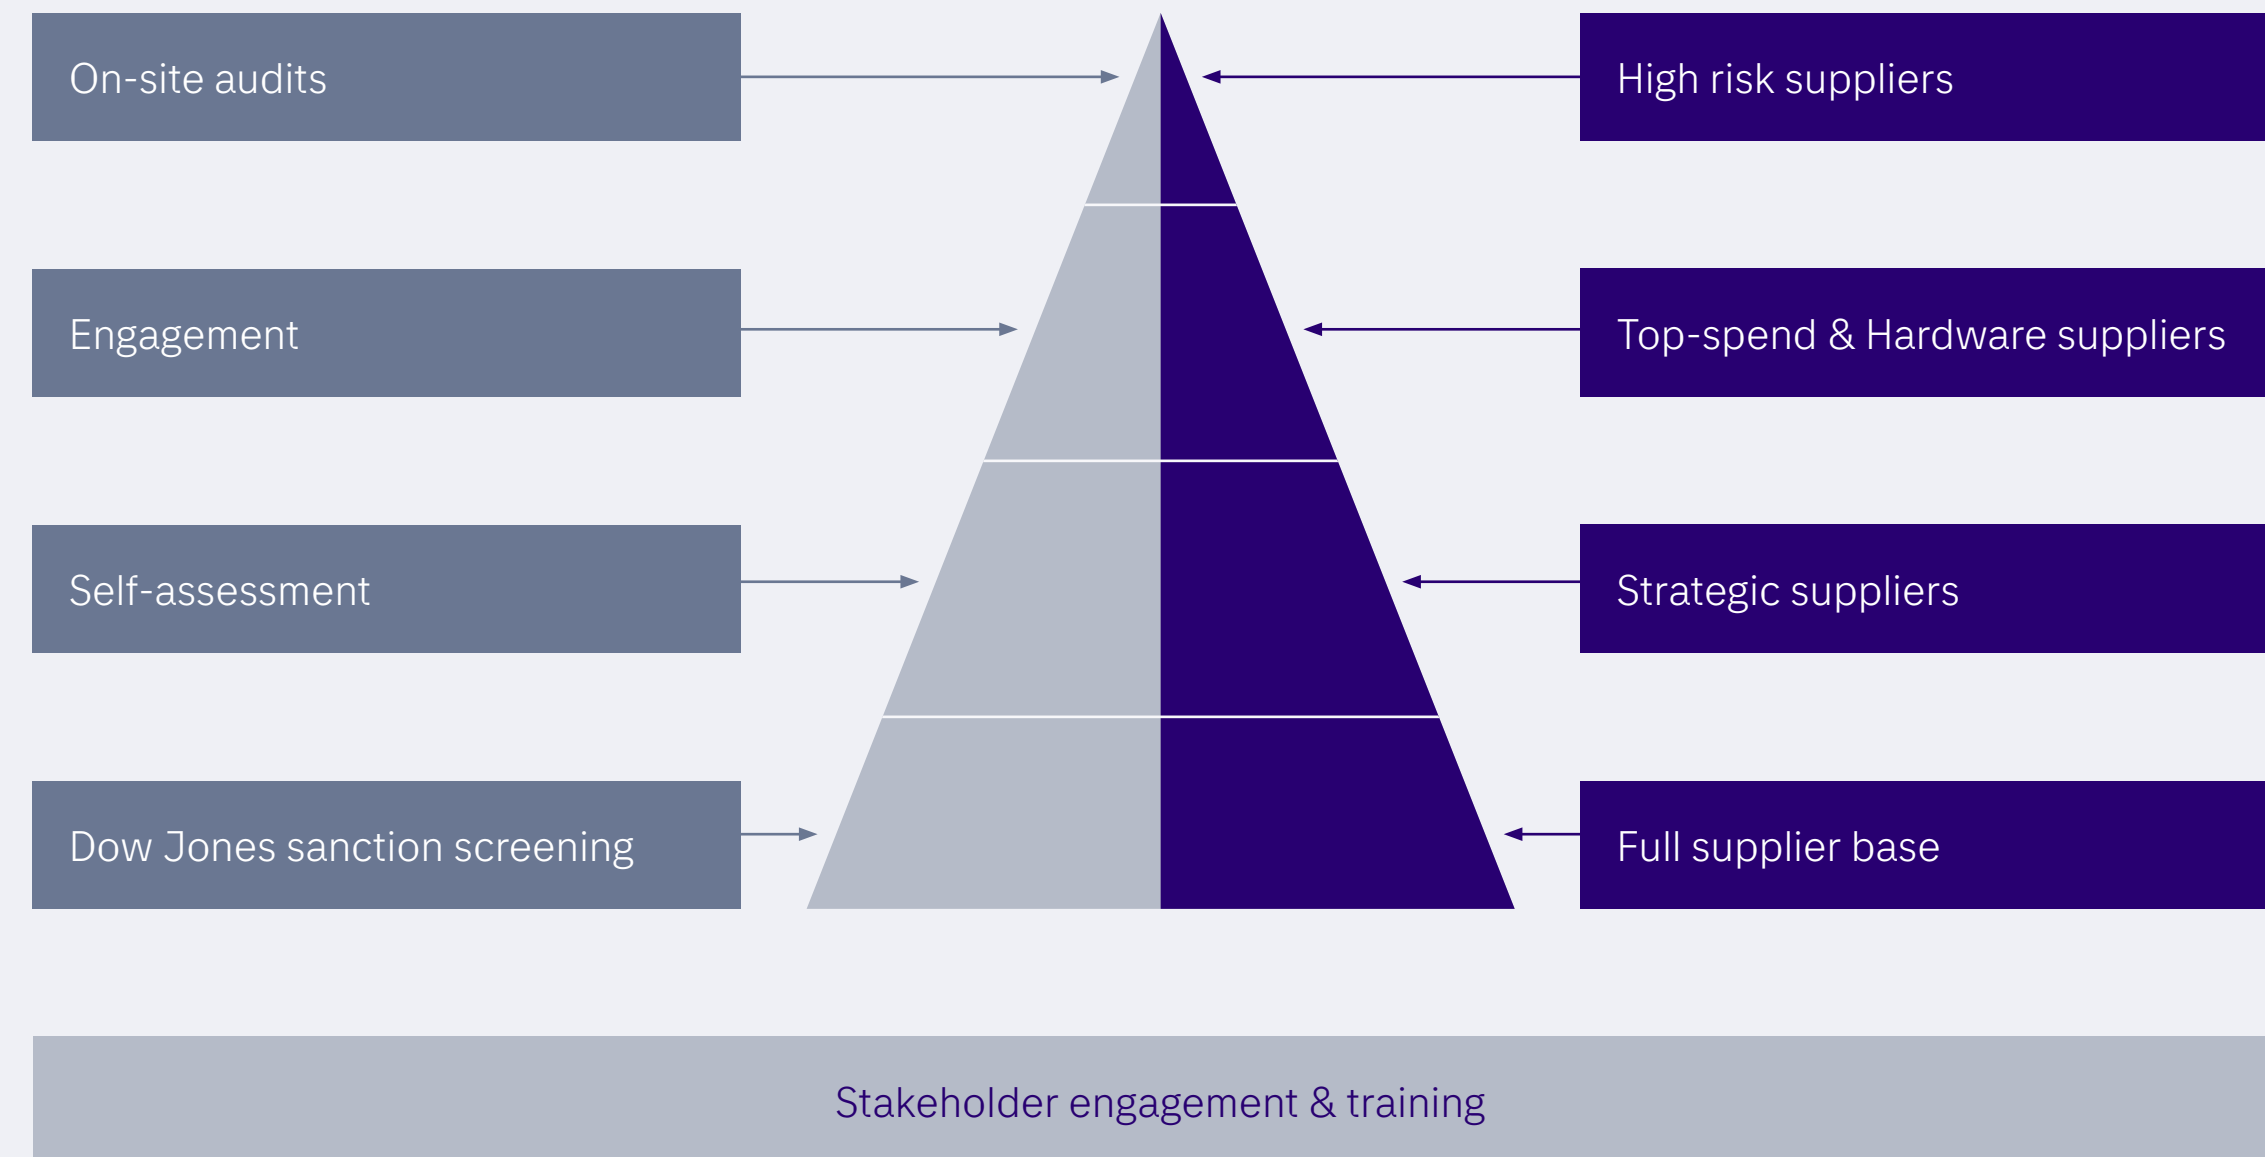

Result 2021, %

99

## TietoEVRY model for responsible sourcing

UN Global Compact, with principles for human rights, labour conditions, the environment and anti-corruption.

The Supplier Code of Conduct forms one part of the operative framework for the company's Sustainable Supply Chain programme. This programme handles supplier on-boarding prior to entering co-operation, and also includes sanction checks and checks related to compliance with different requirements such as our payment terms. A key goal of the programme for all new and renewed suppliers is to sign the Supplier Code of Conduct. Another aim of the programme is for suppliers in prioritized product categories and regions to conduct self-assessments.

We also utilise our risk review model to guide prioritized actions, such as management reviews, in relation to our suppliers. In previous years, we conducted regular on-site audits, but in 2021 these physical audits were not possible due to the global pandemic. We drive annual self-assessments and follow-ups with selected suppliers, with the focus on assessing the Code of Conduct implementation and mitigating risks. The overall ambition is to strengthen risk management and co-operation with our long-term key suppliers.

### Progress

Approximately 300 of our suppliers represent as much as 80% of the company's spending. The vast majority of purchases take place in the Nordic countries. Suppliers invoicing from Finland, Sweden or Norway represent around 90% of our total annual purchase volume.

We have also continued to:

- Review the sustainability management of selected suppliers (biggest by expenditure)
- Send self-assessments to selected suppliers
- Hold training sessions for selected suppliers
- Increase awareness through internal training programs within group Procurement
- Maintain a structured approach towards sourcing TCO-certified computers (or equivalent to TCO). In 2021, 93% of our procured computers were TCO-certified.\*
- Engage in dialogues with our two main hardware suppliers around conflict minerals to increase our knowledge and discuss about the potential risks and their severity level. No major findings regarding management and risk-detection processes were identified during the dialogues.
- Assessing suppliers at risk for right to freedom of association and collective bargaining
- Further develop KPIs for a Sustainable Supply Chain, in line with Science Based Targets
- Distribute a survey to selected suppliers who together represent the majority of our spend and CO<sub>2</sub> footprint in the supply chain. The survey serves the purpose of confirming if our high-spend suppliers have science based targets or an absolute target on greenhouse gas reduction. Based on the survey and analysis, 18% of the suppliers in scope have an absolute target on greenhouse gas reduction in 2021.

\* We buy the devices through a third party vendor and the amount constitutes close to 75% of the total volume of our devices.

During 2021, Tietoevry also continued the work of consolidating our locations and facilities – after the merger of Tieto and EVRY – to meet new needs and ways of working. This resulted in the closure of several smaller locations, mainly in Sweden and Norway. As a result of the divestment of our Oil & Gas business in 2021, we also divested a number of offices in countries outside the Nordic region, including Brazil, Canada, Malaysia, Netherlands, Russia, the UK and USA.

Our aim is that all external partners or sub-contractors, who regularly provide us with goods, service or technology are compliant with the minimum requirements stated in our Supplier Code of Conduct. Our Procurement function tracks all new and renewed supplier contracts to ensure we follow our standards and keep a high level of compliance. In 2021, we reached the level of 99% of supplier compliance while we keep our ambitions at 100%.

Just like in 2020, we conducted a desktop assessment aimed at identifying the geographical areas where our top-spend suppliers operate and assess risks related to the rights for workers to exercise freedom of association or collective bargaining. The scope of the assessment included the suppliers representing 50% of Tietoevry's total spend. The assessment shows that a vast majority (94%) of Tietoevry's top-spend suppliers are based in countries where the risk is low. The majority of the suppliers are service providers with low risk from an industry perspective as well.

Each year, our Sustainability and Procurement functions agree on supplier related activities and annual targets. Procurement managers working closely with the business are responsible for making sure that our Procurement

Policy is followed, and that the Supplier Code of Conduct is accepted and confirmed by all suppliers. Discussions on ethical and environmental topics are a regular part of procurement practices. In our annual performance follow-ups within the sustainable supply chain arena we monitor progress and confirm that we are on track.

## The future

We continue further improving sustainability in our supply chain through activities in the Sustainable Supply Chain programme, including:

- Setting ambitions and actions for greenhouse gas reduction targets – including Science based targets – with commitments that also cover our suppliers
- Investigating the possibilities to conduct virtual audits when on-site audits cannot be performed in a safe way, as during the pandemic
- Automating and simplifying the supplier self-assessment
- Continuing to drive supplier management reviews with key suppliers
- Further implementing our Supplier Code of Conduct including training of our suppliers
- Improving collaboration with our main partners and important stakeholders

Throughout the year 2022, we will continue to evaluate the measures and risks in our supply chain and fine tune our approach towards suppliers in different sectors and markets. Results and findings from our group-wide human rights impact assessment, to be concluded in 2022, will further guide the improvement measures going forward. We are constantly working towards improving our own performance together with our suppliers.

# CASE

## Tietoevry Sustainability Data Hub: real-time data for real-time action

Our new Sustainability Data Hub helps customers monitor and report on their sustainability performance in real time. Swedish alcohol retailer Systembolaget is now using the hub to track a common set of metrics for its strategic IT suppliers.

Many companies now set sustainability targets and monitor their performance towards achieving them. This is typically a quarterly or annual exercise that involves gathering, analysing and reporting historical data.

The problem with this approach is that there is often a time lag between intent and impact. When a company only assesses its sustainability performance with historical data, then it may not spot early opportunities for course correction when targets are not being met.

This is the challenge Tietoevry is now addressing through our new Sustainability Data Hub – a methodology that shows our customers their sustainability performance almost.

### Better data, smarter decisions

“A lot of companies are struggling with getting access to quality sustainability data. They may spend a lot of time collecting it, but by the time it is done the data is often outdated,” says Tietoevry Senior Sustainability Manager, **Ulrika Lagerqvist von Unge**.

“We saw this is a problem for companies wanting to set ambitious targets. If you can’t track progress, it’s tough to build a good roadmap. So our technology and business consultants came together to create the Sustainability Data Hub,” she says.

Taking the hub into use starts with a strategic scoping exercise where Tietoevry works with a customer to identify the relevant parameters, metrics and data-collection intervals. Then comes a technical phase that focuses on automating the data collection. This is followed by visualising the collected data against the agreed metrics and targets. Analytics and scenario modelling can be added too.

“In addition to reducing the time spent on manual data collection and improving decision-making, the hub is also aimed at easing compliance with both current and upcoming sustainability legislation and frameworks. It enables more frequent sustainability reporting too, meeting stakeholder demands for improved transparency,” says Lagerqvist von Unge.

## Building a culture of sustainability

One of Tietoevry's early customers for the hub is Sweden's state-run alcohol retailer Systembolaget. The project began with Tietoevry illustrating its own carbon footprint for the IT services it provides to the company. But it soon expanded to include Systembolaget's eight other strategic IT suppliers too.

Now the Swedish retailer is using the hub as a way to build a common culture of sustainability among these suppliers, setting up carbon-emission KPIs in three areas: servers, office hardware, and consultancy services.

Systembolaget's IT Strategist **Harald Fragner** says the project is part of the company's broader aim of building a culture of supplier cooperation.

"Our long-term goal is to get our suppliers to work well together, as we believe a strategy of cooperation is a better approach than one of competition," says Fragner. "So we went into this thinking about how we can start creating an atmosphere of common goals for all suppliers. As sustainability is equally important to everyone, we were delighted when Tietoevry offered us this platform. It encourages just the kind of cooperation we were looking for."

Systembolaget's IT suppliers range from a global cloud-services provider to a small app and front-end UX developer. Recognizing that each supplier has different approaches towards sustainability, the company is taking a soft approach to introducing the hub.

"We're not yet setting hard targets for any of the suppliers, as they each have different starting points. This initial introduction of the Sustainability Data Hub is about creating awareness and action. Then we will continuously improve and refine the approach," says Fragner.

The hub helps to reduce the time spent on manual data collection, improves decision making and eases compliance with legislation and frameworks.

# Corporate Governance Statement

TietoEVRY is committed to good corporate governance. In addition to the relevant legislation and rules of the Helsinki, Oslo and Stockholm stock exchanges, TietoEVRY complies with the Finnish Corporate Governance Code issued by the Securities Market Association of Finland in 2020 with the exception of the appointment procedure for electing personnel representatives to the Board of Directors (Recommendation 5) as described in detail in [The Board of Directors](#) section.

This Corporate Governance Statement has been prepared in accordance with the Finnish Corporate Governance Code 2020. The code is available at [www.cgfinland.fi](http://www.cgfinland.fi). This statement has been issued separately from the report by the Board of Directors and is included in the Financial Review 2021.

## Governance at TietoEVRY

## Annual General Meeting

Tietoevry's supreme decision-making body is the Annual General Meeting (AGM). Every shareholder has a right to participate in the AGM and each share in Tietoevry entitles its holder to one vote. However, no shareholder is allowed to vote at a General Meeting with more than one fifth (1/5) of the votes represented at the meeting.

The AGM elects the members of the Board of Directors (including the Chairperson) and appoints auditors, decides on their compensation and discharges the members of the Board and President and CEO from liability. The AGM's approval is required for option programmes as well as Board authorizations for share repurchases and share issues. The meeting also makes the decision on the Board's dividend proposal.

The following persons are usually present at Tietoevry's AGM:

- Board of Directors: Chairperson, Board members and new Board member candidates
- Group Leadership: President and CEO, CFO
- Auditors

For more information regarding the AGM 2022 and previous meetings, shareholders and participation possibilities, please visit [www.tietoevry.com/agm](http://www.tietoevry.com/agm).

### AGM 2021

- In 2021, Tietoevry's AGM convened on 25 March at Tietoevry's headquarters in Espoo, Finland. To limit the spread of the Covid-19 pandemic, the company complied with the Act on Temporary Deviation from the Companies Act, under which shareholders were only allowed to participate in the AGM and exercise their shareholder rights by voting, submitting questions and making counterproposals in advance. Altogether 321 shareholders and 70,388,307 shares (59.4% of the total outstanding shares) participated in the advance voting.

## Shareholders' Nomination Board

The company's AGM decided in 2010 to establish a Shareholders' Nomination Board (SNB), which is a body of shareholders responsible for preparing the proposals to the AGM for the election and remuneration of the members of the Board of Directors (including employee representatives).

The SNB consists of five members. Four of the members represent the four major shareholders who on 31 August held the largest number of votes conferred by all shares in the company and who wished to participate in the nomination process. The fifth member is the Chairperson of the company's Board of Directors. The term of office of the SNB members expires when a new SNB has been appointed. The SNB itself is an organ that has been established for the time being. The charter of the SNB is available on the company's website.

The SNB based on shareholdings as at 31 August 2021 consisted of the following representatives announced by TietoEVRY's shareholders:

### Nominated by Solidium Oy:

Petter Söderström

Main occupation: Investment Director, Solidium Oy

Born: 1976

Nationality: Finnish

Education: MSc. (Econ.)

Nominated by Cevian Capital Partners Ltd:

Gustav Moss

Main occupation: Vice President, Cevian Capital AB

Born: 1988

Nationality: Swedish

Education: MSc. (Econ.)

### Nominated by Incentive AS:

Alexander Kopp

Main occupation: Investment Manager, Incentive AS

Born: 1981

Nationality: Norwegian

Education: A.B. (Econ.) Harvard College

### Nominated by Ilmarinen Mutual Pension Insurance Company:

Mikko Mursula

Main occupation: Chief Investment Officer, Ilmarinen Mutual Pension Insurance Company

Born: 1966

Nationality: Finnish

Education: MSc. (Econ.)

### Representing the Board of Directors:

Tomas Franzén

The SNB convened four times and provided TietoEVRY's Board of Directors on 31 January 2022 with its proposals to the AGM 2022. The SNB proposes to the AGM that the Board of Directors shall have eight members and that the current Board members Timo Ahopelto, Tomas Franzén, Liselotte Högertz Engstam, Harri-Pekka Kaukonen, Angela Mazza Teufer, Katharina Mosheim, Niko Pakalén and Endre Rangnes be re-elected. Leif Teksum has informed that he is not available for re-election. The Shareholders' Nomination Board proposes that Tomas Franzén shall be re-elected as the Chairperson of the Board of Directors.

The biographical details of the candidates and information on their holdings in TietoEVRY are available on the company's website at [www.tietoenvry.com/en/investors/governance/board\\_of\\_directors](http://www.tietoenvry.com/en/investors/governance/board_of_directors).

The Shareholders' Nomination Board proposes that the remuneration of the members of the Board of Directors elected by the Annual General Meeting be annual fees and increased by approximately 3%: EUR 128 500 to the Chairperson (2021: EUR 125 000), EUR 72 000 to the Deputy Chairperson (2021: EUR 70 000) and EUR 54 500 to the other members (2021: EUR 53 000).

In addition to these fees, it is proposed that the Chairperson of a permanent Board Committee receives an annual fee of EUR 20 000, and a member of a permanent Board Committee receives an annual fee of EUR 10 000. It is also proposed that the members elected by the Annual General meeting will be paid EUR 800 for each Board meeting and for each permanent or temporary committee meeting. Further, it is proposed that the remuneration of the employee representatives elected as members of the Board of Directors will be an annual fee of EUR 15 000.

The Shareholders' Nomination Board is of the opinion that further increasing the long-term shareholding of the Board members will benefit all the shareholders. Every member of the Board of Directors elected by the Annual General Meeting is expected to over a five-year period accumulate a shareholding in the company that exceeds his/her one-time annual remuneration.

The Shareholders' Nomination Board therefore proposes that part of the annual remuneration may be paid in the company's shares purchased from the market. An elected member of the Board of Directors may, at his/her discretion, choose from the following five alternatives:

No cash, 100% in shares  
25% in cash, 75% in shares  
50% in cash, 50% in shares  
75% in cash, 25% in shares, or  
100% in cash, no shares.

The shares will be acquired directly on behalf of the members of the Board within two weeks from the release of the company's interim report 1 January–31 March 2022. If the remuneration cannot be delivered at that time due to insider regulation or other justified reason, the company shall deliver the shares later or pay the remuneration fully in cash.

The remuneration of the employee representatives elected as members in the Board of Directors will be paid in cash.

## The Board of Directors

It is the general obligation of TietoEVRY's Board of Directors to safeguard the interests of the company and its shareholders.

### Composition and election

According to TietoEVRY's Articles of Association, the Board of Directors elected by the shareholders shall consist of at least six and no more than twelve members. Board members have a term of office of one year, expiring at the closing of the first AGM following the election.

The company has defined as an objective that in addition to professional competence, TietoEVRY's Board members shall be diversified in terms of gender, occupational and professional background and that the Board as a group shall have sufficient knowledge of and competence in, inter alia, the company's field of business and markets.

The SNB, which consists of representatives nominated by the company's largest shareholders, prepares a proposal on the composition of the Board to be presented to the AGM for its decision. The company has ensured that the principles have been included in the charter of the SNB and charter of the Board and taken into account in the SNB work and candidate search. Three out of eleven members elected by the AGM during 2021 were female. After Salim Nathoo and Rohan Haldea left the Board, there were three female and six male members. Gender diversity is continuously on the SNB's agenda.

In addition to the members proposed by the SNB and elected by the AGM, TietoEVRY's personnel elected four members and four deputy members to the Board of Directors. The term of office for the personnel representatives is two years. This special appointment procedure is a departure from Recommendation 5 "Election of the Board of Directors" of the Corporate Governance Code. Personnel representation is based on the Finnish Act on Personnel Representation in the Administration of Undertakings and was originally agreed between the company and personnel of the Group by way of a Personnel Representation Cooperation Agreement in 2001.

The objectives of personnel representation are, inter alia, to provide opportunities for the personnel to influence and affect the organization, to improve communication and decision making within the Group, to increase mutual trust and confidence between corporate management and the personnel as well as to increase and develop the feeling of security among the personnel. The personnel representatives, however, are not entitled to participate in the handling of matters that concern the appointment or dismissal of corporate management, the contractual terms of the management, the terms of employment of staff or matters related to industrial actions.

### Board of Directors as at 31 December 2021<sup>1)</sup>

<sup>1)</sup> Board member until 7 September 2021.

<sup>2)</sup> Board member as from 25 March 2021.

<sup>3)</sup> Board member until 19 July 2021.

<sup>4)</sup> Additionally there were three informal Board meetings. Meeting fees were paid for these meetings.

<sup>5)</sup> Two temporary committees met seven and three times. Meeting fees were paid for these meetings.

All Board members elected by the AGM of TietoEVRY are independent of the company and eight out of nine members elected by the AGM are independent of the company's significant shareholders. The independence of the members is evaluated at the Board's constitutive meeting. The Board members shall inform the Board if any changes in these circumstances occur, in which case their independence will be re-evaluated.

More detailed background information regarding the Board members, such as working experience, past and present positions of trust and remuneration, is presented on the company's website at [www.tietoevry.com/investors](http://www.tietoevry.com/investors).

## Tasks

The main duties and working principles of the Board have been defined in a written charter. Additionally, the work of the Board is based on an annual action plan.

More specifically, the Board:

- approves the company's values, strategy and organizational structure
- defines the company's dividend policy
- approves the company's annual plan and budget and supervises their implementation
- monitors management succession issues, appoints and discharges the President and CEO
- decides on the President and CEO's compensation, sets annual targets and evaluates their accomplishment
- decides on the compensation of the President and CEO's immediate subordinates
- addresses the major risks and their management at least once a year
- reviews and approves interim reports, annual reports and consolidated financial statements
- reviews and approves the company's key policies
- is accountable for guiding the organization's strategy on environmental and social topics
- meets the company's auditors at least once a year without the company's management
- appoints the members and Chairpersons of the Board's committees and defines their charters
- reviews assessments of its committees as well as the President and CEO

- evaluates its own activities.

## Work

The Board has scheduled meetings every one to two months. Besides the Board members, the meetings are attended by the President and CEO, Chief Financial Officer (CFO) and General Counsel, who acts as secretary of the meetings. In addition to the scheduled meetings, the Chairperson shall convene the Board whenever needed as well as at the request of any of its members or the President and CEO.

Matters to be handled are prepared by the Board committees and the President and CEO. The Board receives information on the company's financial performance monthly and more detailed financial reports quarterly. Any material related to issues to be handled by the Board is provided four days prior to the meeting. Other case-specific materials are delivered at the management's initiative or the Board's request. Board members shall be informed about all significant company events immediately.

## 2021

- The Board convened 12 times in 2021 and the average attendance was 94.8%.
- The Board met six times during the year without the management present.
- The Board held one joint meeting with the auditors.
- The Board met the auditors once without the presence of the management.

## Assessment

The performance of TietoEVRY's Board is assessed annually; the latest assessment was carried out by self-evaluation during autumn 2021. Assessments review the Board's knowledge of the company's operations and management as well as its understanding of the field of business. Additionally, the effectiveness of the Board work is evaluated. The SNB is informed of the results, which are also taken into consideration when the Board draws up its next annual plan.

## Committees

TietoEVRY's Board is assisted by two permanent committees that prepare matters for which the Board is responsible. The Board defines the charters of the committees and decides on their composition. The Board establishes temporary committees whenever a subgroup is needed to prepare a specific topic. The entire Board remains responsible for the duties assigned to the committees.

## Remuneration Committee

### Composition

The Remuneration Committee (RC) comprises at least three non-executive directors elected by the Board. The majority of the members shall be independent of the company. The Head of HR acts as secretary of the meetings.

Based on the Board's decision, the RC was composed of the following non-executive directors who were independent of the company and of significant shareholders, except for Salim Nathoo who was independent of the company and non-independent of a significant shareholder:

- Tomas Franzén (Chairperson)
- Harri-Pekka Kaukonen
- Salim Nathoo (member until 19 July 2021)
- Endre Rangnes.

### Work

The committee meets regularly and at least twice a year. The Chairperson of the committee reports to the Board when applicable. The main tasks of the committee are to:

- monitor the targets of the compensation schemes, implementation of the compensation schemes, performance assessment and compensation determination
- ensure that the targets set for earning the bonuses defined in the compensation scheme are met
- prepare a proposal for the Deputy Chairperson of the Board
- prepare a proposal on the committees (members and Chairpersons, and the duties and responsibilities of the committees)
- monitor corporate governance

- prepare a compensation proposal concerning the President and CEO and his immediate subordinates, and the principles of personnel compensation
- prepare for the Board option schemes and other share-based incentive schemes
- evaluate the performance of the President and CEO
- prepare the assessment of the Group Leadership
- prepare a proposal on the Board's charter.

### 2021

- The committee convened six times in 2021 and the average attendance was 100%.
- In addition to its normal responsibilities within the scope of its charter, the committee followed the functioning of short- and long-term incentive plans to ensure that they supported the achievement of the objectives.
- The committee concentrated on reviewing and developing the remuneration of the Leadership team.

## Audit and Risk Committee

### Composition

The Audit and Risk Committee (ARC) comprises at least three non-executive directors who are independent of the company and out of whom at least one member shall be independent of the significant shareholders. The Chairperson and the members are elected by the Board. At least one committee member must have expertise in accounting, bookkeeping or auditing. TietoEVRY's Deputy General Counsel acts as secretary of the meetings.

In 2021, all committee members were non-executive directors who were independent of the company and of significant shareholders, except for Timo Ahopelto who is independent of the company and non-independent of a significant shareholder. All members have extensive experience in corporate management and financial issues and therefore have the required expertise.

Based on the Board's decision, the ARC was composed of

- Harri-Pekka Kaukonen (Chairperson)
- Timo Ahopelto
- Liselotte Högertz Engstam
- Niko Pakalén
- Leif Teksum

### Work

The committee convenes regularly at least four times a year and meets the company's auditors, also without the company's management present. The Chairperson of the committee reports to the Board when applicable. The main tasks of the committee are to:

- review and supervise internal control – particularly the financial reporting process – and risk management
- discuss and review the interim and annual reports and the consolidated financial statements
- assess compliance with legislation, official regulations and the company's Code of Conduct
- evaluate the sufficiency of internal control and the internal audit
- examine, assess and approve the internal audit plan

- assess the appropriate coverage of risk management and monitor the efficiency of risk management
- review significant risks and unusual business events
- prepare for the Board's decision a proposal for the AGM on the nomination of external auditors and their compensation
- evaluate the external auditors' independence, assess the audit plan and examine the audit reports
- monitor the statutory audit and consult with the auditors regarding matters that should be brought to the Board's attention.

### 2021

- The committee convened six times in 2021 and attendance was 96.6%.
- In addition to its regular agenda, the committee followed up progress in project and delivery management and quality issues as well as development in areas of risk management, privacy and cybersecurity.

## Internal control and risk management

Tietoevry's internal control framework supports the execution of the strategy and ensures regulatory compliance. The foundation for internal control is set by the risk management framework, financial control, internal audit and supporting policies.

The aim of Tietoevry's internal control framework is to assure that operations are effective and well aligned with the strategic goals. The internal control framework is intended to ensure correct, reliable, complete and timely financial reporting and management information.

The framework endorses ethical values, good corporate governance and risk management practices. The activities related to internal control and risk management are part of Tietoevry's management practices and integrated into the business and planning processes.

### Risk management framework

Tietoevry uses systematic risk management to develop the efficiency and control of business operations as well as their profitability and continuity.

## Review of project and delivery risks in each ARC meeting

The risk management framework consists of the risk management organization, related policies, processes, tools and common ways of working. The risk management organization develops and maintains the company's risk management framework, including risk reporting, risk management governance and follow-up of risk exposures consisting of strategic, financial, operational, compliance and people risks.

The risk management organization consists of the Corporate Risk Management unit, nominated Risk Managers and Business Continuity Managers in the units and key stakeholders in functions. A group-wide Risk Manager Forum and Business Continuity Forum have been established for information sharing, setting direction of risk and continuity management, as well as crisis management, collaboration between units and reviewing steering documents. In addition, the forums align group-wide Risk Management Business Continuity and Crisis management activities and ensure company-wide deployment of the frameworks.

TietoEvry has also specified its compliance management system, including the compliance organization, steering model and annual plan for compliance-related activities. The Compliance Officer is responsible for maintaining the whistleblowing channel and coordinating investigations as well as ensuring the effectiveness and functionality of the governance model for compliance work.

### Governance of risk and compliance

At TietoEvry, governance, risk, and compliance (GRC) are closely linked and consistently defined corporate policies and rules with proper controls. In the finance function, for example, financial reporting, compliance and risk monitoring are efficiently integrated into daily operations. Thanks to automated processes, TietoEvry can readily adapt to changes in business conditions, regulations or corporate policy with the necessary risk management controls.

TietoEvry has invested in process automation, which is seen as a way to improve quality and reduce costs. Well-drafted policies and rules are made available to assure that the implications of automation on risk and compliance are fully understood by all parties in the organization.

### Continuous development of the risk framework

The development and integration of the TietoEvry GRC (Governance, Risk & Compliance) platform with its related framework continued during 2021. Its effectiveness is validated in

business operations by means of active risk assessments of the company's assets, resulting in measurable risk reductions.

The TietoEvry GRC platform now comprises the following functionalities:

- Business Reporting Dashboards
- Risk management and improvement opportunity
- Project risk management
- Privacy risk assessments
- Security incident management
- Audit management
- Business continuity management

The GRC platform enables online visibility to the information, with automated notifications to stakeholders and systematic follow-up of actions.

The development of the GRC platform, risk management framework and other frameworks is carried out in close cooperation with the nominated Risk, Continuity, Security and Privacy Managers and the Quality Partners in the units, and they are approved by the TietoEvry Group Leadership and validated by the ARC.

### Financial control

The purpose of internal control over financial reporting is to ensure the correctness of financial reporting, including interim and annual reports and the compliance of financial reporting with regulatory requirements.

The ARC has the oversight role in TietoEvry's external financial reporting.

### Financial reporting process and responsibilities

TietoEvry has a common accounting and reporting platform. Group consolidation and reporting are based on the reporting system, which facilitates common control requirements for all legal entities reporting to the Group. TietoEvry does continuous improvements to the common accounting and reporting platform to accommodate internal needs and new regulatory requirements.

Financial reporting consists of monthly performance reports, including all the key performance indicators, rolling forecasts and interim financial reports.

Financial reports are regularly reviewed by the Head of Business Finance in the units, the Group Leadership and the Board of Directors. The follow-up is based on a thorough comparison of the actual figures with the set objectives, forecasts and previous periods. If the figures deviate, the Group Leadership members are responsible for initiating corrective actions.

### **Internal audit**

The purpose of Tietoevry's Internal Audit function is to assure Quality and Trust all the way to the Customer. Internal Audit functionally reports to the Audit and Risk Committee (ARC) and administratively to the Chief Financial Officer (CFO).

Core services aim at assessing and assuring the adequacy and effectiveness of risk management and internal control within Tietoevry's ecosystem. Assurance and Advice is delivered via data-driven business partnering, enabling digital end-to-end assurance and assurance by design.

Internal Audit applies quarterly planning and delivery cycles, approved by the ARC. This ensures that changes affecting the risk landscape can be addressed when needed. Main input sources for planning are Enterprise Risk Management, Legal and Compliance functions, Operational Excellence, external auditors as well as business management and the ARC. Services are delivered via co-sourcing with adjacent functions and area subject matter experts. This enables relevance and effectiveness, positively impacting behaviour across Tietoevry's ecosystem.

## Related-party transactions

TietoEVRY maintains a list of its related parties in accordance with IAS24 and discloses the required information concerning related-party transactions in the report by the Board of Directors and notes to the consolidated financial statements.

Further, the company evaluates and monitors transactions concluded between the company and its related parties and seeks to ensure that any conflicts of interest shall be taken into account in decision making. The Board of Directors has the overall responsibility to monitor the company's measures and evaluate that related-party transactions are entered into the ordinary course of business and concluded on normal market terms.

Reporting to the Board of Directors takes place at the meeting where the financial statements are approved. The related-party transactions are summarized in [note 29](#) of the consolidated financial statements.

Furthermore, the company has added controls into its processes and decision-making policies to identify and duly handle any transactions with related parties. Testing of customer and supplier transactions is carried out by both the company and its external auditors.

## Insider administration

TietoEVRY follows the EU Market Abuse Regulation (MAR) and rules of Nasdaq Helsinki and Oslo Børs. In addition, TietoEVRY's Board of Directors has adopted an internal TietoEVRY Insider Rule.

TietoEVRY has specified that the Board of Directors and the President and CEO of the parent company TietoEVRY Corporation are subject to the requirement to notify their transactions. In addition, TietoEVRY has set restrictions on trading for the members of the Group Leadership, persons participating in the preparation of interim reports and consolidated financial statements as well as other persons who are considered to receive information of a confidential and sensitive nature in their position or service.

The managers and other persons subject to trading restrictions are prohibited from dealing in TietoEVRY's shares or other financial instruments during the closed period. The closed period covers 30 calendar days before the disclosure of an interim financial report or a financial statement release including the date of disclosure (= 30 + 1 days).

TietoEVRY's General Counsel is in charge of insider administration and Group Legal and Compliance team monitors compliance with the insider regulation and takes care of necessary guidance and training.

## Auditors

The ARC prepares a proposal on the appointment of TietoEVRY's auditors, which is then presented to the Board of Directors and finally to the AGM for its decision. The compensation paid to the auditors is decided by the AGM and assessed annually by the ARC.

The Board of Directors proposes to the AGM, in accordance with the recommendation of the ARC, that the auditor to be elected at the AGM 2022 be reimbursed according to the auditor's invoice and in compliance with the purchase principles approved by the Committee.

The Board of Directors proposes to the AGM, in accordance with the recommendation of the ARC, that the firm of authorized public accountants Deloitte Oy be re-elected as the company's auditor for the financial year 2022. The firm of authorized public accountants Deloitte Oy has notified that APA Jukka Vattulainen will act as the auditor with principal responsibility.

## Auditing

The AGM 2021 elected the firm of authorized public accountants Deloitte Oy as the company's auditor for the financial year 2021. Deloitte Oy notified the company that Authorized Public Accountant Jukka Vattulainen acts as principal auditor.

In 2021, TietoEVRY Group paid the auditors a total of EUR 1.3 (1.3) million in audit fees, and a total of EUR 0.5 (0.7) million for other services.

## Remuneration Report

The aim of Tietoevry's remuneration principles is to attract and retain talent, motivate key people and align the goals of the company's shareholders and executives in order to enhance the value of the company. We reward our employees for high performance in achieving both individual and company objectives, thus linking remuneration to the successful execution of our strategy and to long-term shareholder value creation.

The principles on how the company shall compensate its employees are defined in Tietoevry's Remuneration Policy and HR Policy. The policy is globally applied to all Tietoevry entities and units to support the company's strategy, objectives and values.

Remuneration of the Board of Directors is decided by the AGM based on a proposal by the Shareholders' Nomination Board. The Remuneration Committee is responsible for planning the remuneration of the Group Leadership members and preparing the principles underlying the remuneration of Tietoevry personnel. The Board of Directors decides on the remuneration of the President and CEO and other members of the Group Leadership based on a proposal by the Remuneration Committee.

### Summary of the Remuneration of TietoEVRY's President and CEO

Element	Purpose	Description	Execution 2021
Salary	Recognition for continuous daily contribution and provides core remuneration for the role.	Fixed compensation for performing defined job responsibilities. In addition to monthly salary, the President and CEO can be paid car and mobile phone benefits as per company policy. Salary is reviewed annually based on the individual's performance and salary market conditions. Weighting of the reward factors for the President and CEO is described in a separate table. The reward targets are set annually by the Board of Directors.	There were no changes done to the base salary of the CEO during 2021.
Short-term incentive plan	Incentivizes delivery of the company's annual financial and operational goals.	Cash-based plan that rewards the short-term (12-month) success of the company and the individual. The bonus for the President and CEO is 75% of the annual base salary when the performance is at expected level; the maximum bonus for the President and CEO is 150% <sup>1)</sup> . The amount of bonuses is decided by the Board of Directors after the consolidated financial statements have been prepared.	Short-term incentives were paid in 2021 based on 2020 performance. The CEO's short-term incentives are connected to the company's total performance by plan KPIs; their achievement was 104.97%. Payment was made in March after Board approval.
Long-term incentive plan	Rewards for sustained increase in shareholder value and encourages ownership culture.	Share-based plans reward leadership and key employees for company growth and achievement of defined strategic goals. LTI plans are annually commencing plans with a three-year performance period. Key principles of TietoEVRY's share plans – such as the basis and size of rewards – are described on the company's website.	In spring 2021, the 2018–2020 LTI plan share delivery was conducted based on the achievement of plan KPIs. The target achievement was 80%. Shares were delivered after the Board approval. The KPIs and weights used in this plan were EPS 30%, TSR 20% and growth 50% weight.
Additional pension	Provides appropriate retirement benefits.	President and CEO: defined contribution (DC) plan where the expenditure is 23% of the annual base salary. Retirement age is 63.	The company paid the agreed contribution to the pension plan.
Clawback	Protects company interests in case of misconduct, restatement or misstatement of results.	Clawback provisions apply to STI and LTI plan rewards in exceptional circumstances such as misconduct or misstatement of financial results.	
Share ownership	Encourages building a meaningful shareholding in TietoEVRY, ensuring alignment with shareholders.	The recommended minimum investment in the company's shares corresponds to the executive's one-time annual gross base salary.	The amount of shares owned by the CEO at the end of 2021 was 58 439.
Service contracts and severance pay	Provides for clear contractual terms.	President and CEO: if the agreement is terminated by TietoEVRY, the notice period is twelve months. In the event of termination, the company shall pay a severance payment equivalent to the base salary and the short-term target incentive for six months in addition to the salary for the notice period. If the agreement is terminated by the President and CEO, the notice period is six months. Change of control terms are the same as in termination except for the monetary value of the maximum amount of shares granted to him in the most recent long-term incentive plan in addition to the salary for the notice period.	

<sup>1)</sup> Short-term incentive target and maximum value valid as of 5 Dec 2019

## President and CEO

President and CEO	
<b>Kimmo Alkio</b>	
Salary 2021	EUR 807 300
Benefits 2021	EUR 34 670
Bonus 2020	EUR 847 424, paid in 2021 based on performance in 2020
Bonus 2021	EUR 484 380 paid in 2022 based on performance in 2021
Basis of bonus 2021	<p>Target 75% of base salary based on the Group's external revenue and profit, PDS external revenue and profit and strategy implementation when achievements meet the targets. Maximum 150% of base salary based on the Group's external revenue, profit and strategy implementation when achievements exceed the targets. Weighting of the reward factors:</p> <ul style="list-style-type: none"> <li>• Group revenue 30%</li> <li>• Group adjusted profit 30%</li> <li>• Adjusted free cash flow 10%</li> <li>• Strategic and operational goals 30%</li> </ul>
Long-Term Incentive Plan 2018–2020	In March 2021, a total of 9 729 shares were transferred to the CEO based on criteria attainment. In addition, a cash portion corresponding to a value of 8 576 shares was paid. The total value of the paid gross reward was EUR 509 814.
Pension expenditure, voluntary defined contribution (DC) plan	EUR 205 054 <sup>1)</sup>
Share ownership in TietoEVRY on 31 December	58 439

<sup>1)</sup> Payments to defined contribution plans are recognized as expenses for the period to which they relate. After payment of the contribution the Group has no further obligations in respect of such plans.

Plan period	Unvested Long-Term Incentives
Long-Term Incentive Plan 2019–2021	Entitled to 29 433 Performance Shares if the target levels of the performance metrics are met, and to 58 866 shares at maximum. The performance period of the plan is 2019-2021. The share allocation at target level equalled 100% of annual base salary at the time of grant. The fair value of the allocation amounts to EUR 800 731 <sup>2)</sup> .
Long-Term Incentive Plan 2020–2022	Entitled to 40 600 Performance Shares if the target levels of the performance metrics are met, and to 101 500 shares at maximum. The performance period of the plan is 2020-2022. The share allocation at target level equalled 125% of annual base salary at the time of grant. The fair value of the allocation amounts to EUR 792 138 <sup>2)</sup> .
Long-Term Incentive Plan 2021–2023	Entitled to 37 900 Performance Shares if the target levels of the performance metrics are met, and to 75 800 shares at maximum. The performance period of the plan is 2021-2023. The share allocation at target level equalled 125% of annual base salary at the time of grant. The fair value of the allocation amounts to EUR 979 002 <sup>2)</sup> .

<sup>2)</sup> The fair market value for the Long-term Incentive Plans is calculated using the latest performance estimates and the value of the Tietoevry share on 31 December 2021, EUR 27.48

Updated information on the shares and options held by the President and CEO is available on the company's website at [www.tietoevry.com/investors](http://www.tietoevry.com/investors) under the insider register.

## Remuneration of the Board

According to the decision of Tietoevry's AGM 2021, the annual remuneration of the Board of Directors is the following:

- EUR 125 000 to the Chairperson,
- EUR 70 000 to the Deputy Chairperson and
- EUR 53 000 to the ordinary members of the Board of Directors.

In addition to these fees, the Chairperson of a permanent Board Committee receives an annual fee of EUR 20 000 and a member of a permanent Board Committee receives an annual fee of EUR 10 000. In addition, remuneration of EUR 800 is paid to the Board members elected by the Annual General Meeting for each permanent or temporary committee meeting. Further, remuneration for employee representatives elected as ordinary members of the Board of Directors will be an annual fee of EUR 15 000, which is paid in cash only.

Further, the AGM 2021 decided that part of the fixed annual remuneration may be paid in the company's shares purchased from the market. An elected member of the Board of Directors may, at his/her discretion, choose to receive the fee from the following alternatives:

1. No cash, 100% in shares
2. 25% in cash, 75% in shares
3. 50% in cash, 50% in shares
4. 75% in cash, 25% in shares
5. 100% in cash, no shares.

No restrictions have been set on Board members concerning how they may assign these shares, but the company recommends that Board members should retain ownership of all the shares they have received as remuneration for as long as they serve on Tietoevry's Board.

In addition to the share remuneration, the Board members do not belong to or are not compensated with other share-based arrangements, nor do the members have any pension plans at Tietoevry. Tietoevry executives or employees are not entitled to compensation for their Board positions or meeting attendance in the Group companies, with the exception of the employee representatives elected as ordinary members to the parent company's Board of Directors. None of the Board members, except the personnel representatives, have an employment relationship or service contract with Tietoevry.

### Comparative remuneration data

Information in the next table is based on Tieto's data for 2016–2018. Years 2019 to 2021 include combined data for Tieto and EVRY. In 2021, Tietoevry's operating profit includes EUR 104.0 million in capital gains from divestments, whereas in 2020, adjustment items included substantial costs related to integration. Eliminating all non-recurring items, adjusted<sup>3)</sup> operating profit (EBITA) stood at EUR 367.8 (355.0) million. The demographics of the workforce changed and the number of employees increased significantly following the merger of Tieto and EVRY on 5 December 2019. CEO remuneration consists of gross rewards paid during the reported year. 2019 and 2020 include a merger success bonus related to the merger of Tieto and EVRY. Personnel attrition rates were on the rise across the industry during 2021. While talent attraction has been high at Tietoevry, productivity in the consulting business has been somewhat impacted by high attrition. As a result, the average salary level has been on the rise. Employee average compensation in 2020 and 2021 is based on personnel expenses divided by the average number of employees.

<sup>1)</sup> Years 2019 to 2021 include combined data for Tieto and EVRY

<sup>2)</sup> For the years 2020 and 2021 we use the average number of employees; for the other years, the end-of-year employee figures are used

<sup>3)</sup> Adjusted for restructuring costs, capital gains/losses, goodwill impairment charges and other items affecting comparability

	2017	2018	2019 <sup>1)</sup>	2020 <sup>1)</sup>	2021 <sup>1)</sup>

## About TietoEVRY

TietoEVRY Corporation ("TietoEVRY") is a Finnish public limited liability company. Headquartered in Finland, TietoEVRY is a leading Nordic digital services and software company that employs around 24 000 experts globally. TietoEVRY serves thousands of enterprise and public sector customers in more than 90 countries. The company's shares are listed on the NASDAQ in Helsinki and Stockholm and the Oslo Børs.

In 2021, the Group comprised six operating segments: Digital Consulting, Cloud & Infra, Industry Software, Financial Services Solutions, International Operations and Product Development Services. The Group's new segments effective as from 1 January 2022 are described in the [Strategy section](#).

## Highlights of 2021

- The company's growth agenda materialized during the second half of 2021. TietoEVRY saw strong performance in its software businesses as well as Product Development Services and International Operations.
- The two-year integration programme was completed with successful operational integration and synergy realization. The company achieved a run-rate of EUR 97 million by the year-end. The total cost synergy target of EUR 100 million is anticipated to be achieved during 2022.
- TietoEVRY divested its oil & gas software business and three smaller software businesses during the year, resulting in capital gains of EUR 104.0 million.
- TietoEVRY announced a new strategy in October 2021, driving growth and expansion through specialization. To capture the momentum of the cloud-native and software market, TietoEVRY has established six specialized end-to-end businesses, which took effect on 1 January 2022.
- The talent market was active. Over 5 700 recruitments (gross) during the year demonstrated the strong employer attractiveness of the company.
- In the full year, revenue was up by 1.3%. Adjusted operating profit<sup>1)</sup> (EBITA) was up to EUR 367.8 (355.0) million, representing a margin of 13.0% (12.7). Profitability was somewhat affected by higher salary inflation.
- Operating profit (EBIT) was up to EUR 382.0 (146.7) million.

<sup>1)</sup> Adjustment items include restructuring costs, capital gains/losses, impairment charges and other items affecting comparability.

## IT market development

The rapidly changing market provides significant growth opportunities for TietoEvry. Creating superior experiences enabled by hyperconnected data continues to be a strong driver for investments across industries. Customers are considering how to utilize the benefits of data even faster to be able to launch highly advanced digital experiences supported by real-time and personalized services.

Innovations driving digital experiences are enabled by cloud technologies. Cloud enablement and agile development methods, DevOps, are becoming a standard way of delivering services. The focus is clearly geared towards cloud-native development, with investments in data and analytics, data management, data engineering and data platforms on the one hand, and investments in cloud-native application development on the other.

In parallel with cloud-native development, customers will continue the modernization of their business processes, applications and infrastructure. Hence, investments are also being geared towards the market with modernization programmes. As price erosion in these traditional segments will accelerate further, competitiveness requires scale.

The overall addressable market for TietoEvry is anticipated to grow by around 3% during 2022, impacted by an estimated decline of 5–10% in traditional managed services. The market for software and cloud-native services is anticipated to grow by around 10%. This polarized market is calling for specialization reflecting a distinctive competitive advantage in each service segment in order to capture the identified opportunities.

## New strategy launched in 2021 – growth through specialization

TietoEvry announced a new strategy in October 2021, driving growth and expansion through specialization. Investments will be focused on businesses where the company sees competitive advantages and sustainable growth:

- cloud-native services
- data and software engineering
- scalable software businesses,

including their global expansion potential.

In the areas of traditional managed application and infrastructure services, the company sees new partnerships as potential means to build scale and pursue joint investments.

### Six specialized businesses established

To capture the momentum of the cloud-native and software market, TietoEvry has established six specialized end-to-end businesses. These businesses have full operational responsibility, including go-to-market, service portfolio, investments and partnerships. Reflecting the distinct market dynamics of each, the individual businesses have optionality to build scale and prioritize investments.

The businesses – and their new names as from January 2022 – forming the reportable segments as from the first quarter of 2022 are described below:

**TietoEvry Create** accelerates customers' digital agenda to create competitive products and data-driven businesses utilizing design, data and cloud technologies. This is a global business with software and data engineering at its core.

**TietoEvry Transform** drives enterprise-wide transformation across customers' business processes, applications and infrastructure. Deep customer knowledge, global cloud & data competencies and automated operations form its foundation.

**TietoEvry Connect** is a multi-cloud platform provider with a full range of infrastructure choices at scale – ensuring security, resilience and compliance for the customer's business.

**TietoEvry Banking** aims to be the market-leading financial-software products, platform and services partner in the Nordics and beyond.

**TietoEvry Care** aims to reinvent the Nordic health and social care sector with modular, open and interoperable software – enhancing care personnel and citizen experience.

**TietoEvry Industry** is a portfolio of distinct competitive software and data solutions across a wide variety of industry domains. These include the public sector, pulp & paper and utilities.

Scalable common functions, such as Finance, Strategy and HR, continue to support the businesses in driving portfolio development, performance management and efficiency across the company. The new structure took effect on 1 January 2022.

## Investment priorities to support scale in distinct businesses

The following investment priorities will drive competitiveness and value creation in each business:

- **Invest to expand** in TietoEvry Create, TietoEvry Care and TietoEvry Banking – invest to accelerate products, services and capabilities; prioritized M&A.
- **Partner to scale** in TietoEvry Transform and TietoEvry Connect – invest in capabilities to drive scale and automated managed services; seek partners (operational and structural) to jointly invest and build scale.
- **Focus for value** in TietoEvry Industry – optimized investments for selected businesses and develop portfolio to increase focus.

## Long-term financial targets

The financial targets announced in December 2020 have been maintained while the new strategy supports potential for enhanced performance. The targets include:

- Growth accelerating to 5% by 2023
- Adjusted EBITA 15% by 2023
- Net debt/EBITDA below 2 by the end of 2022
- One-time items around 1% of revenue post 2021
- Dividends increased annually.

In 2022, one-time costs are expected to be around 1.5% to 2.0% of revenue, primarily driven by the turnaround programme in Cloud & Infra.

## Performance in 2022

Strong order backlog and a healthy market are anticipated to contribute to growth ambitions for 2022. Tietoevry estimates its full-year organic growth<sup>1)</sup> to be 2% to 4%. Good business performance momentum in software businesses is anticipated to continue. In Cloud & Infra, the decline in traditional infrastructure services is anticipated to continue while the negative impact from the customer contracts lost prior to the merger ended in the fourth quarter. Hence, the company has initiated performance acceleration to drive cloud growth and achieve further profit improvement. Cost savings programme with a view to achieving around EUR 50 million in annual savings was announced in February 2022 and it is expected to contribute to performance in the second half of the year.

High personnel attrition is anticipated to continue, impacting the speed of performance improvement in 2022. Personnel costs are affected by salary inflation, expected to be around 3% in the full year 2022. However, salary inflation is partly offset by price increases in some service areas, offshoring and management of the competence pyramid.

<sup>1)</sup> Adjusted for currency effects, acquisitions and divestments

## Merger-related synergies

Tietoevry anticipates that the total cost synergy target of EUR 100 million will be achieved by the end of 2022. The company achieved a run-rate of EUR 97 million at the end of 2021. By the end of 2021, accumulated integration costs amounted to EUR 110 million. The total integration costs are expected to be EUR 117 million, well in line with the previously estimated total integration costs of EUR 110–120 million.

## Adjustment items

In 2022, one-time costs are expected to be around 1.5% to 2.0% of revenue, primarily driven by turnaround measures initiated in Cloud & Infra, as announced in February 2022. One-time costs also include the remaining integration costs, mainly related to the brand and identity programme.

## Financial performance

Full-year revenue increased by 1.3% to EUR 2 823.4 (2 786.4) million. Organically, revenue remained at the previous year's level. Growth was impacted by the decline in Cloud & Infra whereas software businesses as well as International Operations saw strong growth. Positive currency changes had an impact of EUR 78 million on revenue while the impact of divestments was EUR 33 million. Full-year operating profit (EBIT) amounted to EUR 382.0 (146.7) million, representing a margin of 13.5% (5.3). Merger-related synergies supported profit improvement during the year.

Depreciation and amortization amounted to EUR 170.1 (175.8) million, including EUR 71.2 (72.7) million in depreciation of right of use assets (IFRS 16 impact) and EUR 47.3 (45.5) million in amortization of acquisition-related intangible assets. Net financial expenses stood at EUR 28.1 (24.4) million. Net interest expenses were EUR 21.1 (22.3) million and net losses from foreign exchange transactions EUR 4.8 (gains 0.8) million. Other financial income and expenses amounted to EUR -2.3 (-2.9) million.

Earnings per share (EPS) totalled EUR 2.46 (0.80).

<sup>1)</sup> Adjustment items include restructuring costs, capital gains/losses, impairment charges and other items affecting comparability.

### Adjusted<sup>1)</sup> results

Operating profit includes EUR 61.5 (-162.8) million in adjustment items, mainly related to capital gains from divestments and integration costs. In 2020, adjustment items included substantial costs related to integration, the ending of the SmartUtilities platform and redefined IBM partnership. Adjusted<sup>1)</sup> operating profit (EBITA) stood at EUR 367.8 (355.0) million, or 13.0% (12.7) of revenue. Further details on adjusted items are available in the [Alternative Performance measures](#) paragraph. Adjusted<sup>1)</sup> earnings per share amounted to EUR 2.20 (2.16).

## Financial performance by segment

	Revenue		Change	Operating profit	
EUR million	1-12/2021	1-12/2020	%	1-12/2021	1-12/2020
Digital Consulting	667.5	662.0	1	82.4	70.8
Cloud & Infra	853.8	931.6	-8	30.0	36.6
Industry Software	522.7	501.1	4	223.4	38.8
Financial Services Solutions	471.0	418.8	12	43.2	10.0

Other	155.1	130.5	19	-14.1	-27.2
<b>Group total</b>	<b>2 823.4</b>	<b>2 786.4</b>	<b>1</b>	<b>382.0</b>	<b>146.7</b>

## Operating margin by segment

	Operating margin		Adjusted <sup>2)</sup> operating margin	
%	1-12/2021	1-12/2020	1-12/2021	1-12/2020
Digital Consulting	12.3	10.7	13.9	14.0
Cloud & Infra	3.5	3.9	7.2	10.0
Industry Software	42.7	7.7	24.0	18.3
Financial Services Solutions	9.2	2.4	13.8	13.0
Product Development Services	11.3	12.4	11.5	12.7
<b>Total</b>	<b>13.5</b>	<b>5.3</b>	<b>13.0</b>	<b>12.7</b>

<sup>2)</sup> Adjustment items include restructuring costs, capital gains/losses, impairment charges and other items affecting comparability.

In **Digital Consulting**, revenue was organically<sup>1)</sup> down by 2%. Growth remained healthy in areas such as Cloud and Data & Analytics while traditional application services continued to decline. At the beginning of the year, growth was negatively impacted by the pandemic. Adjusted operating margin remained at the previous year's level at 13.9% (14.0), impacted by higher salary inflation and an increase in attrition during the year.

In **Cloud & Infra**, revenue was organically<sup>1)</sup> down by 11%, mainly driven by contracts lost prior to the merger in 2019. Adjusted operating margin was down to 7.2% (10.0). The turnaround programme focusing on delivery capacity reduction in legacy services and the high automation level are expected to support profit improvement.

In **Industry Software**, revenue was organically<sup>1)</sup> up by 8%. Industry Software saw strong growth across the businesses, including Health & Care. Adjusted operating margin improved to 24.0% (18.3), mainly driven by revenue growth and continuous efficiency improvement.

In **Financial Services Solutions**, revenue was organically<sup>1)</sup> up by 8%, driven by the core banking, credit and cards businesses. Adjusted operating margin improved to 13.8% (13.0), mainly driven by revenue growth and continuous efficiency improvement.

In **Product Development Services**, revenue was organically<sup>1)</sup> up by 5%. Growth was driven by the Mobile Networks and Automotive industries. Adjusted operating margin was 11.5% (12.7), somewhat down due to high attrition, increased subcontracting and salary inflation. New customers in the electronics and automotive segments coupled with an extended partnership with Ericsson and the R&D centre built in Nanjing, China, are supporting future growth.

<sup>1)</sup> Adjusted for currency effects, acquisitions and divestments.

## Cash flow and financing

Full-year net cash flow from operations amounted to EUR 367.5 (354.7) million, including an increase of EUR 26.9 (decrease of 67.2) million in net working capital.

Payments for restructuring amounted to EUR 21.1 (29.6) million.

Full-year tax payments were EUR 40.6 (28.9) million. Tax rate was 17.6%, mainly due to tax exempt income.

Capital expenditure totalled EUR 80.8 (83.5) million, mainly consisting of investments in data centres and the capitalized costs for the development of software. Capitalized costs for industry-specific software amounted to EUR 42.6 (51.0) million. Capital expenditure represented 2.9% (3.0) of revenue.

The equity ratio was 51.6% (45.9). Gearing decreased to 33.5% (54.3). Interest-bearing net debt totalled EUR 610.6 (883.3) million, including EUR 763.1 (925.5) million in interest-bearing debt, EUR 206.5 (243.1) million in lease liabilities, EUR 5.6 (5.2) million in finance lease receivables, EUR 29.5 (27.9) million in other interest-bearing receivables and EUR 323.8 (252.3) million in cash and cash equivalents.

Interest-bearing long-term liabilities amounted to EUR 875.6 (1 056.9) million at the end of December. The company has two bonds outstanding, EUR 100 million maturing in September 2024 and EUR 300 million in June 2025. Additionally, interest-bearing long-term liabilities primarily consist of a syndicated term loan, a loan from the European Investment Bank and lease liabilities of EUR 144.0 million.

Interest-bearing short-term liabilities amounted to EUR 94.0 (111.7) million, mainly related to leasing liabilities. The committed revolving credit facility of EUR 250 million expiring in September 2024 was not in use at the end of December.

Return on capital employed, %

## Investments and development

TietoEVRY is seeking to achieve a growth rate of 5% by 2023. A significant part of the company's investments will be made in areas such as its own industry-specific software, data & analytics and cloud services.

TietoEVRY's offering development costs amounted to around EUR 127 (2020: 135 and 2019<sup>1)</sup>: 80) million, representing 4.5% (2020: 4.8% and 2019<sup>1)</sup>: 4.6%) of the Group's revenue. Of these costs, EUR 42.6 (51.0) million were capitalized.

Capital expenditure totalled EUR 80.8 (83.5) million, mainly consisting of investments in data centres and the capitalized costs for the development of software. Capitalized costs for industry-specific software amounted to EUR 42.6 (51.0) million. Capital expenditure represented 2.9% (3.0) of revenue.

<sup>1)</sup> Includes only development costs of Tieto

## Order backlog

The significance of traditional measures for the order backlog is impacted by the shift from traditional large outsourcing agreements towards agile methods and consumption-based business models. Additionally, traditional development programmes are cut into smaller projects. While this change in customer behaviour affects the order backlog levels, it is not expected to have any significant impact on TietoEVRY's market opportunities and business outlook.

TietoEVRY's order backlog amounted to EUR 3 513 (3 350) million at the end of December. Of the backlog, 50% (49) is expected to be invoiced during 2022. The order backlog includes all signed customer orders that have not been recognized as revenue, including estimates of the value of consumption-based contracts.

## Major agreements

TietoEVRY has signed a number of new agreements during the period with customers across all the businesses. However, according to the terms and conditions of these agreements, TietoEVRY is not able to disclose most of the contracts.

In January, Arva AS chose TietoEVRY as its partner to implement Microsoft Dynamics 365 business solutions as part of its ARVAnEXT initiative to become one of the most efficient energy companies in Norway. By virtue of its ability to attract leading talents in the market, nomination as Microsoft's Partner of the Year 2020 and industry knowledge, TietoEVRY as a leading player in the Nordics is in a unique position to help Arva realize its ambitions. This four-year agreement has a contract value of NOK 27 million and includes an option to extend the delivery by another two years.

In February, TietoEVRY and LocalTapiola signed a contract on new co-operation that expands the use of cloud services. In addition, TietoEVRY provides support to LocalTapiola within end-user services and application development. Moving to a public and multi-cloud environment supports the implementation of LocalTapiola's strategy and provides speed and flexibility to the company's business development. The three-year contract, including an option for a two-year extension, is worth EUR 45 million.

In February, KEHA Centre – the Development and Administrative Services Centre for the Centre for Economic Development, Transport and the Environment – chose TietoEVRY as its partner for development and expert services for extensive development packages. The aim is to modernize and streamline the case management of government agencies, as well as to make the daily life of citizens easier with more efficient services and better data utilization. The KEHA Centre procurement consisted of two separate tenders. It selected TietoEVRY as its main partner in permit and monitoring services.

In February, Systembolaget chose TietoEVRY as a partner in the roll-out of new hardware for around 2 000 point-of-sale equipment in 450 stores. The roll-out started in the second quarter and lasted until the fourth quarter of 2021. By replacing hardware, the customer can take full advantage of its new applications, including touch screens and better security, and at the same time manage the life cycle of its infrastructure. TietoEVRY and its subcontractors handled all logistics, installations and recycling of the current hardware.

In February, the municipality of Uddevalla signed an agreement with TietoEVRY for eCompanion, an end-to-end, user-friendly digital solution for municipal HR and payroll. The solution will be delivered as a cloud service that includes consulting and system support for all HR and payroll processes. The contract is valued at SEK 43 million and covers a period of 16 years, including optional year extension.

In March, Lyse decided to extend its agreement with TietoEVRY with another three years and an option for a further two years. TietoEVRY will transform Lyse to the new Hybrid Cloud (HlaaS), securing Lyse the best solution from both public cloud and private cloud and ensuring effective and smooth operation for end-users. TietoEVRY is providing Lyse with the full stack including infrastructure, consultancy, security, end user, data management, UX and ERP services. The agreement has a value of approximately EUR 18 million.

In March, Valmet Automotive, one of the largest vehicle contract manufacturers in the world, extended its agreement with TietoEVRY with the objective of modernizing Valmet Automotive's IT infrastructure. The contract period is four years and has an option of one additional year. The extension has an estimated value of over EUR 10 million.

In March, IF Insurance and TietoEVRY extended their collaboration into the application development and maintenance space. TietoEVRY was chosen as IF's partner to provide Cobol experts to secure the need for competences in business-critical applications in a technology area with scarce market availability. The agreement is estimated to be valid for over five years and have a value of approximately EUR 5 million.

In March, Ellevio and TietoEVRY concluded a software management agreement regarding TietoEVRY's energy utilities products. The agreement worth SEK 25 million is a continuation to their co-operation – TietoEVRY has been working with Ellevio on engineering data regarding Ellevio's customers and invoicing since 2019.

In April, TietoEVRY and DNB entered into a strategic agreement which will provide the client with innovative, future-oriented solutions and access to high-tech expertise that meets the needs of a modern and digital bank. The agreement represents a contract framework with a value of

around EUR 200 million over three years and serves to strengthen TietoEVRY's position as a leading Nordic supplier of banking technology.

In April, the Helsinki and Uusimaa Hospital District (HUS), the main hospital district in Finland, chose TietoEVRY to develop digital health services and the Digital Health Village project. The partnership aims to design better seamless web and mobile healthcare services for Finnish citizens. The e-Health services developed in 2020 include pandemic guidance for citizens and professionals on testing and vaccination, as well as the development of infection-tracking software. TietoEVRY is also a strategic partner for HUS in developing data-driven healthcare services, supporting preventive care and more comprehensive care overall. The contract is valid on an ongoing basis and has a maximum annual value of EUR 10 million. The procurement decision comes into effect at the end of the appeal period as set out in the Act on Public Procurement.

In May, TietoEVRY and Lowell, an international credit management company, decided to extend their partnership. Lowell has previously been utilizing TietoEVRY's Collection platform, which is now being transitioned to a software-as-a-service solution. With this new agreement, Lowell will be able to improve agility, time to market and efficiency by consolidating services and platforms across markets. They will also secure access to a scalable competence pool of people that can support them to better meet market needs. The agreement initially spans over three years and includes services for Lowell Sweden and Norway.

In May, TietoEVRY and The Farmers' Social Insurance Institution Mela signed a six-year contract on infrastructure services, including data centre services as well as back-up and cybersecurity services. In addition, the agreement covers load balancing, monitoring and data communication services. With this agreement, TietoEVRY provides Mela with high-quality, cost-efficient and reliable services supporting business operations.

In June, Visma Finance, one of the leading Nordic ERP providers, chose TietoEVRY's platform for factoring in Norway to be able to scale up its factoring operations in that market. The modular build of TietoEVRY's factoring platform will bring a new level of automation to their Norwegian operations, improving operational efficiency and the user experience.

Nordea has appointed TietoEVRY as the bank's provider of a complete set of payment card production and personalization services in Finland, Sweden and Norway. The agreement provides the bank's customers with quicker access to new card features provided by TietoEVRY,

such as cards made of sustainable material, eco-friendly designs, biometric fingerprint payments or metal cards. TietoEVRY makes use of its extensive partner network of card technology providers for the benefit of its issuer customers. The agreement runs for five years. Nordea's extensive card portfolio has already been successfully migrated to TietoEVRY's personalization sites in Finland and Norway in a very short period of time.

In June, TietoEVRY's Card Issuing and Financial Crime Prevention reached an important agreement with Bank Norwegian to follow the bank on their journey to Europe by expanding into Germany and Spain. Bank Norwegian's customers in those countries will get access to market leading credit cards, also covering fraud prevention. The agreement is an extension of their existing partnership, in which TietoEVRY is delivering state-of-the-art Software-as-a-Service (SaaS) card services to Bank Norwegian in Norway, Sweden, Finland and Denmark.

In June, Region Skåne prolonged its partnership with TietoEVRY in end-user services. TietoEVRY will continue to have the full responsibility for delivering all the services required for a modern workplace, including service desk and end-user support. Region Skåne is one of Sweden's largest county councils. The three-year contract is worth EUR 60 million.

In June, TietoEVRY entered into a strategic agreement with the Norwegian Oil and Gas Association (Norog) for the modernization and further development of License2Share. By adopting cloud solutions, modern collaboration technology and seamless integration with other digital work tools, the new solution will simplify the day-to-day work processes of more than 5 000 users across 500 exploration and extraction licences on the Norwegian continental shelf. By combining innovation with new technology, the new solution will also help increase knowledge sharing and will facilitate faster and better decisions.

In July, TietoEVRY concluded a continuation to a contract, initially agreed in 2015, with Valtori, the Finnish Government ICT Centre. The new agreement, covering data centre and capacity services, has a contract value of EUR 98 million.

In July, Telia Company and TietoEVRY concluded a multi-year agreement. TietoEVRY continues to serve Telia as a strategic IT partner, supporting the company in its digital transformation and cloud-first strategy.

In August, Aibel chose TietoEVRY to support its digitalization to further accelerate the transformation towards renewable energy solutions. The comprehensive technology agreement

with a contract value of around EUR 26 million covers infrastructure and cloud-based services in Europe, Singapore and Thailand. Modern and environmentally friendly technology from TietoEvry will ensure that Aibel will harness the potential of modern cloud solutions to facilitate innovation and provide a high degree of security and scalability.

In August, Ilmarinen, Finland's largest private earnings-related pension insurance company, and TietoEvry agreed on a strategic partnership in the area of insurance processes. The co-operation commenced in September and it will cover the development of insurance processes and related solutions as well as a wider scope of application maintenance services across a variety of Ilmarinen's other processes, and support functions. With this new partnership, TietoEvry commits to support Ilmarinen's business targets and holds the key role in the planning and implementing of the client's digitalization strategy.

In September, OP Financial Group and TietoEvry signed a multi-year agreement on renewal and modernization of application development, and maintenance collaboration in digital services. The agreement is valid for over five years and has a value of approximately EUR 16 million for maintenance services.

In September, TietoEvry announced that it will build an R&D centre in Nanjing, China. Through its extended competences and capabilities in China, the company aims to scale up its activities in the development of the latest Automotive, Smart Electronics, and Telecommunication Software technologies and related services. This establishment followed an extended partnership with Ericsson. Related revenue contribution started in November with 330 employees having joined the company. The two-year agreement represents value of around EUR 30 million.

In October, TietoEvry extended its collaboration with MedMera Bank through the deployment of advanced AI and Machine Learning solutions. The new technology supports fast, evidence-based decision-making based on profit scoring, which ultimately reduces customer churn.

In November, the City of Stockholm and TietoEvry concluded a long-term contract on next-generation IT services. The contract covers the development, administration and operation of IT systems. TietoEvry will provide the City of Stockholm with an IT environment covering state-of-the-art digital services, including automation and AIOps (AI within IT operations), to modernize an application and infrastructure landscape meeting high regulatory requirements and standards. The agreement initially runs for a period of seven years and includes options for

extension to a maximum of eight years. The agreement is expected to represent a potential total contract value of approximately SEK 4 billion over 15 years.

In November, SEB and TietoEvry prolonged their strategic collaboration within Cards. The agreement covers the production and personalization of cards for SEB Group in a cost-efficient and sustainable way for the Swedish, Norwegian, Finnish and Danish markets.

In December, Equinor, one of the long-term key customers in Digital Consulting in Norway, extended its partnership with TietoEvry even further. TietoEvry will deliver more services in new areas. The company's services strongly contribute to Equinor's business optimization, digitalization and ambitions for sustainable growth.

In December, Länsförsäkringar extended its collaboration with TietoEvry within card services. TietoEvry will deliver card services, including fraud detection and prevention, to Länsförsäkringar's banking and Wasa Kredit operations in Sweden. The contract is valued at over EUR 30 million and is an extension until the end of 2026.

In December, Bankomat and TietoEvry renewed their agreement on IT services for ATMs. This includes all Bankomat's ATMs and cash recyclers in Sweden. The ATM service delivery covers a wide range of services such as withdrawal and deposit of cash, cash administration, second-line maintenance of the ATMs and recyclers, first-line help desk for Bankomat's users, network services connecting all the ATMs and a cash depot system that was launched in 2021. The co-operation has been ongoing since 2011, and this extension is valid for three years until the end of March 2025 at a value of EUR 29.6 million.

In December, Systembolaget extended its strategic collaboration for TietoEvry to deliver IT operations, including infrastructure, service desk, application operations, CaaS (Client as a Service) and mobility services for Systembolaget in Sweden. The co-operation started in 2011 and the contract has now been prolonged until May 2025 at a value of EUR 28 million. With its simplified and reliable service delivery, TietoEvry will continue to support Systembolaget in its digital and sustainable transformation.

In December, Region Västernorrland renewed its collaboration with TietoEvry. Following a procurement process, TietoEvry was chosen to deliver services for data centres, communications and networks. These services cover core infrastructure, service desk, application operations and infrastructure consulting. The services help approximately 6 000

users in hospitals and health centres in all locations in the region, and are delivered primarily in the client's data centre. The contract with a value of approximately EUR 18 million is valid for four years and includes an option to extend by two years.

In December, The Finnish Posti Group and TietoEVRY signed a three-year contract covering a new SAP S/4HANA implementation on Microsoft Azure. The implementation will accelerate the client's digital transformation and bring scalability and flexibility to Posti's core business areas.

In December, Hospital District of Helsinki (HUS) and TietoEVRY agreed on continued support for HUS Health Village, a digital service platform for specialized health care that offers information and support to citizens, care for patients and tools for healthcare professionals. The platform has been produced in collaboration with experts and patients, making health care services available to everyone, regardless of where they live.

In December, TietoEVRY announced that it will help the city of Gothenburg drive for greener and fossil-free operations in an eight-year partnership. Göteborgs Stads Leasing (GSL) is driving change with the goal of transitioning the city's vehicles into a fully fossil-free fleet by 2023. With the migration to TietoEVRY's leasing and asset finance SaaS platform, GSL is provided with a modern scalable solution enabling highly automated processes and end-to-end support from TietoEVRY. The full-service contract is valid for eight years.

In December, TietoEVRY announced that the company was chosen by the Swedish Maritime Administration to implement and develop the client's ERP systems. TietoEVRY's private cloud solutions and expert teams will respond to the Swedish Maritime Administration's strict requirements for security and accessibility in all parts of its operations. The agreement with an estimated contract value of SEK 100 million initially covers six years and has an option to extend up to twelve additional years.

In December, the Norwegian Digitalization Agency (Digdir) chose TietoEVRY as a partner for its transition to a cloud-based architecture. TietoEVRY will deliver the scalability and flexibility Digdir requires for a future cloud-based operating platform, which will also be ready for operation in the public cloud. Digdir's joint solutions are part of the numerous business and public sector digital services that are critical for society. Digdir's ambition is to move the platform to the public Microsoft Azure within three years from the delivery date.

## Changes in Group structure

On 15 February 2021, TietoEVRY announced that it had reached an agreement with Aucerna, a Quorum Software affiliate, to sell its Oil & Gas software business. The conditions required to complete the divestment were fulfilled and the transaction was closed on 7 June. Revenue of the businesses to be divested amounted to around EUR 50 million in 2020 and the number of employees to around 430.

On 13 October 2021, TietoEVRY announced that it had signed an agreement to sell its software businesses Alystra, JydaCom and TRYGG/2000 to EG, a Nordic software company. Revenue of the businesses to be divested amounted to around EUR 13 million in 2020. The divestment was closed on 1 December.

## Branches

The Group has branches in France, Latvia, Norway, Ukraine and Sweden.

## Personnel

The number of full-time employees amounted to 24 389 (23 632) at the end of December. The number of full-time employees in the global delivery centres totalled 12 197 (11 225), or 50.0% (47.5) of all personnel.

The 12-month rolling employee turnover stood at 14.6% (9.7) at the end of December. Group-level salary inflation is expected to be around 3% on average in 2022. Salary inflation is partly offset by price increases in some service areas, offshoring and management of the competence pyramid.

### Group personnel and remuneration

	2021	2020	2019
Number of full-time employees, 31 December	24 389	23 632	24 322
Average number of full-time employees	23 824	23 788	15 950
12-month rolling employee turnover, %	14.3	9.7	12.6
Employee benefit expenses, EUR million	1 527	1 486	990

Following the year of integration, 2021 has been a year of building on the foundations of future success – and the common culture. In this year marked by the pandemic, the company continued to focus on the well-being of employees. TietoEVRY has successfully adopted new hybrid ways of working – a combination of working remotely and from the office, and launched Hybrid Working Guidelines during the year.

TietoEVRY's Human Resources (HR) function is facilitating and enabling the development of our workforce. It also ensures that the company's practices and employee experience improve along with market change. The function is led by our Chief HR Officer, while the HR leads are responsible for country-specific and business-specific HR operations.

The company supports freedom of association and collective bargaining as defined in the International Labour Organization's Declaration on Fundamental Principles and Rights at Work and stated in TietoEVRY's Code of Conduct. In addition, the company supports and respects the principles set out in the United Nations' Universal Declaration of Human Rights.

European Works Councils (EWC) are bodies representing European employees. TietoEVRY's management works constructively with the employee organizations through both the EWC and local works councils and unions to consult on any significant decision at a European level.

TietoEVRY invests in the competence development of its employees. Curiosity and lifelong learning are crucial aspects of the company's culture and success. During 2021, TietoEVRY launched a new development and performance management framework, MyGrowth, to drive personal and professional growth by focusing on dynamic goal setting and continuous feedback.

Employee engagement activities are followed up through OurVoice, an employee engagement survey where employees give feedback in key areas. The result of the TietoEVRY Engagement Index was 78/100, up from 76 in 2020. Following the strategy update during the year, understanding of the direction as a company was one of the categories that improved during the year.

Diversity and inclusion is a key area in TietoEVRY's long-term sustainability plan. The Code of Conduct and the Diversity and Inclusion Charter outline the principles for diversity and inclusion at TietoEVRY. Each manager is responsible for ensuring diverse teams, which includes a balanced gender composition that reflects the markets TietoEVRY operates in, as well as for engaging their team members to promote inclusive behaviour.

Talent acquisition is based on a global talent pool and, additionally, the company aims to ensure a good blend of age groups. TietoEVRY's aspirational goal is to have 40% female employees by 2026 and an equal gender split by 2030. The company successfully increased the percentage of female applicants in the Nordics. The share of female employees of the workforce was 29% and the share of females hired was up by 4 %-points. The Group Executive Management is provided with quarterly updates on development within prioritized areas and specific targets set as part of the inclusion and diversity charter.

TietoEVRY contributes to transparency in gender equality by participating in the SHE Index, a voluntary measurement of how companies perform on gender balance, gender equality policies, and diversity and inclusion. Since 2020, TietoEVRY has been included in the index for Norway. During 2021, Sweden and Finland have also been included.

## Personnel by country

- Norway 18%
- Sweden 18%
- India 19%
- Finland 13%
- Czech Republic 10%
- Ukraine 9%
- Latvia 4%
- Poland 3%
- China 3%
- Other 4%

## Non-financial information

This section describes TietoEVRY's sustainability activities as required in Chapter 3a of the Finnish Accounting Act on non-financial information (NFI). The linkages between NFI areas and TietoEVRY's sustainability focus areas are identified in the chart describing policies and processes. More information is available in the Sustainability Report, assured by an external partner.

### Description of TietoEVRY's business model

TietoEVRY is one of the largest digital services and software companies in the Nordics. The company's value-adding services comprise new data-driven and cloud-native services, business-critical software solutions, managed services, product development services and related capabilities to support customers' business renewal, innovation and efficient operations. TietoEVRY's role varies from consulting and advisory, designing and building solutions to running IT operations. Our ambition is to co-create new solutions and innovate new data-driven business models with our customers and partners. Value creation and competitiveness are based on solutions combining best-of-breed technologies with integration capabilities, industrialized service delivery and strong global delivery capability.

To capture the momentum of the cloud-native and software market, TietoEVRY has established six specialized end-to-end businesses, effective from 1 January 2022. These businesses have full operational responsibility, including go-to-market, service portfolio, investments and partnerships. Built on the solid foundation of the current service lines, these businesses are: TietoEVRY Create, TietoEVRY Transform, TietoEVRY Connect, TietoEVRY Banking, TietoEVRY Care and TietoEVRY Industry.

### Description of management of NFI topics

TietoEVRY's sustainability work is facilitated by the company's Sustainability Team and supported by the Sustainability Steering Group, chaired by the Vice President, Communication and Sustainability. The Sustainability Steering Group advises the Group Executive Management and Board of Directors and approves the sustainability section of the integrated annual report. The Sustainability Steering Group represents different functions and units of TietoEVRY, and many of

its members are part of the Group Executive Management. TietoEVRY's management and the Board of Directors formally reviewed sustainability matters on two occasions during 2021. The topics included a review of the sustainability strategy 2023, review of NFI information, including sustainability-related risks and the company's societal engagements in 2021, among other things. Operational and business-oriented sustainability topics are delegated to TietoEVRY's Sustainability Steering Group, which meets on a bimonthly basis.

In 2020, TietoEVRY launched its sustainability strategy 2023. A materiality analysis was used to identify and prioritize the most important topics; this analysis forms the basis of our sustainability strategy and sustainability reporting in accordance with GRI Standards, option Core.

The sustainability strategy is twofold: part of it focuses on the continuous development of the company's responsible operations and the other part on the business impact opportunities we have with our customers. Responsible operations consist of three key themes – climate action, ethical conduct and exciting place to work. Each responsible area has publicly stated goals, and their action plans, implementation and reporting are run by nominated responsible area owners and data partners. The goals and results for responsible operations in 2021 are presented in the table in this section. The business impact opportunities include a range of solutions and services that can improve our customers' sustainability performance and create a positive impact for society. These business opportunities are driven by our cross-service line network consisting of sustainability and technology consultants.

During 2021, the work towards the goals defined in the sustainability strategy continued according to our plan. The pandemic has had no material adverse impact on the company's ability to pursue its sustainable development. The work has continued in the flexible hybrid working mode adopted during the year.

The sustainability strategy 2023 is managed according to TietoEVRY's sustainability management process, which follows the United Nations Global Compact Management Model and GRI Standards. Linkages to United Nations Sustainable Development Goals, which are considered a strategic tool enabling corporations to contribute to a more sustainable society, are established by applying principled prioritization. The management of the responsible areas – including

policies, processes, due diligence and escalation channels – is illustrated in the chart in this section.

Tietoevry’s ethical guidelines are summarized in the Code of Conduct Policy, which applies to all Tietoevry employees, and a separate Supplier Code of Conduct Rule applied to any third party contributing to the company’s services, products and other business activities. Both documents are based on the United Nations Global Compact, OECD Guidelines for Multinational Enterprises, ILO Declaration on Fundamental Principles and Rights at Work, the International Bill of Human Rights, UN Rio Declaration on Environment and Development, the UN Convention against Corruption, UK Bribery Act, and US Foreign Corrupt Practices. The policies cover all responsible areas, which are also linked to other, topic-specific policies and more detailed rules. The policies cover the relevant legal, certification and other best practice requirements and are reviewed annually.

Tietoevry has a group-wide whistleblowing channel which is also available on the company’s external website. Whistleblowing notifications concerning matters such as possible Code of Conduct violations are investigated by the Group Compliance Officer confidentially through a predefined process. Cases of a severe or sensitive character can also be referred to the Escalation Committee, which consists of the Group Compliance Officer, Head of Corporate Governance and Compliance, Head of Legal, Head of Internal Audit and Head of HR. If a whistleblower notification relates to managers who are members of Group Executive Management, including the CEO, the Chair of the Audit and Risk Committee of the Board of Directors shall be informed. If a whistleblower notification involves managers who directly report to Group Executive Management, the CEO shall be informed.

In the case of serious or specifically sensitive whistleblowing cases, the Group Compliance Officer shall prepare a report for submission to the Audit and Risk Committee. For each such case, the Escalation Committee shall consider whether the CEO or Board of Directors should also be informed. Bi-annual reports shall be prepared for the Audit and Risk Committee covering aggregated information about notifications received through the whistleblowing channel, cases under investigation, cases closed, and rectifying measures taken. In addition, responsible areas have separate channels for incident reporting and continuous improvement.

## Main risks of negative impacts in the operating environment

The aim of Tietoevry’s internal control framework is to assure that operations are effective and well aligned with the strategic goals. This also includes identifying the potential negative impacts the company might have on its operating environment and escalating its mitigation measures if necessary. The internal control framework is intended to ensure correct, reliable, complete and timely financial reporting and management information. The framework endorses ethical values, good corporate governance and risk management practices. Risk management and major risks are described in detail in the Corporate Governance Statement.

Tietoevry uses systematic risk management to develop the efficiency and control of business operations as well as their continuity and profitability.

The risk management framework consists of the risk management organization, related policies, processes, tools and common ways of working. The risk management organization develops and maintains the company’s risk management framework, including risk reporting, risk management governance and follow-up of risk exposures consisting of strategic, financial, operational and compliance risks.

The risk management organization consists of the Corporate Risk Management unit and nominated Risk Managers in the business units. A group-wide Risk Manager Forum has been established for information sharing, setting direction for risk management, collaboration between units and reviewing steering documents. In addition, the forum co-ordinates Group-wide risk management activities and ensures company-wide deployment of the risk management framework.

Tietoevry defines its sustainability risks as the negative impact on people and the planet that might be caused by our activities within our organization or the value chain. Sustainability risks include a reputational factor, which in addition to negative publicity could lead to a decrease in scores in sustainability indices and deviations from audits conducted by independent parties. Severe breaches in these areas could also lead to loss of customers’ trust and the imposition of penalties.

Failing to comply with regulations, such as GDPR, may subject the company to regulatory interventions or penalties, or sanctions from customers.

Fraudulent, unethical, or even illegal actions by individuals in areas such as corruption or conflict of interest can occur if the company controls are not adequate or anticorruption awareness and team culture are not at a sufficiently high level. Such situations can have negative consequences ranging from disqualification from public tenders to sanctions. Compliance training, improvements of controls, audits and follow-up are used to mitigate these risks.

Stress-related health issues as well as discrimination and harassment are human and labour rights-related risks. Working proactively to mitigate these risks is essential, and we have a systematic approach to this, including our whistleblowing channel and regular employee surveys to monitor employee satisfaction and engagement. From an operational perspective, deliveries could be compromised if key resources go on long sick leaves. Employee health, safety and well-being have been addressed especially due to the ongoing Covid-19 pandemic. All employees were invited to co-create the future ways of working for the company through virtual ideation. The global and local hybrid working guidelines provide clarity on matters such as the support available for good working conditions.

Both health issues and discrimination and harassment can lead to environments where employees are unable to reach their full potential. Tietoevry believes that diversity in personnel, whether in terms of gender, age or cultural background, is needed to stay competitive in the fast-paced technology industry. Diversity and inclusion are therefore an integral part of the company's culture as well as human resources activities.

Tietoevry's supplier base consists of direct and indirect suppliers. We are aware that our supply chain might include risks related to the environment, human and labour rights or even corruption. Our ambition is to ensure a fair and green supply chain in which we neither cause nor contribute to negative impacts on people and the planet. Severe breaches against international conventions in the supply chain could lead to customers deciding to terminate contracts or sanctions from authorities. Tietoevry mitigates these risks through its supplier sustainability programme and onboarding practices, consisting of both compliance and audit activities. As there have been limited possibilities to carry out on-premises audits of our suppliers during the pandemic, we have provided training focusing on the key elements of our Supplier Code with selected suppliers.

Environmental risks are identified and handled within Tietoevry's Environmental Management System and include, for example, risks related to our offices, equipment, waste handling and business travel. The environmental aspects and associated impacts are assessed two times a year. Environmental risk analysis describes how significant environmental aspects are identified, evaluated, and summarized in an environmental matrix – that is, the environmental aspect register. Environmental aspects can create both risks and opportunities impacting Tietoevry's overall performance. Proper handling of these issues is a prerequisite for the ISO certificate (ISO14001) and our attractiveness as a supplier, partner and employer.

We strive to mitigate our contribution to climate change by means such as reducing our own carbon emissions, increasing energy efficiency and helping our customers to reduce their carbon emissions through our technology solutions. During the year, we have aligned our emission reduction ambitions with Science Based Targets and are waiting for formal validation by the Science Based Targets initiative.

Physical climate change impacts such as changes in precipitation, snow and ice, sea level rise, hurricanes, and cyclones as well as access to natural resources may have an impact on Tietoevry or on strategic partners in our supply chain. Geotechnical assessments are part of the preliminary work prior to any new construction of offices and datacentres. Back-up centres ensure continuity of customer operations even when climate change has severe consequences. During 2021, Tietoevry initiated a process to review sustainability-related risks and their management with the aim of ensuring that the processes and procedures are up-to-date.

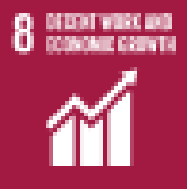

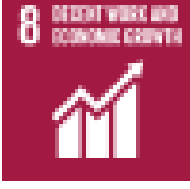

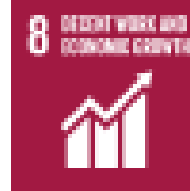

## Policies and processes on NFI matters

	Ethical conduct	Climate action	Exciting place to work

## Goals and results for each sustainability area

Responsible area	Goal	Result 2020	Result 2021	UN Sustainable Development Goal
<b>ETHICAL CONDUCT</b>				
Human rights	2021: Conduct a formal Human Rights Impact Assessment for a business entity	Assessment to be conducted in 2021	Corporate-wide Human Rights Impact Assessment initiated during FY21	  
Cybersecurity and privacy	2023: Zero substantiated complaints concerning breaches of customer privacy and losses of customer data <sup>1)</sup>	Zero	Zero	
Business ethics and anti-corruption	2023: 90% completion of ethics training (CoC e-learning) <sup>1)</sup>	91%	93%	  
	2023: 100% confirmation of receipt of a whistleblowing notification within four business days of receipt	100%	100%	
Responsible sourcing	2023: 100% of new or renewed suppliers agreeing to TietoEVRY's Supplier Code of Conduct <sup>2)</sup>	100%	99%	  

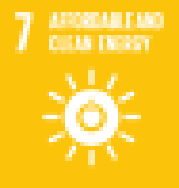

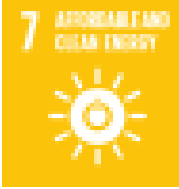

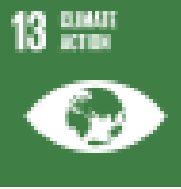

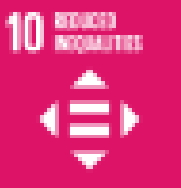

<sup>1)</sup> Measured on an annual basis

<sup>2)</sup> Scope: Agreements made through Procurement function. Note that scope also includes supplier's versions of Code of Conducts agreed by our Head of Sustainability.

<sup>3)</sup> Baseline FY20.

<sup>4)</sup> Scope: result based on reuse of returned devices (mainly laptops). Data accuracy: data is based on our main hardware supplier's reports. This supplier provides close to 75% of our devices.

Responsible area	Goal	Result 2020	Result 2021	UN Sustainable Development Goal
<b>CLIMATE ACTION</b>				
Energy usage and GHG emissions	2023: 80% reduction of scope 1 and 2 GHG emissions by 2023 <sup>3)</sup>	Baseline is FY20 and reductions against baseline will be available from 2021	44% reduction	 
	2023: 100% carbon free electricity in all data centers and offices	80%	92%	 
Circular economy practices	2023: 100% reuse and recycling of hardware <sup>4)</sup>	Baseline set during FY21	Internal: 70% Customer: 86%	
<b>EXCITING PLACE TO WORK</b>				
Diversity and inclusion	2026: 40% female employees by 2026, 2030: 50% female employees by 2030	29% female employees	29% female employees	 
Employee experience	2023: Employee engagement score >75	76/100	78/100	

<sup>1)</sup> Measured on an annual basis

<sup>2)</sup> Scope: Agreements made through Procurement function. Note that scope also includes supplier's versions of Code of Conducts agreed by our Head of Sustainability.

<sup>3)</sup> Baseline FY20.

<sup>4)</sup> Scope: result based on reuse of returned devices (mainly laptops). Data accuracy: data is based on our main hardware supplier's reports. This supplier provides close to 75% of our devices.

## EU Taxonomy reporting

### Mobilizing sustainable investments towards a low-carbon and resilient economy

The European Union has set a clear target of becoming the world's first climate-neutral continent by 2050. The digital transition as well as smarter and greener use of technologies are described as key enablers for achieving this.

To support investment into sustainable projects, the EU has launched a classification system for sustainable business activities, the EU Taxonomy. By establishing a common language between investors, issuers, project promoters and policy makers, the taxonomy aims to help navigate the transition towards a low-carbon, resource-efficient and resilient economy.

In June 2021, the European Commission formally adopted the Climate Delegated Act, containing the two first environmental objectives: climate change mitigation and climate change adaptation. The remaining four objectives are expected to follow in 2022.

Companies that fall under the EU's Non-Financial Reporting Directive must report how well their operations match the current scope of the EU Taxonomy – that is, whether they are taxonomy eligible – already for the financial year 2021. Taxonomy eligibility means that the activity is described in the taxonomy and that a certain activity might make a substantial contribution to at least one of the six environmental objectives of the taxonomy.

For the reporting of the financial year 2022, for an activity to be classified as environmentally sustainable, it must be taxonomy aligned, that is, comply with technical screening criteria for that specific activity. According to technical screening criteria, an activity should substantially contribute to at least one environmental objective, avoid causing significant harm to any of the other five objectives and comply with minimum safeguards.

For 2021, TietoEvry is obliged to disclose the proportion of taxonomy-eligible and taxonomy non-eligible activities in Group-level revenue, capital and operating expenditure, as well as provide qualitative information relevant for these disclosures.

### TietoEvry's offerings fully in the scope of the taxonomy – 20% of revenue eligible

TietoEvry has implemented the requirements of the EU Taxonomy Regulation in its reporting for 2021. As a first step, an assessment was done to conclude whether TietoEvry's operations were in the scope of the current taxonomy. The assessment concluded that all the company's operations were in the scope, primarily under sector 8 Information and communication. A majority of the company's offerings fall under economic activities 8.1 Data processing and hosting and related activities (climate change mitigation) and 8.2 Computer programming, consultancy and related activities (climate change adaptation).

The European Commission's notice draft on the interpretation, published on 2 February 2022 has not been taken into consideration.

#### Taxonomy-eligible KPIs in 2021 for the first two environmental objectives

	Total (EUR million)	Proportion of taxonomy-eligible economic activities (%)	Proportion of taxonomy non-eligible economic activities (%)
Revenue	2 823.4	20.2	79.8
Capital expenditure	128.1	98.7	1.3
Operating expenditure	90.0	99.8	0.2

### ACCOUNTING POLICIES FOR EU TAXONOMY REPORTING

The required key performance indicators have been determined based on the company's financial reporting prepared in accordance with IFRS. Further details about the Group's accounting policies are described in the notes to the consolidated financial statements.

#### Revenue

At Group level, revenue comprises reportable segments' revenue. Segment reporting is prepared according to IFRS accounting principles. To assess the proportion of eligible revenue, an identification process for eligible revenues was established. A Group-wide decision was taken to assess TietoEVRY's revenue on an aggregated lead offering level, which is a key dimension in the company's internal operative accounting. This decision was made to ensure tracking of revenue streams in a consistent way throughout the organization. However, this also meant that some solutions and services below the lead offering level, if analysed individually, might have eligible revenues that are now not identified in this taxonomy reporting. Revenue for such solutions and services represents a smaller proportion and is therefore not deemed to be material this year. Approaching the reporting through the assessment of each lead offering also meant that there was no risk of double counting when producing the simplified reporting required for 2021.

### Capital expenditure

Capital expenditure is defined as additions to tangible and intangible assets during the financial year considered before depreciation, amortization and any remeasurements (including those resulting from revaluations and impairments) and excluding fair value changes. It also includes additions to right-of-use assets from lease contracts.

Capital expenditure in this taxonomy reporting section includes additions to right-of-use assets, reported in [Note 20](#) in the Financial Statements, while this is excluded from capital expenditure presented in the Group's key figures in this Report by the Board of Directors. The share of capital expenditure related to support functions has not been assessed due to its low materiality and is fully excluded from this calculation. Identification of eligible capital expenditure was made based on Group-level reporting and thus there was no risk of double counting when producing the simplified reporting required for 2021.

### Operating expenditure

Operating expenditure is defined as expenditure related to research and development, building renovation measures, short-term lease, maintenance and repair, and any other direct expenditures relating to the servicing of assets of property, plant and equipment by TietoEVRY or a third party to which activities are outsourced as necessary to ensure the continued and effective functioning of such assets. Only direct costs are included.

Operating expenditure consists of the following items

- expensed offering and internal development for eligible activities. In the financial reporting, related costs are included in employee benefit expenses
- costs for maintenance and short-term lease. In the financial reporting, related costs are included in other operating expenses.

The share of operating expenditure related to support functions has not been assessed due to its low materiality and is fully excluded from this calculation. Identification of eligible operating expenditure was made based on Group-level reporting and thus there was no risk of double counting when producing the simplified reporting required for 2021.

### Taxonomy-eligible revenue

TietoEVRY has great potential to facilitate customers' transition to a low-carbon and circular economy. However, while the company's products and services have positive effects on environmental sustainability, climate change mitigation or adaptation is not the predominant aim of many offerings, or at the core of services and solutions in the manner expected in the taxonomy regulation for eligible activities. Therefore, only a smaller portion of TietoEVRY's revenue is considered eligible. Most of the eligible revenue comes from infrastructure services, considered under activity 8.1 Data processing and hosting and related activities. Some taxonomy-eligible revenue for the environmental objective of climate change mitigation is also generated by selected software-based solutions.

For activities in the scope of the environmental objective of climate change adaptation, only the expenditures related to making the activity climate resilient are included in the KPIs, not the revenue. At TietoEVRY, as the objective of increasing customers' resilience to physical climate risks is not at the core of offerings, no revenue is currently eligible for economic activities contributing to climate change adaptation.

TietoEVRY's revenue in 2021 amounted to EUR 2 823 million, of which the proportion of taxonomy-eligible revenue was 20.2%.

### Taxonomy-eligible capital expenditure

For the financial year 2021, TietoEVRY has considered all capital expenditure related to offerings in the taxonomy scope (i.e. eligible activities) as eligible. Capital expenditure amounted to EUR 128.1 million, comprising EUR 80.8 million in additions to tangible and intangible assets (see [Notes 11](#) and [12](#) to the Financial Statements) and EUR 47.3 million in additions to right-of-use assets (see [Note 20](#) to the Financial Statements). The proportion of taxonomy-eligible capital expenditure was 98.7%. The share mainly consists of capitalized investments related to eligible activities, including data centres and the development of software, which are IPR of TietoEVRY. Furthermore, expenditure for right-of-use assets in eligible activities is included and mainly relates to the company's premises, vehicles and data centre equipment.

### Taxonomy-eligible operating expenditure

For the financial year 2021, TietoEVRY has considered all operating expenditure related to offerings in the taxonomy scope (i.e. eligible activities) as eligible. Operating expenditure amounted to EUR 90.0 million, comprising expensed offerings and internal development as well as short-term lease and maintenance costs. The share of taxonomy-eligible operating expenditure was 99.8%.

### Going forward

Going forward, TietoEVRY seeks to analyse its offerings on a more granular level. Also, preparations for the second delegated act for the remaining four environmental objectives, which are to be published by the EU during 2022, have been initiated. To be able to comply with the reporting requirements in 2022, the fulfilment of technical screening criteria regarding substantial contribution, followed by criteria for doing no significant harm and minimum social safeguards need to be further assessed. Alignment assessment has already been initiated and actions taken to ensure fulfilment. TietoEVRY will furthermore assess the possibility to increase its share of eligible and aligned revenue in the future.

Mitigation and the ability to adapt to climate change are growing in importance and impacting customers' decision making. To support this development, TietoEVRY aims to improve the quantification of the environmental impacts of its services and solutions.

## Shareholders' meetings

TietoEVRY Corporation's Annual General Meeting held on 25 March approved the financial statements 2020 and discharged the company's officers from liability for the financial year 2020. The meeting also approved the Remuneration Report. The Annual General Meeting decided on a total dividend of EUR 1.32 per share, paid in two instalments.

The Board's prior members Tomas Franzén, Salim Nathoo, Harri-Pekka Kaukonen, Timo Ahopelto, Rohan Haldea, Liselotte Hägertz Engstam, Katharina Mosheim, Niko Pakalén, Endre Rangnes and Leif Teksum were reelected to the Board, and Angela Mazza Teufer was elected as a new member. Tomas Franzén was elected as the Chairperson of the Board of Directors.

## Shareholders' Nomination Board

The composition of the Shareholders' Nomination Board for TietoEVRY Corporation was determined based on holdings on 31 August 2021 in the Finnish, Norwegian and Swedish shareholders' registers and received evidence thereof. The shareholders who wished to participate in the work of the Shareholders' Nomination Board nominated the following members:

- Petter Söderström, Investment Director, Solidium Oy
- Gustav Moss, Vice President, Cevian Capital AB
- Alexander Kopp, Investment Manager, Incentive AS
- Mikko Mursula, Deputy CEO, Ilmarinen Mutual Pension Insurance Company and
- Tomas Franzén, Chairperson of the Board of Directors, TietoEVRY Corporation.

## The Board of Directors

31 December 2021<sup>1)</sup>

Name	Born	Nationality	Education	Main occupation
Tomas Franzén (Board and RC Chairperson)	1962	Swedish	MSc. (Eng.)	Professional Board member
Timo Ahopelto (Deputy Chairperson) <sup>2)</sup>	1975	Finnish	MSc. (Tech.)	Entrepreneur, investor and professional Board member
Harri-Pekka Kaukonen (ARC Chairperson)	1963	Finnish	DSc. (Tech.)	Professional Board member
Liselotte Hägertz Engstam	1960	Swedish	MSc. (Civ. Eng.)	Expert advisor, professional Board member
Angela Mazza Teufer <sup>3)</sup>	1973	Italian and Swiss	Master of Business Adm.	Managing Director, Ambulatory Information Systems DACH
Katharina Mosheim	1976	Austrian	Ph.D. (Econ.)	CEO, Alpha Pianos AS
Niko Pakalén	1986	Finnish and Swedish	MSc. (Econ.)	Partner, Cevian Capital AB
Endre Rangnes	1959	Norwegian	BBA (Econ.)	CEO, Zolva Group, professional Board member
Leif Teksum	1952	Norwegian	MSc. (Econ.)	Partner, Vest Corporate Advisor AS, professional Board member
Tommy Sander Aldrin (personnel representative)	1965	Norwegian	BSc. (Comp.)	Chief Consultant
Ola Hugo Jordhøy (personnel representative)	1956	Norwegian	MSc. (Eng.), PGCE	Chief Consultant
Anders Palklint (personnel representative)	1967	Swedish	MSc. (Eng.)	Senior Project Manager
Ilpo Waljus (personnel representative)	1974	Finnish	BBA	Test Manager

<sup>1)</sup> During 2021, Salim Nathoo (until 19 July) and Rohan Haldea (until 7 September) also served as Board members.

<sup>2)</sup> Deputy Chairperson as of 25 March 2021. Salim Nathoo was the Deputy Chairperson until 24 March 2021.

<sup>3)</sup> Board member as of 25 March 2021.

## The President and CEO and operative management

### Members of the Leadership Team as at 31 December 2021<sup>1)</sup>

**Kimmo Alkio**

President and CEO

Born: 1963

Nationality: Finnish

Education: BBA and Executive MBA

Joined TietoEVRY in 2011

**Malin Fors-Skjæveland**

Integration Officer

Education: MSc. (Pol. Sci.)

Joined TietoEVRY in 2015

The remuneration and more detailed background information, such as full CVs of the Group Leadership, are presented on the company's [website](#).

<sup>1)</sup> Karin Schreil acted as Managing Partner, Sweden until 30 November 2021.

## Auditors

The ARC prepares a proposal on the appointment of TietoEVRY's auditors, which is then presented to the Board of Directors and finally to the AGM for its decision. The compensation paid to the auditors is decided by the AGM and assessed annually by the ARC.

The Board of Directors proposes to the AGM, in accordance with the recommendation of the ARC, that the auditor to be elected at the AGM 2022 be reimbursed according to the auditor's invoice and in compliance with the purchase principles approved by the Committee.

The Board of Directors proposes to the AGM, in accordance with the recommendation of the ARC, that the firm of authorized public accountants Deloitte Oy be re-elected as the company's auditor for the financial year 2022. The firm of authorized public accountants Deloitte Oy has notified that APA Jukka Vattulainen will act as the auditor with principal responsibility.

## Auditing

The AGM 2021 elected the firm of authorized public accountants Deloitte Oy as the company's auditor for the financial year 2021. Deloitte Oy notified the company that Authorized Public Accountant Jukka Vattulainen acts as principal auditor.

In 2021, TietoEVRY Group paid the auditors a total of EUR 1.3 (1.3) million in audit fees, and a total of EUR 0.5 (0.7) million for other services.

## Major risks

TietoEVRY has five risk categories: strategic, operational, financial, people, and compliance risks.

Strategic risks are related to market volatility, IT market transformation to new technologies (including the rapid digitalization and automatization of society), change management, reskilling ability and speed, ability to respond to competition and new entrants in the market, dependencies on few big customers in some business areas and ensuring delivery quality in the dynamic business environment.

Operational risks refer e.g. to changing the business model in business units, risk and continuity management, customer bidding and requirement analysis, and maintaining a high professional standard in delivery management and quality assurance.

Financial risks mainly consist of credit risks, currency risks, interest rate risks, and funding and liquidity risks.

Compliance risks are connected to the organization failing to recognize or meet the requirements in the areas of legislation or other mandatory regulation (e.g. General Data Protection Regulation (GDPR), Schrems II, anti-corruption, anti-bribery, insider matters, sanctions and trade compliance), internal policies and rules or ethics and integrity.

People risks can be driven by TietoEVRY's needs to build a market leading workforce for high performance in terms of delivering projects and customer services; people risks are also related to quality of life, human rights, and the safety of people.

Risks are aggregated by utilizing the corporate GRC platform, resulting in risk maps and Risk KPIs that are reviewed by leadership teams in the units and the ARC. TietoEVRY's major risks and the measures for their mitigation are described below.

### Market volatility

Changes in the Nordic core markets have a direct effect on market conditions and result in volatility that might have a negative impact on Nordic market growth. Changes in the economic environment and customer demand can affect both business volumes and price levels, which might result in lower revenue or slower revenue growth than expected.

These potential risks are mitigated through multi-year contracts for continuous services. TietoEVRY also aims to maintain long-term business relations and to be a preferred supplier to its customers. The company executes tight cost and investment control with continuous investment performance monitoring, accompanied with a clear structure for decision rights, which are defined in the Decision Making Authority (DMA) Policy.

Global service capabilities, cross-selling and tough price competition are the main drivers in the IT sector for the development of the global delivery model. TietoEVRY's position as a leading IT service provider in the Nordics is supported by existing and enhanced competencies, and by the choice of right partners.

### Change and transformation

TietoEVRY announced its new strategy to drive customer value and growth through specialization. The technology industry is being reshaped with cloud as the foundation, providing expansion opportunities for the company. Expansion will focus on cloud-native services, data & software engineering and scalable software businesses. In managed application and infrastructure services, the company will seek partnerships to invest and build scale.

In large-scale adaptation to the market by organizational transformation and right-sizing, resistance to change can prolong the transition, which may affect operational efficiency.

Change management is steered by the company-wide Program Management Office, which provides standard tools and systems for the change, including communication, target setting and training for the New Strategy implementation.

The Group Project Excellence unit sets common standards for project management to ensure proper project risk management and compliance in project financials management and follow-up.

Sudden changes in the market environment, customer demand and customer strategies or the competitive landscape in these areas might harm TietoEvry's operations and profitability. To diversify the business, TietoEvry provides services to several different industries and markets. The company develops its business mix to provide new industry software solutions, digital consulting, new hybrid cloud solutions and broader R&D capabilities to strengthen its position amongst both current and new customers. An industrialized and standardized way of providing services and solutions, employing automated processes, improves competitiveness and reduces risk.

## Service continuity

Close to 100% availability of the services is the basis of trust among customers, stakeholders and society.

A service continuity disruption can be caused, for instance, by hardware or software failures, power outages, natural disasters and different types of intentional or unintentional actions by people.

Risks related to malfunctions of systems could seriously affect TietoEvry's ability to provide its services and have an adverse impact on the company's financials and reputation. Thus, business continuity planning is a high priority in TietoEvry's operational management in order to ensure that redundancy and fault tolerance are at the appropriate level.

To reduce the service continuity risk and to better understand the interdependencies in solutions and data centers, TietoEvry constantly reviews, maintains and improves its IT asset management, configuration management and monitoring systems. In addition to a balanced global portfolio, TietoEvry has recovery procedures and backup systems in place to handle

potential service interruptions. Root cause analysis, best practices and experiences from previous incidents help in preparing for and mitigating the service continuity risk.

Also, a comprehensive and robust Major Incident & Escalation process and crisis management process reduce service interruptions.

## Cybersecurity

TietoEvry's business operations involve processing and storing large amounts of confidential data of public and private sector customers, business partners and own data, including sensitive personal data.

The threat landscape is constantly growing and evolving – e.g. criminal hackers, hacktivists, human errors or misconduct, and state-sponsored organizations – and may cause malfunctions or cybersecurity breaches of information against TietoEvry, its customers, subcontractors or other third parties.

At least the following threats are risk factors that could lead to loss, misuse, destruction of data or system malfunction, compromising TietoEvry's ability to support, manage or develop services:

- Enterprise ransomware
- Supply chain attacks
- Critical vulnerabilities
- Targeted attacks
- Digital fraud
- Denial of service attacks
- Data breaches and data leaks
- Insider threats

Such events could have an adverse impact on the company's financials and reputation.

To detect and investigate cybersecurity incidents, TietoEvry has implemented a comprehensive and robust Major Incident & Escalation process, a crisis management process as well as efficient cybersecurity defence with high-class detection and response capabilities to reduce service interruptions.

We regularly review our risk management and cybersecurity framework, train our employees to increase their awareness of cyber threats and continuously measure our cybersecurity maturity.

## Quality costs related to customer bidding and delivery management

Inability to appropriately understand and analyse customers' changing needs, their business processes and the exact requirements can lead to misjudgements in setting the scope of projects or services and, consequently, difficulties in meeting the specifications of customer agreements.

TietoEVRY is committed to actively verifying that business processes from sales to delivery are designed, implemented and embedded to deliver customer value and actively mitigate end-to-end risk exposure along full contract life cycles. Internal and external quality assessments and audits are used to verify the effectiveness and efficiency of ways of working as well as to control the quality of outcomes through measurable and actionable KPIs (Key Performance Indicators) and key controls. At the same time, customer feedback management is an integral part of how we drive performance and safeguard quality assurance at both the operational and strategic level. As part of this, we actively ask customers for feedback to understand how well we perform individual deliveries. In addition, we engage with customers to understand how well we support them in meeting their changing business objectives through our portfolio of deliveries. Insights and actions resulting from customer feedback are prioritized and followed up regularly at all levels of the organization and integrated into change management efforts.

## Retention and attrition of employees

The competition in the market and demand for new services require ability and speed to reskill, attract new and retain existing competences and business knowledge for new services, new service models and offerings. TietoEVRY's success builds on attracting talent, skills renewal, business knowledge and the maturity of the organization.

Inability to retain key employees and to recruit new talent with the required competence might have a negative impact on the company's performance. High employee turnover might also cause delays in customer projects, leading to penalties or loss of customers.

To reduce these risks, TietoEVRY implements unified delivery models across sites and offers its employees challenging jobs, diverse development possibilities, social recognition and training opportunities as well as interesting career paths through job rotation. Furthermore, the company has competitive compensation packages, including a company-wide incentive system. Attractive recruitment tools, strategies, talent management and competence development have a high strategic priority at TietoEVRY. The company also focuses on employer branding to build and strengthen TietoEVRY's image as an attractive employer both internally and externally.

## Credit risks

Changes in the general market environment and global economy can result in additional financial risks. Credit risks might arise if customers or financial counterparties become unable to fulfil their commitments towards TietoEVRY.

TietoEVRY's Credit Policy defines the principles for customer credit risk management to be applied in all lines of business and controlled by a centralized credit management team. The risk assessment utilizes external risk databases and past experience as a reference. Credit risk regarding financial counterparties is managed through counterparty limits, as set out in the TietoEVRY Treasury Policy.

## Currency risks

TietoEVRY's currency transaction exposure arises from foreign trade, cash management and internal funding in foreign currencies. Translating the balance sheets and income statements of Group companies into euros creates a translation exposure.

TietoEVRY's Treasury Policy defines the principles for managing currency risks within the Group.

## Interest rate risks

Tietoevry's interest rate risk consists mainly of short- and long-term loans, cash positions and derivative contracts. Fluctuations in interest rates can impact Tietoevry's financial result or economic situation.

Tietoevry's Treasury Policy defines the principles for managing interest rate risks within the Group.

## Funding and liquidity risks

Exceptional market conditions in the financial market might impose temporary limitations on raising new funding and/or lead to an increase in funding costs.

Group Treasury monitors and manages Tietoevry's funding structure and liquidity by maintaining a sufficiently diversified loan portfolio and liquidity position. Analyses of alternative financing sources, maturities and pricing for the company are continuously updated. Tietoevry's financial risks are described in full in the notes to the consolidated financial statements.

## Legal, regulatory and compliance risks

Tietoevry operates in multiple jurisdictions and is required to comply with a wide range of laws and regulations enacted both at the European and national level, e.g. data protection and privacy laws, public procurement, anti-corruption, anti-bribery, regulations restricting competitive trading conditions, health and safety regulations, environmental regulations, labour regulations, competition regulations as well as securities markets, corporate and tax laws. Failing to comply with the regulations may subject the company to regulatory interventions or penalties, or a slowing or even halting of the development of its activities.

Tietoevry functions as a data processor for customers and as a data controller for its internal personal data. Failing to comply with the EU General Data Protection Regulation (GDPR) and its related judgement on data transfers, Schrems II might result in negative reputation, significant fines or other expenses if a solution or service needs to be redesigned or redeveloped.

The risk is mitigated by company-wide privacy work. Tietoevry has a privacy governance model, which ensures that a privacy organization and resources, continuous follow up and reporting, proactive privacy development and active employee communication and training are in place. Privacy governance also ensures that the GDPR requirements are appropriately embedded as practical rules and instructions into corporate core business processes such as offering and software development, sales and marketing, program and project delivery, continuous service delivery and Tietoevry's internal service.

## Supply chain risk

Tietoevry's ability to perform its obligations to customers can be affected by a failure by any significant supplier or partner to fulfil its obligations. Such failure may expose Tietoevry to liabilities and impact the profitability of the company. The company has, for example, outsourced certain infrastructure operations, and a potential failure in deliveries by a supplier could cause disturbances to customers. These risks are managed by partner contract management, contract renewal negotiations and continuous evaluation of the partner delivery quality.

## Global pandemic: Covid-19

The Covid-19 pandemic still creates uncertainty in the market and for the company. During the year, Tietoevry continued to identify, evaluate, and manage risks that could have significant financial, operating, or reputational impact on the company both on a short- and long-term basis. Enterprise risk management, crisis management and business continuity have been vital in handling the effect of the pandemic on our employees, portfolio and customers. Tietoevry follows country-specific government and healthcare guidelines for personal health and the prevention of the spread of Covid-19.

## Geopolitical instability

Geopolitical instability might result in disruption in areas where Tietoevry operates. This instability might impact the company's operations, despite careful scenario planning and mitigation plans to ensure business continuity.

## Climate change

Physical climate change impacts may pose a risk for both TietoEVRY and its customers. TietoEVRY strives to mitigate its contribution to climate change by reducing carbon emissions and increasing energy efficiency in its own operations. Geotechnical assessments are part of the prospecting prior to any new construction of offices or datacenters, and back-up centers ensure continuity of customer operations also in case of severe climate change implications. The ability to mitigate the impacts and adapt to the climate change is becoming increasingly important factor impacting customers' decision making. TietoEVRY can help its customers to reduce their carbon emissions through its technology solutions and facilitate customers' transition to a low-carbon and circular economy.

## Shares and shareholders

TietoEVRY's issued and registered share capital amounts to EUR 76 555 412.00 and on 31 December, the number of shares totalled 118 425 771. TietoEVRY's shares have no par value and their book counter value is one euro. The company's shares are listed on NASDAQ in Helsinki and Stockholm and Oslo Børs. The company has one class of shares, with each share conferring equal dividend rights and one vote.

The company had around 60 480 registered shareholders at the end of 2021 based on the ownership records of the Finnish, Swedish and Norwegian central securities depositories.

TietoEVRY received the following flagging announcements during the year:

- According to the announcements on 11 March, 28 July and 8 September, the combined holding of Lyngen Holdco S.à r.l. and Apax Global Alpha Limited has fallen below the 5% threshold.
- On 17 September, the holding of Incentive Investment Funds ICAV exceeded the 5% threshold and amounted to 6 041 221 shares, corresponding to a holding of 5.10% in TietoEVRY shares. According to its announcement on 6 July, Incentive AS' holding of 6 082 829 shares (5.14% of shares and votes) were held by several funds, including sub-funds of Incentive Investment Funds ICAV.

On 31 December, TietoEVRY had one shareholder holding 10% or more of the shares: Solidium Oy.

In February, TietoEVRY purchased 140 000 own shares (0.12% of the total number of shares) in trading organized by Nasdaq Helsinki Ltd. The average purchase price was EUR 27.0787 per share. Related to the company's share-based reward plans, a total of 143 391 shares held by TietoEVRY (0.12% of the total number of shares) were transferred to the participants of the plan during the second quarter. At the end of the year, the number of shares in the company's or its subsidiaries' possession totalled 7 587, representing 0.01% of the total number of shares and voting rights. The number of outstanding shares, excluding the treasury shares, was 118 418 184.

The members of the Board of Directors, the President and CEO and their close associates together held 0.08% of the shares and votes registered in the book-entry system on 31 December 2021. The President and CEO is also participating in the company's long-term share-

based incentive plans and potential rewards will be paid partly in TietoEVRY shares. As the number of additional shares related to these incentives is dependent on the company's performance, these are not included in this aggregate number.

The company's Articles of Association include a restriction on voting at the Annual General Meeting, where no-one is allowed to vote with more than one-fifth of the votes represented at the meeting. The Articles of Association are available at [www.tietoevry.com/investors](http://www.tietoevry.com/investors).

### Share-based incentive plans

TietoEVRY has the following active share-based incentive plans: a Performance Share Plan 2019, 2020 and 2021 and a Restricted Share Plan 2019, 2020 and 2021. Additionally, EVRY's share-based incentive plans have been transitioned into Restricted Share Plans (RSP) at TietoEVRY. The plans continue and have been transformed in a value neutral way into restricted stock units in the combined company.

The potential rewards will be paid partly in the company's shares and partly in cash in 2022, 2023 and 2024, respectively. The share rewards to be delivered to the participants will consist of shares to be acquired from the market and treasury shares. Thus, no new shares will be issued in connection with the plans. The rewards to be paid on the basis of the plans correspond to the value of an approximate maximum total of 2 474 432 TietoEVRY shares (including the proportion to be paid in cash). On 31 December, the value of granted and unvested share plans corresponded to 2 010 564. The company has not issued any bonds with warrants and does not have any stock option programmes.

## Board authorizations

The 2021 Annual General Meeting authorized the Board of Directors to decide on the repurchase of the company's own shares. The amount of own shares to be repurchased shall not exceed 11 800 000 shares, which currently corresponds to approximately 10% of all the shares in the company. The authorization is intended to be used to develop the company's capital structure. The Board of Directors was also authorized to decide on the issuance of shares as well as on the issuance of option rights and other special rights. The amount of shares to be issued based on the authorization (including shares to be issued based on the special rights) shall not exceed 11 800 000 shares, which currently corresponds to approximately 10% of all the shares in the company.

## Dividend

The distributable funds of the parent company amount to EUR 1 627.8 million, of which net profit for 2021 amounts to EUR 1.1 million. The Board of Directors proposes to the Annual General Meeting that for the financial year ended on December 31, 2021, a dividend of EUR 1.40 per share be paid from the distributable profits of the company. The Board of Directors proposes that the dividend shall be paid in two instalments:

- The first dividend instalment of EUR 0.70 per share shall be paid to shareholders who on the record date for the dividend payment on 28 March 2022 are recorded in the shareholders' register held by Euroclear Finland Oy or the registers of Euroclear Sweden AB or Verdipapirsentralen ASA (VPS).
- The second dividend instalment of EUR 0.70 per share shall be paid to shareholders who on the record date for the dividend payment on 26 September 2022 are recorded in the shareholders' registers.

The proposed dividend payout does not endanger the solvency of the company.

## Events after the period

### New structure and appointment in Executive Management took effect on 1 January 2022

TietoEvry has established six specialized end-to-end businesses. These six businesses form the reportable segments as from the first quarter of 2022. The new structure and the following appointments in Executive Management took effect on 1 January 2022:

- TietoEvry Create – led by Christian Pedersen
- TietoEvry Care – led by Ari Järvelä
- TietoEvry Banking – led by Christian Segersven
- TietoEvry Industry – led by Ari Järvelä
- TietoEvry Transform – led by Satu Kiiskinen
- TietoEvry Connect – led by Johan Torstensson

The business executives together with

- Tomi Hyryläinen, CFO
- Kishore Ghadiyaram, Head of Strategy
- Trond Vinje, Head of Human Resources
- Malin Fors-Skjæveland, Head of Operations

form TietoEvry's Executive Management under the leadership of Kimmo Alkio, the President and CEO.

### Performance acceleration to drive cloud growth and further profit improvement in Cloud & Infra

The technology industry is being reshaped with cloud as the foundation. Multi-cloud and the cloud transformation are the main growth drivers and automation is key for efficiency and customers' cloud adoption. At the same time, the market for traditional infrastructure services is declining.

TietoEvry has initiated performance acceleration in Cloud & Infra to drive cloud growth and achieve further profit improvement. The company announced a cost savings programme in February 2022, expected to impact up to 600 roles. The targeted annual savings of around EUR 50 million mainly relate to personnel and external purchases. The programme is anticipated to contribute to the growth and profitability ambitions for Cloud & Infra.

## Full-year outlook for 2022

TietoEVRY expects its organic<sup>1)</sup> growth to be 2% to 4% (revenue in 2021: EUR 2 823.4 million). The company estimates its full-year adjusted operating margin<sup>2)</sup> (adjusted EBITA) to be 13.1–13.6% (13.0% in 2021).

<sup>1)</sup> Adjusted for currency effects, acquisitions and divestments.

<sup>2)</sup> Adjustment items include restructuring costs, capital gains/losses, impairment charges and other items affecting comparability.

## Financial reporting in 2022

24 March      Annual General Meeting

TietoEVRY will publish three interim reports in 2022:

5 May          Interim report 1/2022 (8.00 am EET)

22 July        Interim report 2/2022 (8.00 am EET)

27 October    Interim report 3/2022 (8.00 am EET)

## Key figures

### Calculation of key figures and alternative performance measures

TietoEVRY presents certain financial measures, which, in accordance with the “Alternative Performance Measures” guidance issued by the European Securities and Markets Authority, are not accounting measures defined or specified in IFRS and are, therefore, considered alternative performance measures. TietoEVRY believes that alternative performance measures provide meaningful supplemental information to the financial measures presented in the consolidated financial statements prepared in accordance with IFRS and increase the understanding of the profitability of TietoEVRY’s operations. In addition, they are seen as useful indicators of the Group’s financial position and ability to obtain funding. Alternative performance measures are not accounting measures defined or specified in IFRS and, therefore, they are considered non-IFRS measures, which should not be viewed in isolation or as a substitute to the IFRS financial measures.

Adjusted earnings per share	=	$\frac{\text{Net profit for the period excluding adjustment items, amortization of acquisition-related intangible assets and related tax impact per country}}{\text{Weighted average number of shares}}$
Adjustment items	=	Restructuring costs + capital gains/losses + impairment charges + other items affecting comparability
Operating profit (EBIT)	=	Net profit + interests + taxes
Operating margin (EBIT), %	=	$\frac{\text{Operating profit (EBIT)}}{\text{Revenue}}$
Operating profit (EBITA)	=	Net profit + interests + taxes + amortization of acquisition-related intangible assets
Operating profit (EBITA), %	=	$\frac{\text{Operating profit (EBITA)}}{\text{Revenue}}$

Adjusted operating profit (EBITA)	=	Operating profit (EBITA) + adjustment items
Adjusted operating margin (EBITA), %	=	$\frac{\text{Adjusted operating profit (EBITA)}}{\text{Revenue}}$
Equity per share	=	$\frac{\text{Total equity}}{\text{Number of shares at the year-end}}$
Capital expenditure	=	Acquisitions of intangible assets and property, plant and equipment
Acquisitions	=	Acquisitions of subsidiaries and business operations, net of cash acquired
Return on equity, 12-month rolling, %	=	$\frac{\text{Profit before taxes and non-controlling interests – income taxes}}{\text{Total equity (12-month average)}} * 100$
Return on capital employed, 12-month rolling, %	=	$\frac{\text{Profit before taxes + interest and other financial expenses}}{\text{Total assets – non-interest-bearing liabilities (12-month average)}} * 100$
Equity ratio, %	=	$\frac{\text{Total equity}}{\text{Total assets – advance payments}} * 100$
Interest-bearing net debt	=	Interest-bearing liabilities – interest-bearing receivables – cash and cash equivalents
Gearing, %	=	$\frac{\text{Interest-bearing net debt}}{\text{Total equity}} * 100$

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (IFRS)

### 1. Corporate information

TietoEVRY Corporation (business identity code 0101138-5) is a Finnish public limited liability company organized under the laws of Finland. It is domiciled in Espoo and the address of the Group head office is Keilalahdentie 2-4, 02101 Espoo, Finland. The company is listed on NASDAQ in Helsinki and Stockholm and the Oslo Stock Exchange.

Tietoevry is a leading Nordic digital services company serving clients across Sweden, Norway and Finland and offering software, IT solutions and consulting services, as well as operations of IT systems. In addition, the Group offers outsourcing services and services related to data communication and data security.

The Board of Directors approved these consolidated financial statements on 16 February 2022. According to the Limited Liability Companies Act, the shareholders have the right at the Annual General Meeting to either approve, amend or reject the consolidated financial statements after the publication.

### BASIS OF PREPARATION

The accounting policies applied to the consolidated financial statements as a whole are described below. A more detailed description of accounting policies and significant estimates related to specific disclosures are presented in conjunction with each note in the aim of providing understanding of each accounting area.

### 2. Principal accounting policies

These consolidated financial statements of Tietoevry have been prepared in accordance with International Financial Reporting Standards (IFRS) and IFRIC interpretations as adopted by the European Union. The financial statements also comply with Finnish accounting principles and corporate legislation complementing the IFRSs. The consolidated financial statements are presented in millions of euros and have been prepared under the historical cost convention, unless otherwise stated in these accounting policies. All figures presented have been rounded, and consequently the sum of individual figures can deviate from the presented sum figure. Key figures have been calculated using exact figures.

### Consolidation principles

The consolidated financial statements include the Parent company TietoEVRY Corporation and all subsidiaries over which the Parent company has directly or indirectly more than one half of the voting rights, or the Parent company is otherwise in control of the company. Control exists when the company is exposed to, or has rights to, variable returns from its involvement with the entity and can affect those returns through its power over the entity.

Subsidiaries are consolidated from the date on which control is achieved until the date on which control ceases by using the acquisition method. Intra-group receivables, payables and transactions including dividends and internal profit are eliminated on consolidation. When necessary, subsidiaries' accounting policies have been aligned to correspond to the Group's accounting policies. The result for the period and items of other comprehensive income are allocated to the equity holders of the company and non-controlling interests and presented in the income statement and statement of other comprehensive income. Non-controlling interests are shown separately under shareholders' equity.

### Foreign currency transactions

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in euros, which is the Parent company's functional and presentation currency.

Foreign currency transactions are translated into local functional currencies using the exchange rates prevailing on the transaction date. The foreign currency monetary items are translated using period-end exchange rates. The foreign currency non-monetary items held at fair value are translated into the functional currency using the exchange rate prevailing at the date when the fair value was determined or remeasured. Other non-monetary items are recognized at the exchange rate prevailing on the transaction date.

For internal, long-term loans to subsidiaries, when classified as net investment in foreign operation, all related unrealized foreign exchange gains and losses are recognized in profit or loss in the separate financial statements. In the consolidated financial statements, such

exchange differences are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

Other foreign exchange gains and losses related to business operations are included in operating profit. Foreign exchange gains and losses associated with financing are recognized in finance income and expenses.

For those Group entities whose functional and presentation currency is not the euro, the income statements and statements of financial position are translated into the Group presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated using the exchange rates prevailing at the reporting date;
- income and expenses for each income statement are translated using the average exchange rates of the reporting period;
- all resulting translation differences are recognized in other comprehensive income.

When a subsidiary is sold, any translation differences are recognized in the consolidated income statement as part of the gain or loss on the sale.

Goodwill and fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated into euro using the exchange rates prevailing at the reporting date. Translation differences arising are recognized in other comprehensive income.

### 3. Adoption of new and amended IFRS standards and interpretations

The following amendments to IFRS standards have become effective on 1 January 2021. They have not had any material impact on the disclosures or on the amounts reported in these financial statements.

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform – Phase 2

#### New and revised IFRS standards in issue but not yet effective

At the date of authorization of these financial statements, the Group has not applied the following new and revised IFRS standards that have been issued but are not yet effective and had not yet been adopted by the EU (marked with \*). The management do not expect the adoption of these to have a material impact on the Group's financial statements in the future reporting periods. Those will be adopted as of their effective date.

- IFRS 10 and IAS 28 (amendments): Sale or Contribution of Assets between an Investor and its Associate or Joint Venture
- Amendments to IAS 1 Classification of Liabilities as Current or Non-current\*
- Amendments to IFRS 3 Reference to the Conceptual Framework
- Amendments to IAS 16 Property, Plant and Equipment—Proceeds before Intended Use
- Amendments to IAS 37 Onerous Contracts – Cost of Fulfilling a Contract
- Annual Improvements to IFRS Standards 2018–2020 Cycle Amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41
- IFRS 17 Insurance Contracts and Amendments to IFRS 4 – deferral of IFRS 9
- Amendments to IAS 1 and IFRS Practice Statement 2 - Disclosure of Accounting Policies\*
- Amendments to IAS 8 - Definition of Accounting Estimates\*
- Amendments to IAS 12 - Deferred Tax related to Assets and Liabilities arising from a Single Transaction\*

#### 4. Use of judgements and estimates

The preparation of the financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the amounts reported and disclosed at the reporting date. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from the estimates. In addition, management judgement is required in the application of accounting policies, especially when IFRS standard has alternative accounting, valuation and presentation methods.

Management believes that the following accounting principles represent those matters, where management judgement has the most significant effect on the amounts recognised or where different estimate could result in significant adjustment to reported carrying amounts within the next financial year. These are described in more detail in the related notes.

Accounting principle	Estimates made	Judgement applied	Note
Valuation of goodwill	X	X	11
Provisions	X		16
Deferred taxes	X		9
Leases		X	20

## PERFORMANCE FOR THE YEAR

This section comprises disclosures related to the performance of the Group, including segment information, sources of revenue, other operating income and expenses, as well as information on employee benefits, taxes and earnings per share.

### 5. Segment information

TietoEVRY Group comprises six operating segments: Digital Consulting, Cloud & Infra, Industry Software, Financial Services Solutions, International Operations and Product Development Services. The operating segments are reported separately, except for International Operations which is included in Other due to its smaller size.

#### ACCOUNTING POLICIES

The operating segments are reported in a manner consistent with the internal reporting provided to the Leadership team which has been identified as TietoEVRY's chief operating decision maker being responsible for allocating resources and assessing performance of the operating segments as well as deciding on strategy.

Segment reporting is prepared according to IFRS accounting principles. No internal sales occur between the segments as in the internal reporting, revenue and costs are recognized directly to the respective customer projects in the service lines. The performance of segments is assessed based on operating profit (EBIT).

Group level costs related to Global management, Support functions and other non-allocated costs are not included in the segments but are reported under Other in the segment reporting.

The reportable segments comprise the following services:

#### Digital Consulting

The Digital Consulting business comprises consulting services, including business and technology advisory as well as system integration services and managed application services. The segment currently focuses on Finland, Sweden and Norway. Services are delivered primarily by employees based in the Nordic countries while also through global delivery centres. TietoEVRY is a leading vendor in the Norwegian and Finnish consulting market.

#### Cloud & Infra

The Cloud & Infra business modernizes and secures customers' businesses with automated solutions enhanced by a variety of technologies. The infrastructure foundation is to ensure Nordic customers' renewal, business continuity and security. Services comprise managed cloud, security and end-user services including cloud migration advisory and transformation. The business has a geographical focus in Finland, Sweden and Norway, and the Group is positioned as the leading provider in Finland and Norway and is among top 3 providers in Sweden. Services are delivered primarily from both onshore locations in the Nordic countries and the delivery centre in the Czech Republic.

#### Industry Software

Industry Software provides with industry-specific software products for business-critical processes of clients in the public sector and the healthcare and welfare sector as well as in the forest industry and the energy segments. Customers are mainly in the Nordic countries while the Group also has industry software for its global customers in the forest sector. Majority of the business continues to be license-based while the share of software as a service is on the rise. In the license-based business, revenue comprises solution installations and license fees as well as maintenance, which is typically based on multi-year agreements.

#### Financial Services Solutions

Financial Services Solutions helps a wide range of Nordic and global companies in the financial services industry to digitalize business processes, secure operational efficiency and growth in an environment of constant regulatory change. The portfolio comprises a comprehensive range of services and processes, based on flexible modules and innovative scalable software platforms, from real-time solutions within the areas of payments, cards, wealth management and credit to running full stack banking and cards operations as well as BPO services.

## Product Development Services

Product Development Services provides software R&D services with focus on the telecom sector. Services are provided globally for communications infrastructure companies, consumer electronics and semiconductor companies as well as automotive industry. Services are currently provided mainly from global centres in Poland, China, Sweden, the Czech Republic and Finland.

**Other** consists of International Operations including digital consulting services for markets outside the Nordics with focus on the industrial, public and telecom sectors in Europe and the healthcare, insurance and professional services in the US. International Operations serves its non-Nordic customers primarily from India and Ukraine. Other also includes unallocated Group costs.

## 6. Revenue

The business models of the Group consist of continuous services, software solutions, projects and consulting. Goods mainly include sales of software licenses. Revenue comprises the fair value for the sale of IT services and goods, net of value-added tax, discounts and exchange rate differences.

### ACCOUNTING POLICIES

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes consideration collected on behalf of third parties. The Group recognizes revenue when it transfers control of a good or service to a customer.

The Group typically provides the customers with wide variety of comprehensive services. The individual service delivery contracts are often structured under a common frame contract where general terms for the service delivery to the customer are defined. The content of the delivery, performance obligations and usually also pricing, are defined in the service delivery contracts. Management judgement is used to identify what is the entirety of which revenue is recognized; either an individual service delivery contract or a group of combined contracts.

Revenue from service contracts is based on service volumes or time and materials and the performance obligations are recognized over the accounting period in which the services are rendered or project is delivered. The services are generally satisfied and the control transferred to the customer over time given that either the customer simultaneously receives and consumes the benefits provided by the Group, or the Group's performance does not create an asset with an alternative use for the Group, in which case there is an enforceable right to payment for work completed to date.

In majority of the businesses, covering continuous services, time and material projects and consulting, the performance obligations satisfied are invoiced on monthly basis. At the time of invoicing, a receivable is recognized by the Group as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. The standard payment term is 30 days, net, according to the Group's Credit Policy.

Goods, typically distinct licenses, that provide a right to use the software, are invoiced on delivery. The license revenue is recognized at a point in time when the license is delivered, the legal title has passed, the customer has accepted the license and has access to the licensed software. Distinct licenses, that provide a right to access the software, are recognized over the contract period. Contract assets or liabilities do not typically arise in the businesses described above.

For contracts comprising fixed-price projects, revenue is recognized based on the actual service provided by the reporting date as a proportion of the total services to be provided. This is determined based on the cost of actual labour hours spent relative to the total expected cost of labour hours, as it best depicts the transfer of control to the customer. Estimates of revenues, costs or progress towards completion are revised if circumstances change and any resulting increases or decreases in estimated revenues or costs are reflected in profit or loss in the period in which the circumstances that give rise to the revision become known by the management. Invoicing and customer payments in the fixed-price projects follow the payment schedule defined in the customer contract. If the services rendered by the Group exceed the payment, a contract asset is recognized, and if the payments exceed the services rendered, a contract liability is recognized.

The customer contracts of the Group typically comprise several of the business models described above. The most appropriate presentation on how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors is considered to be the disaggregation of revenue by segment, presented in the segment information [note 5](#). The disaggregation of customer sales from long-term fixed-price contracts by segment represents the revenue from contracts for which the risks are different compared to other contracts with customers.

Some contracts include delivery of hardware together with a variety of services from the Group. Hardware is usually provided by another service provider. The installation of hardware is simple, does not include an integration service from the Group and could be performed by another party. It is, therefore, accounted for as a separate performance obligation. In these contracts, TietoEVRY acts as an agent, if the Group does not obtain control of the hardware provided by another party before it is transferred to the customer, or as a principal if the control is obtained.

Where the contracts include multiple performance obligations, the transaction price is allocated to each performance obligation based on the stand-alone selling prices, which are observable from the contracts and represent prices for services rendered in similar circumstances to similar customers. Revenue from contracts granting a discount retrospectively to the customer is recognized based on the price specified in the contract, net of the estimated discounts. Discounts are estimated based on management's experience of the earlier purchases of the customers under similar contracts. This estimation is regularly updated during the contract period. Revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

In settlement agreement cases, the settlement consideration is reduced from revenue when a settlement agreement is signed with the customer.

The Group grants assurance type of warranties which guarantee that the delivery complies with agreed specifications. These are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Group does not have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. Consequently, the Group does not adjust any of the transaction prices for the time value of money.

The Group capitalizes material costs of set-up activities related to transition or implementation projects in the initial phase of continuous operating service contracts, when the criteria for capitalization according to IFRS 15 are met. Management judgement has been used when developing an internal guidance on what kind of tasks are defined as set-up activities in the Group. The set-up activities do not result in the transfer of a promised good or service and are not identified as a performance obligation to the customer. The capitalized costs of a contract are amortized during the period when the revenue for related continuous operating service contract is recognized.

#### Assets and liabilities related to contracts with customers

EUR million	Note	31 Dec 2021	31 Dec 2020	1 Jan 2020
Trade receivables	14	372.8	358.9	443.5
Contract assets	14	52.5	50.1	68.3
Contract liabilities	17	56.0	56.3	41.9

Decreases due to business disposals during 2021 were EUR 1.6 million in trade receivables, EUR 6.1 million in contract assets and 5.8 million in contract liabilities.

Revenue recognised from the opening value of contract liabilities was EUR 47.8 (28.8) million.

#### Order backlog

Transaction price allocated to all fully or partially unsatisfied performance obligations (order backlog) amounted to EUR 3 513 (3 350) million at the end of the year. Of the backlog, 50% is expected to be recognized as revenue during 2022. The order backlog includes all signed customer orders that have not been recognized as revenue, including estimates of the value of consumption-based contracts.

Transaction price allocated to fully or partially unsatisfied fixed-price contracts amounted to EUR 63.5 (76.8) million, of which 78% or EUR 49.7 million is expected to be recognized as revenue during 2022.

#### Assets recognized from costs to fulfil a contract

EUR million	2021	2020
Capitalized set-up costs on 31 Dec	21.2	25.0
Amortization of capitalized set-up costs	6.6	8.3

In the statement of financial position, capitalized set-up costs of EUR 15.9 (13.2) million are presented within other non-current receivables and current portion of EUR 5.3 (11.9) million in trade and other receivables.

## 7. Other operating income and expenses

Other operating income includes income other than that associated with the principal activities of TietoEvry, such as capital gains and foreign exchange gains on derivatives. Other operating expenses mainly relates to information and communication technology and premises related costs as well as professional services such as consulting and marketing.

### ACCOUNTING POLICIES

#### Government grants

Government grants are recognized as other operating income on a systematic basis over the periods necessary to match them with the related costs that they are intended to compensate.

#### Research and development costs

Research costs are expensed when incurred. Development costs related to major new software products are capitalized as intangible assets when it is probable that the development will generate future economic benefits for the Group, and certain criteria related to commercial and technological feasibility are met. Development costs comprise service and solution development focusing on, for example, industry-specific software, customer experience management and security services, as well as cloud services. Additionally, the costs for related internal development, e.g. automation in infrastructure services, are included in development costs.

### Other operating income

EUR million	2021	2020
Gain on sale of tangible assets, subsidiaries and business operations	104.1	1.3
Change in fair value of derivatives	7.4	0.8
Joint venture management fees	1.6	3.5
Other	11.9	6.0
<b>Total</b>	<b>125.1</b>	<b>11.6</b>

In 2021, TietoEvry sold its Oil & Gas software business as well as the software businesses Alystra, Jydacom and TRYGG/2000 and recognised a total gain of EUR 104.0 million. More information in [note 26](#).

### Other operating expenses

EUR million	2021	2020
Information and communication technology	141.3	136.9
Premises related costs	44.4	47.9
Professional services and marketing	42.5	50.7
Other operating expenses	27.0	37.4
<b>Total</b>	<b>255.2</b>	<b>272.9</b>

### Development costs

TietoEvry's offering development costs amounted to around EUR 127 (135) million, representing 4.5% (4.8) of the Group's revenue. Of these costs, EUR 42.6 (51.0) were capitalized. In 2021, the focus was on Industry Software, especially solutions for Financial Services and Health & Care.

### Fees to auditors

EUR million	2021	2020
Audit fees	1.3	1.3
Audit related	0.2	0.1
Tax advisory	0.1	0.1
Other services	0.2	0.5
<b>Total</b>	<b>1.8</b>	<b>2.0</b>

## 8. Employee expenses

Employee expenses consist of wages and salaries and related social costs. TietoEVRY has also post-employment benefit plans as well as share-based incentive plans for key employees. Termination benefits refer to benefits arising from termination of employment, not performance of work.

### ACCOUNTING POLICIES

Employee benefits are recognised in the period in which services are rendered by the employees. Termination benefits are recognised at the time an agreement between the Group and the employee is made and no future service is rendered by the employee in exchange for the benefits.

### Share-based incentive plans

TietoEVRY has share-based incentive plans for its key employees which are accounted for as equity-settled. The plans are valued at fair value based on the market price of TietoEVRY share at the grant date and recognized as an employee benefit expense during the vesting period with a corresponding entry in equity. At each reporting date, the number of shares that are expected to vest from the Group's share-based incentive plans is revised. As part of this evaluation, the changes in the forecasted performance of the Group, the expected turnover of the personnel participating in the plans and other information impacting the number of shares to vest, is taken into consideration. Any adjustments to the initial estimates is recognized in profit or loss and a corresponding adjustment is made to equity.

### Employee expenses

EUR million	2021	2020
Wages and salaries	1 174.8	1 122.3
Termination benefits	0.2	25.1
Post-employment benefits		
Defined contribution plans	104.5	96.6
Defined benefit plans	1.5	2.9
Other statutory social costs	217.8	198.9
Share-based payments	8.7	8.6
Other personnel expenses	19.5	31.1
<b>Total</b>	<b>1 527.0</b>	<b>1 485.6</b>

In 2021, TietoEVRY initiated employee consultations regarding the Cloud & Infra business. In 2020, the Group announced integration related restructuring measures including employee consultation processes which mainly concerned Sweden, Norway, Finland and India.

### Management remuneration

EUR thousand	2021		2020	
	President and CEO	Leadership team	President and CEO	Leadership team
Salaries and benefits	842.3	3 938.1	807.0	3 652.7

<sup>3)</sup> Until 19 July 2021

Each member of the Board of Directors receives a fixed annual remuneration and additional meeting based remuneration. According to the decision by the Annual General Meeting, the yearly remuneration is as follows: Chairperson EUR 125 000, Deputy Chairperson EUR 70 000, and ordinary member EUR 53 000. In addition to these fees, the Chairperson of a permanent Board Committee receives an annual fee of EUR 20 000 and a member of a permanent Board Committee receives an annual fee of EUR 10 000. The meeting based remuneration is EUR 800 for each Board meeting and for each permanent or temporary Committee meeting. Remuneration for employee representatives is an annual fee of EUR 15 000.

The Annual General Meeting also approved that part of the fixed annual remuneration may be paid in the company's shares purchased from the market. An elected member of the Board of Directors may, at his/her discretion, choose to receive the fee from the following five alternatives:

1. No cash, 100% in shares
2. 25% in cash, 75% in shares
3. 50% in cash, 50% in shares
4. 75% in cash, 25% in shares, or
5. 100% in cash, no shares.

The shares will be purchased in accordance with an acquisition programme prepared by the company. If the remuneration cannot be paid in shares due to insider regulation, termination of the Board member's term of office or other reason relating to the member of the Board, the remuneration shall be paid fully in cash. In addition to the share remuneration, the Board members do not belong to or are not compensated with other share-based arrangements, nor do the members have any pension plans at TietoEVRY.

The Shareholders' Nomination Board based on shareholdings as at 31 August 2021 consisted of the following representatives announced by TietoEVRY's shareholders:

- Petter Söderström, Investment Director, Solidium Oy
- Gustav Moss, Vice President, Cevian Capital AB
- Alexander Kopp, Investment Manager, Incentive AS
- Mikko Mursula, Deputy CEO, Ilmarinen Mutual Pension Insurance Company
- Tomas Franzén, Chairperson of the Board of Directors, TietoEVRY Corporation.

## Share-based incentive plans

The aim of TietoEvry's share-based incentive plans is to align the objectives of shareholders and key employees in order to increase the value of the company in the long-term. At the end of 2021, TietoEvry's share-based incentive plans included Performance Share Plans 2019–2021, 2020–2022 and 2021–2023 as well as Restricted Share Plans 2019–2021, 2020–2022 and 2021–2023. The rewards from the plans will be paid partly in the company's shares and partly in cash. The cash proportion is intended to cover taxes and tax-related costs arising from the reward.

As a rule, no reward will be paid, if a participant's employment or service ends before the reward payment. The Board of Directors anticipates that share rewards to be delivered to the participants under the plans will consist of shares to be acquired from the market. Thus, no new shares will be issued in connection with the plans.

The Performance Share Plan 2018–2020 and the Restricted Share Plan 2018–2020 ended in 2021. Based on the achievements of the targets a total of 159 823 gross shares were earned and of these 87 463 net shares were delivered to the participants. TietoEvry used its treasury shares for the reward payments.

Future cash payment to be made to the tax authorities from share-based payments is estimated at the end of the period at EUR 15.3 million.

### Main terms and conditions of the share-based incentive plans

Performance Share Plan			
	2019–2021	2020–2022	2021–2023
Plan launched	16 January 2019	18 December 2019	16 February 2021
Performance Period	2019–2021	2020–2022	2021–2023
Vesting conditions	Total Shareholder Return of TietoEvry share (TSR), strategic target related to TietoEvry's growth (not in 2022–2022 plan) and TietoEvry's Earnings per Share (EPS). Valid employment or director agreement of a key employee upon the reward payment.		
Exercised	In shares and cash in 2022	In shares and cash in 2023	In shares and cash in 2024
Number of participants on 31 Dec 2021	80	111	119
Other	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 315 466 TietoEvry gross shares.	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 548 692 TietoEvry gross shares.	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 545 720 TietoEvry gross shares.

Restricted Share Plan			
	2019–2021	2020–2022	2021–2023
Plan launched	16 January 2019	18 December 2019	16 February 2021
Vesting period	2019–2021	2020–2022	2021–2023
Vesting conditions	Valid employment or director agreement of a key employee upon the reward payment.		
Exercised	In shares and cash in 2022	In shares and cash in 2023	In shares and cash in 2024
Number of participants on 31 Dec 2021	160	404	465
Other	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 61 549 TietoEvry gross shares.	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 243 730 TietoEvry gross shares.	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 238 305 TietoEvry gross shares.

### Assumptions made in determining the fair value of TietoEVRY's Share-based incentive plans

For Performance Share Plans and Restricted Share Plans, the fair value has been determined at grant using the fair value of the company share as of the grant date, expected outcome and expected dividends.

The fair value of social costs settled in cash are remeasured at each reporting date until settlement.

For share plan grants made in 2021, the fair value of the part recognised into equity has been determined at grant date using the following share price and expected dividends. The part recognised into liability is based on the share price at the end of the reporting period:

- Share price at grant: EUR 27.27
- Expected dividends: EUR 4.50
- Share price at year-end: EUR 27.48

### Share option programme transferred from EVRY

As part of the Merger plan, it was agreed that EVRY's incentive plans will continue and will be transformed in a value neutral way into restricted stock units or performance shares in the combined company, with equivalency on all material respects with regards to economic value, vesting conditions and other terms and conditions, taking into account the strike price of the options and by applying an option conversion ratio of 1:0.1423. Any existing right for EVRY to settle options and/or restricted stock units under the plans in cash, will continue as a right for the combined company. 37 employees were included in the programmes at 31 December 2021.

The Board of Directors anticipates that share rewards to be delivered to the participants under the plans will consist of shares to be acquired from the market. Thus, no new shares will be issued in connection with the plans.

The rewards earned in 2020 from Long-Term Incentive Plan 2017 and Long-Term Incentive Plan 2018 were paid in 2021. Based on the achievements of the targets a total of 112 440 gross shares were earned and of these 55 928 net shares were delivered to the participants. TietoEVRY used its treasury shares for the reward payments.

Future cash payment to be made to the tax authorities from share-based payments is estimated at the end of the period at EUR 0.8 million.

	<b>Interim Restricted Share Plan (Conversion from EVRY plans)</b>
	<b>Long-Term Incentive Plan 2018</b>
Plan launched	December 2018
Vesting period	1/3 in 2019, 1/3 in 2020 and 1/3 in 2021
Vesting conditions	Valid employment or director agreement upon the reward payment and during lock-in period. Awarded shares will be locked in and may not be sold for 12 months following the vesting dates.
Exercised	In shares and cash in 2020, 2021 and 2022
Number of participants on 31 Dec 2021	37
Other	On 31 Dec 2021, rewards to be paid correspond to the value of approximate number of 57 102 TietoEVRY gross shares.

### Share-based payments included in employee benefit expenses

EUR million	2021	2020
Equity-settled share-based incentive plans	8.7	8.6
Social costs settled in cash <sup>1)</sup>	1.4	0.6
<b>Total</b>	<b>10.1</b>	<b>9.2</b>

<sup>1)</sup> Tietoevry's share-based incentive plans are accounted for as equity-settled. Social costs from the plans are reported as cash-settled.

## 9. Income taxes

Income tax expenses comprise of current and deferred tax. Deferred tax assets and liabilities charged by the same taxing authority are netted and, therefore, shown net on the statement of financial position.

### ACCOUNTING POLICIES

Tax expense for the period includes current taxes of the Group companies based on taxable profit for the year, together with tax adjustments for previous years and changes in deferred taxes. Tax is recognized in the income statement, except to the extent that it relates to items recognized in other comprehensive income or directly in equity, in which case the related income tax is also recognized in other comprehensive income or directly in equity, respectively. The share of results in joint ventures is reported in the income statement based on the net result and thus, including the income tax effect.

Deferred income tax is recognized, using the liability method, on temporary differences between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements as well as on tax loss carry forwards. Deferred income tax is determined using the tax rates and laws which have been enacted or substantively enacted at the reporting date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled. Deferred taxes are not recognized on temporary differences related to investments in subsidiaries to the extent that they will probably not be reversed in the foreseeable future.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. The deferred tax assets and liabilities arising from consolidation are recognized in the consolidated statement of financial position if it is probable that the related tax effects will occur.

### ACCOUNTING ESTIMATES AND JUDGEMENTS

At each reporting date, the management estimates the amount of probable future taxable profits against which unused tax losses can be utilized. As the actual profits may differ from the forecasts, the change will affect the taxes in future periods.

The group operates globally and is, therefore subject to changing tax laws in multiple jurisdictions. The interpretation of tax legislation requires management judgement, and the applied interpretations may include uncertainties.

### Income tax expense in income statement

EUR million	2021	2020
Current taxes	48.9	28.0
Change of deferred taxes	7.3	0.5
Taxes for prior years	6.0	-0.6
<b>Total</b>	<b>62.2</b>	<b>27.9</b>

### Reconciliation of income tax expense

Profit before taxes	353.8	122.4
Tax calculated at the domestic corporation tax rate of 20%	70.8	24.5
Effect of different tax rates in foreign subsidiaries	3.8	-0.5
Taxes for prior years	6.0	-0.6
Deferred taxes from previous year	-4.2	—
Tax effect of non-deductible expenses and tax exempt income	-16.3	2.0
Tax on foreign dividend distribution	4.1	4.1
Other items	-2.0	-1.6
<b>Total</b>	<b>62.2</b>	<b>27.9</b>
Effective tax rate, %	17.6	22.8

### Deferred tax assets and deferred tax liabilities

EUR million	31 Dec 2021	31 Dec 2020
Deferred tax assets	19.1	35.6
Deferred tax liabilities	9.1	19.8
<b>Net deferred tax asset</b>	<b>10.0</b>	<b>15.8</b>

Majority of the deferred tax assets and liabilities are expected to be recovered after more than 12 months.

### Movements in deferred tax assets and liabilities during the year

<b>Net deferred tax asset</b>	<b>15.8</b>	<b>-7.3</b>	<b>0.4</b>	<b>0.4</b>	<b>0.7</b>	<b>10.0</b>

On 31 Dec 2021, the group's unused tax loss carry forwards amounted to EUR 239.3 (263.0) million pertaining deferred tax asset of EUR 49.6 (57.4) million. These losses relate mainly to Norway and Sweden and have no expiry date. Based on profit forecasts, it is probable that there will be sufficient future taxable profits available against which these tax losses can be utilized.

On 31 Dec 2021, the group had tax loss carry forwards amounting to EUR 0.8 (3.9) million pertaining deferred tax asset of EUR 0.2 (0.9) million, which were not recognized due to uncertainty of utilization.

The group does not have any material uncertain tax positions in accordance with IFRIC 23 Uncertainty over Income Tax Treatments.

## 10. Earnings per share

The total number of TietoEvry's shares on 31 December 2021 amounted to 118 425 771. At the end of the reporting period, the number of shares in the company's or its subsidiaries' possession totalled 7 587, representing 0.01% of the total number of shares and voting rights.

### ACCOUNTING POLICIES

Basic Earnings per share (EPS) is calculated by dividing the net profit attributable to the shareholders of the Parent company by the weighted average number of shares in issue during the year, excluding shares purchased by TietoEvry and held as own shares.

Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding during the year with the shares estimated to be delivered based on the share-based incentive plans.

	2021	2020
Net profit for the financial year attributable to owners of the Parent company (EUR million)	291.6	94.5
Earnings per share (EUR)		
Basic	2.46	0.80
Diluted	2.46	0.80
Weighted average number of shares during the year

Effect of dilutive share-based incentive plans	276 585	219 550
Diluted	118 684 808	118 597 819

## INVESTED CAPITAL AND WORKING CAPITAL ITEMS

This section includes disclosures describing the assets that form the basis for the activities of TietoEVRY and the related liabilities.

### 11. Intangible assets and impairment testing of goodwill

TietoEVRY's intangible assets comprise mainly of goodwill, internally developed software (capitalized development costs), and intangible assets acquired in business combinations, such as technology, trademarks and customer relationships. Intangible assets also include software licenses. TietoEVRY does not have any intangible assets with indefinite useful lives other than goodwill.

#### ACCOUNTING POLICIES

Other intangible assets than goodwill are recognized initially at cost. An intangible asset is recognized only if it is probable that the future economic benefits attributable to the asset will flow to the Group and the cost of the asset can be measured reliably. All other costs are expensed as incurred.

After initial recognition, intangible assets are measured at cost less amortizations and accumulated impairment losses. Intangible assets are amortized over their useful lives with the straight-line method. Assets that are subject to amortization are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the carrying amount of the intangible asset exceeds its recoverable amount, an impairment loss equal to the difference is recognized in profit or loss.

#### Internally developed software

Development costs related to major new software products are capitalized as intangible assets when it is probable that the development will generate future economic benefits for the Group, and certain criteria related to commercial and technological feasibility are met. Development projects are analysed individually to determine the moment when the project has reached a milestone after which capitalization of development costs can start. Capitalization is subject to CFO's approval. Only costs which are directly attributable to the development are capitalised.

Subsequent to initial recognition, these costs are measured at cost less accumulated amortization and impairment losses. Amortization period for the internally developed software depends on the technology renewal cycle and contract duration. Internally developed software for which amortizations have not yet started are tested for impairment on annual basis by comparing the assets' carrying amount with its recoverable amount. If the carrying amount exceeds the recoverable amount, an impairment loss equal to the difference is recognized in profit or loss.

#### Intangible assets recognised from acquisitions

Intangible assets acquired in business combinations are measured at fair value at the acquisition date. These are usually customer or technology related and have finite useful lives.

Gains and losses on disposal of intangible assets are included in other operating income and expenses.

#### The Group applies the following useful lives:

	Years
Software acquired separately	3
Other intangible assets	3–10
Technology related intangible assets recognized at fair value from acquisitions	3–15
Customer related intangible assets recognized at fair value from acquisitions	2–10
Trademark recognized at fair value from acquisitions	6
Internally developed software (capitalized development costs)	5–15

**Goodwill**

Goodwill arising on a business combination represents the excess of the aggregate of the consideration transferred, the amount of non-controlling interests in the acquiree and previously held equity interest in the acquiree over the fair value of the Group's share of the identifiable net assets acquired. Goodwill is measured at cost less accumulated impairment losses. It is not amortized, but tested for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. For the purpose of impairment testing, goodwill is allocated to the operating segments of the Group, which are the cash generating units (CGU) expected to benefit from the synergies of the business combination. If the carrying amount of goodwill allocated to the operating segments exceeds its recoverable amount, an impairment loss equal to the difference is recognized in profit or loss. The recoverable amount is the higher of the value in use represented by the net present value of future cash flows and the fair value less costs to sell. Impairment losses on goodwill are not reversed.

In respect of joint ventures, goodwill is included in the carrying amount of the investment.

**ACCOUNTING ESTIMATES AND JUDGEMENTS**

Estimates are made when determining the fair values of assets acquired in a business combination. The valuation requires management to determine the appropriate valuation technique and inputs for fair value measurements, such as discount rate.

Determining whether goodwill is impaired requires an estimation of the value-in-use of the cash-generating units (CGU) to which goodwill has been allocated. The value-in-use calculation requires management to estimate the future cash flows expected to arise from the CGUs and an appropriate discount rate to calculate present value.

While management believes that the used estimates and assumptions are sufficiently reasonable, there are uncertainties which could materially affect the valuations.

Carrying value 1 Jan 2020	2 023.1	8.5	291.7	134.4	3.8	1.7	2 463.2
<b>Carrying value 31 Dec 2020</b>	<b>1 974.4</b>	<b>5.8</b>	<b>233.9</b>	<b>142.7</b>	<b>1.9</b>	<b>0.5</b>	<b>2 359.3</b>

<sup>1)</sup> Includes technology and customer related intangible assets as well as trademark recognized at fair value from acquisitions.

<sup>2)</sup> Comprises mainly the development of TietoEvry's Lifecare and Core banking & Payment solutions. As part of the integration activities, the Group recognized an impairment loss of EUR 18.4 million due to harmonization of product development projects. In addition, the Group decided to end the common SmartUtilities platform due to the fact that a standard solution does not fulfil the individual needs of Nordic utilities companies resulting to an impairment of EUR 9.1 million.

### Impairment testing of goodwill

The annual impairment testing was carried out in the fourth quarter 2021 in line with Group accounting policy. The Group is organized into six service lines which are Digital Consulting, Cloud & Infra, Industry Software, Financial Services Solutions, Product Development Services and International Operations. These six service lines form the Group's operating segments and TietoEvry reports separately five of them and includes International Operations under Other in the segment reporting due to its smaller size. See [note 5](#) for service line information. These six service lines form the cash-generating units (CGU) providing services to selected customers in their market segments, and represent the lowest level at which goodwill is monitored for internal management purposes.

At the end of 2021, goodwill of the Group has been allocated as follows:

#### Carrying amount of goodwill by CGU

EUR million	31 Dec 2021	31 Dec 2020
Digital Consulting	483.4	474.5
Cloud & Infra	523.9	508.6
Industry Software	497.9	561.8
Financial Services Solutions	344.6	332.9
Product Development Services	54.0	54.8
International Operations	39.8	41.9
<b>Total</b>	<b>1 943.6</b>	<b>1 974.4</b>

Compared to 31 Dec 2020, the decrease in the total goodwill is EUR 30.8 million. EUR 78.3 million was allocated to the divestments (see [note 26](#)) and a change of EUR 47.5 million was due to currency effects.

As a result of the impairment testing, no impairment was identified.

### Recoverable amounts

The recoverable amounts of the CGUs of TietoEvry are determined based on value-in-use calculations which are prepared using discounted cash flow projections. Annually, management of the Group defines the long-term ambitions and strategic objectives for the next years taking into account for example industry growth forecasts obtained from external sources as well as salary increase assumptions. The strategic objectives serve as basis for the service lines' long-term plans which are reviewed and approved by the Group's top management.

The planning horizon covers five-year period including key assumptions for sales growth rate, development of EBITDA, capital expenditure including investments for right-of-use assets, tax payments and changes in net working capital. Forecasted EBITDA margins are adjusted for expected efficiency improvements. The key assumptions used are based on past experience and reflects management's expectations of future development of sales prices, business mix, costs, market shares and volumes.

Subsequent to the five-year projection period the growth rate used is 1%, which does not exceed the expectations of growth in real terms.

### Discount rate

The discount rate applied to the cash flow projections is the weighted average pre-tax cost of capital (WACC). The components of the WACC rates are risk-free rate, market risk premium, country risk premium, industry specific beta, cost of debt and debt equity ratio. The risk-free rate is based on 30-year German government bond adjusted by the weighted average inflation differential between Germany and the countries where each CGU has operations. The discount rates are also adjusted for the additional business risk of the CGUs. The pre-tax discount rates for the CGUs vary between 6% and 12%.

#### Assumptions used in discounting the cash flow projections by the CGUs:

2021	Five-year period 2022–2026	
%	Terminal growth rate	Pre-tax WACC
Digital Consulting	1	6.1
Cloud & Infra	1	6.1
Industry Software	1	6.1
Financial Services Solutions	1	6.4
Product Development Services	1	10.8
International Operations	1	12.0

### **Sensitivity analysis**

Value-in-use calculation for each CGU is most sensitive to changes in WACC and EBITDA margin assumptions. No reasonable change in key assumptions would result in recognition of impairment loss in any of the CGUs. In Cloud & Infra, an increase of 5 percentage point in pre-tax WACC would cause the recoverable amount to equal the carrying amount. Furthermore, a 3 percentage point decrease in the long-term EBITDA margin would cause the recoverable amount of Cloud & Infra to equal the carrying amount.

## 12. Property, plant and equipment

TietoEvry's property, plant and equipment comprise mainly of information and communication technology (ICT) equipment.

### ACCOUNTING POLICIES

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Land is not depreciated. Property, plant and equipment acquired in business combinations are measured at fair value at the acquisition date. Depreciation is recognized according to plan based on the estimated economic lives of the individual assets and accounted for in accordance with the straight-line method. The assets' residual useful lives are reviewed, and adjusted if appropriate, at each reporting date.

Assets that are subject to depreciation are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss equal to the difference is recognized in profit or loss.

**The group applies the following useful lives:**

	Years
Buildings and structures	25–40
Data processing equipment <sup>1)</sup>	1–5
Other machinery and equipment	5
Other tangible assets	5

<sup>1)</sup> Purchases of personal computers are expensed immediately.

### 13. Inventories

Inventories comprise mainly cards and chips for sale to customers.

#### ACCOUNTING POLICIES

Inventories are measured at the lower of cost and net realisable value. Cost is determined based on average cost and net realisable value represents the estimated selling price under normal commercial conditions less estimated costs of sale.

No impairments have been booked from the inventories in 2021 or in 2020.

## 14. Trade and other receivables

Trade receivables represent amounts that Tietoevry expects to collect from other parties in the ordinary course of business. Trade receivables are non-interest bearing and the standard payment term is 30 days, net, according to the Group's Credit Policy. Contract assets relate to fixed-price projects where the customer invoicing is based on agreed milestones and the services rendered by the reporting date exceeds the payment received. License fees relate to prepaid license costs that will be realized on an accrual basis in the future periods. Other interest-bearing receivables relate to assets that are financed as part of customer deliveries and where the contracts are treated as service contracts.

Trade receivables to be sold via non-recourse factoring arrangements, but not yet derecognized as of the reporting date, are classified as Financial assets at fair value.

More information in [note 22](#).

### ACCOUNTING POLICIES

Trade receivables are initially recognised at fair value and subsequently at amortized cost less expected credit loss provision (ECL). Tietoevry has elected to use the practical expedient and calculate lifetime ECL based on a pre-defined provision matrix with customer segment specific credit characteristics, based on the following criteria:

- Country Group (Finland, Sweden, Norway, Other European Union countries, Other countries)
- Customer Industry Group (Financial Services, Public Healthcare & Welfare, Industrial customer Services)
- Balance due status (Not yet due, overdue 1–7 days, 8–30 days, 31–60 days, 61–90 days, over 90 days)

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. Default is defined as 90 days past due or a write off event, due to inability to collect debt.

For each segment, the ECL rate (expressed as a percentage) indicates the historical average defaults identified during the past three years and also the Group's assessment of the possible impact from changes in the overall economic environment in which its customers operate. These collective provisions can be increased if the customer has filed for bankruptcy but has not yet registered the fact or if there are any facts or circumstances indicating that the customer's credit risk is above industry/country average. As a response

to increased uncertainty globally, Tietoevry has increased ECL rate by 0.1%–0.5% for all overdue trade receivables. No ECL is calculated for the portion of trade receivables, where the credit risk is covered by collateral, such as credit insurance. When calculating ECL for contract assets, the ECL rate set for "not yet due" invoices in the provision matrix is used. Trade receivables under business model sell are accounted at fair value through profit or loss (FVTPL) and, therefore, those are not subject to ECL provisions.

Trade Receivables are permanently written off when there is no reasonable expectation to recovery. Subsequent recoveries of amounts previously written off are credited to income statement.

Other interest-bearing receivables are initially recognized at fair value and subsequently at amortized cost during the contract period.

The carrying amount of the trade and other receivables approximate to their fair values due to their short-term nature.

### Trade and other receivables

EUR million	31 Dec 2021	31 Dec 2020
<b>Non-current</b>		
Prepaid expenses and contract assets	12.7	4.2
Other	22.6	17.6
<b>Total</b>	<b>35.4</b>	<b>21.8</b>
<b>Current</b>		
Trade receivables at amortized cost	372.8	358.9
Prepaid expenses and accrued income		
Contract assets	52.5	50.1
Licence fees	30.6	26.1
Other prepaid expenses	34.2	46.4
Other interest-bearing receivables	13.8	15.1
Other	13.0	20.3
<b>Total</b>	<b>517.0</b>	<b>516.8</b>

### Group trade receivables maturity and expected credit losses

31 Dec 2021		Overdue	Overdue	Overdue	Overdue	Overdue	Grand Total
EUR million	Not yet due	1–7 days	8–30 days	31–60 days	61–90 days	over 90 days	
Gross Trade receivables subject to impairment	195.8	12.8	3.8	3.4	1.4	3.7	220.9
Average Expected credit loss rate applied	-0.18 %	-0.27 %	-1.40 %	-6.11 %	-7.64 %	-63.29 %	-1.40 %
Collective loss allowance	-0.3	0.0	-0.1	-0.2	-0.1	-2.3	-3.1
Individual loss allowance	-0.0	-0.0	—	-0.0	-0.0	0.3	0.2
<b>Total loss allowance</b>	<b>-0.4</b>	<b>-0.1</b>	<b>-0.1</b>	<b>-0.2</b>	<b>-0.1</b>	<b>-2.1</b>	<b>-2.9</b>
<b>Trade receivables net of ECL</b>	<b>195.4</b>	<b>12.7</b>	<b>3.8</b>	<b>3.2</b>	<b>1.3</b>	<b>1.6</b>	<b>218.0</b>
Trade Receivables covered by Collateral	131.8	17.0	0.2	0.8	0.6	4.3	154.7

<b>31 Dec</b>	<b>2.9</b>	<b>4.2</b>	<b>0.0</b>	<b>0.0</b>

Impairment losses recognized on trade receivables and contract assets are included in other operating expenses in the income statement.

## 15. Defined benefit plans

Group companies in different countries have number of different post-employment benefit plans in accordance with local requirements and practices. The majority of the plans are classified as defined contribution plans. Other post-employment benefit plans than defined contribution plans are classified as defined benefit plans.

### ACCOUNTING POLICIES

The fixed contributions to defined contribution plans are recognized as employee benefit expenses in the period to which they relate. The Group has no further legal or constructive payment obligations once the contributions have been paid.

Defined benefit plans typically define an amount of post-employment benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. Defined benefit plans are funded with payments to insurance companies.

For defined benefit plans, the net liability recognized in the statement of financial position equals the present value of the defined benefit obligation at the closing date less the fair value of the plan assets. The present value of the defined benefit obligation is determined separately for each plan by independent actuaries using the projected unit credit method. The actuarial calculations include several financial and demographic assumptions and any change in these will impact the carrying amount and future expense of the defined benefit obligation.

Current service costs, past service costs and gains or losses on settlements are recognized in employee benefit expenses. Net interest expense or income is recognized in financial items under interest expense or interest income. All remeasurements of the defined benefit liability or asset arising from experience adjustments and changes in actuarial assumptions are recognized directly in other comprehensive income.

The Group manages Defined benefit plans through insurance companies. The employer has guaranteed to the members of the plans a certain level of benefit after their retirement, which depends on the length of service and salary base. The salary base is an average of last years' salaries indexed with common salary index. After the retirement, the benefit payable is indexed yearly.

In Sweden, the Group's risk is only on active employees, but in Finland the Group's risk covers also around 900 non-active employees. When the pensioner who has a vested pension, retires, the final amount of the pension is revised in the Finnish pension plan and as a result, the employer may incur additional costs. In addition, in the Finnish pension plan, the index increases that are borne by the employer during the period between the grant date of the vested pension and the beginning of the pension are charged only in the year when the pension is granted. In some insurance contracts, under certain conditions, the insured person has the right to retire earlier than at the normal retirement age. These additional expenses are charged on the beginning of the retirement.

In Finland, the plan covers 6 active employees and it is closed for future pension accruals. The active employees have been able to transfer their defined benefit pension to a defined contribution plan from 1 Jan 2017. Some employees have chosen this option in 2021, and as a result, a settlement gain of 0.4 million has been recognized in personnel expenses. The net defined benefit liability decreased by the corresponding amount.

In Sweden, the plan covers 78 active employees. As the Group does not have actuarial or investment risk for those plan members whose employment has ceased, the plan members are removed from the pension plan and a settlement is recognized annually. In 2021, a settlement gain of EUR 1.5 million was recognized in personnel expenses and the net defined benefit liability decreased by the corresponding amount.

In Norway, the collective defined benefit pension scheme is closed and the Group has instead established an unfunded compensation scheme for the employees. The size of the compensation and the profile for its accrual are calculated based on parameters at the time of the change and are accounted for as a defined benefit pension scheme in the financial statements. The accrual formula and profile of the compensation scheme are used as the basis to make provisions in the accounts so that the total compensation earned to date by employees at any time is provided for as a liability in the consolidated statement of financial position. The

plan covers 823 employees and pensioners. In addition, there are various other closed and unfunded pension plans in Norway covering 385 employees and pensioners.

#### Defined benefit cost recognized in income statement and in other comprehensive income

EUR million	2021	2020
Service cost		
Current service cost	3.4	2.8

<b>31 Dec</b>	<b>74.2</b>	<b>103.7</b>	<b>-36.4</b>	<b>-65.5</b>	<b>38.0</b>	<b>38.3</b>

<sup>1)</sup> Of which EUR 39.0 (41.7) million in Finland, EUR 7.2 (34.6) million in Sweden and EUR 28.1 (27.3) million in Norway.

<sup>2)</sup> Of which EUR 28.5 million (33.9) in Finland and EUR 7.9 million (31.6) in Sweden.

EUR million	2021	2020
Defined benefit obligations	38.7	38.3
Defined benefit plan assets	-0.7	—
<b>Net liability</b>	<b>38.0</b>	<b>38.3</b>

### Allocation of plan assets

	2021		2020	
	EUR million	%	EUR million	%
<b>In Sweden, plan assets are comprised as follows</b>				
Equity instruments	2.1	26.6	7.2	22.9
Debt instruments	3.2	40.8	14.1	44.7
Property	0.7	8.9	3.1	9.7
Other	1.9	23.7	7.2	22.7
<b>Total</b>	<b>7.9</b>	<b>100.0</b>	<b>31.6</b>	<b>100.0</b>

In Finland, the plan assets are accrued from the insurance premiums paid to the insurance company and accumulated up to the reporting date. The assets are part of the insurance company's investment assets and they are responsible for reporting the assets. A specification of the plan assets is not available.

### Actuarial assumptions

%	2021	2020
<b>Finland</b>		
Discount rate	1.0	0.4
Future salary increases	3.7	2.9
Future pension increases	2.3	1.5
Inflation rate	2.0	1.2
<b>Sweden</b>		
Discount rate	1.9	1.1
Future salary increases	2.2	3.0
Future pension increases	2.2	1.5
Inflation rate	2.2	1.5
<b>Norway</b>		
Discount rate	1.9	1.7
Future salary inflation	2.8	2.3
Growth in the basic state pension (G)	2.5	2.0

### Sensitivity analysis of actuarial assumptions

The following table shows how possible change in one assumption, holding other assumptions constant, affect the defined benefit obligation.

	Change in assumption	Increase in assumption	Decrease in assumption
<b>Finland</b>			
Discount rate	0.5%	-6.7%	7.5%
Future pension increase	0.5%	6.7%	-6.1%
Life expectancy	+1 year	6.2%	
<b>Sweden</b>			
Discount rate	0.5%	-8.8%	9.8%
Future salary increase	0.5%	1.3%	-1.3%
Future pension increase	0.5%	8.6%	-8.0%
Life expectancy	+1 year	5.7%	
<b>Norway</b>			
Discount rate	0.5%	-1.5%	1.7%
Future salary increase	0.5%	0.4%	-0.4%
Future pension increase	0.5%	1.2%	—%
Life expectancy	+1 year	1.3%	

### Maturity profile of the defined benefit obligation

The weighted average duration of the defined benefit obligation is 14 years in Finland, 15 years in Sweden and 10 years in Norway.

The following table shows the maturity profile of the future benefit payments which are the basis for the calculated undiscounted defined benefit obligation.

EUR million	2021
Maturity under 1 year	3.1
Maturity 1–5 years	16.9
Maturity 5–10 years	19.8
Maturity 10–30 years	55.7
Maturity over 30 years	5.9
	<b>101.4</b>

### Expected contributions in 2022

Expected contributions to post-employment benefit plans for the year ending 31 Dec 2022 are EUR 1.5 million.

### Multi-employer plans

The ITP pension plans operated by Alecta and Collectum in Sweden are multi-employer defined benefit pension plans which pool the assets contributed by various entities that are not under common control and the assets provide benefits to employees of more than one entity. It has not been possible to get sufficient information for the calculation of obligations and assets by employer from Alecta and Collectum and, therefore, these plans have been accounted for as defined contribution plans in the consolidated financial statements. In TietoEVRY 4 710 employees are included in these pension plans. The yearly contribution to the plans are around EUR 29 million.

4 452 employees in the Group's Norwegian companies are members of an early retirement scheme (AFP), which is a multi-company defined benefit scheme, and is financed by premium payments determined as a percentage of salary. There is no reliable measurement and allocation of liabilities and assets between the companies that participate in the scheme. The scheme is, therefore, treated for accounting purposes as a defined contribution plan and the premiums paid are recognized as costs through profit or loss. The premium rate for 2021 was 2.5% (2.5) corresponding to EUR 4.5 (3.8) million. The scheme is underfunded, and the administrator (Fellesordningen for AFP) assumes that premiums will have to increase over time in order to ensure sufficient buffer capital to cope with increased payments. Companies that participate in the AFP scheme are jointly and severally liable for two-thirds of the pension payments due to employees who satisfy the terms and conditions at any time. The liability applies both to shortfalls in premium payments and if the premium rate applied proves insufficient to meet the liabilities. In the event that the scheme is terminated, the participating companies have a duty to continue to make premium payments to provide for pension payments to employees who are members of the scheme or who satisfy the requirements of collective agreements for such pension arrangements at the date of termination.

## 16. Provisions

Provisions at TietoEvry Group mostly comprise of restructuring and contract-related provisions.

### ACCOUNTING POLICIES

A provision is a liability of uncertain timing or amount which is recognized when the entity has a present legal or constructive obligation as a result of a past event and it is more likely than not that an outflow of economic benefits will be required to settle the obligation and the amount of the obligation can be measured reliably. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation and are split between amounts expected to be settled within 12 months at the end of the reporting period and amounts expected to be settled later (non-current).

#### Provisions for restructuring

Restructuring provision is only recognized when a formal plan has been approved and the implementation of it has either commenced or the plan has been announced.

#### Provisions for loss-making contracts

Provision is recognised for any unavoidable net loss arising from the contract.

#### Other provisions

Other provisions mainly consist of assurance type of warranties related to deliveries and other risk provisions.

### ACCOUNTING ESTIMATES AND JUDGEMENTS

Provisions require management to assess the best estimate of the future costs needed to settle the present obligation at the reporting date. The actual costs may differ from the estimated costs.

EUR million	Provisions for restructuring	Provisions for loss-making contracts	Other provisions	Total
1 Jan 2021	24.4	12.9	11.5	48.8
Translation differences	0.0	-0.2	0.1	-0.1
Increases in provisions	10.1	0.7	2.1	13.0
Use of provisions	-21.1	-9.3	-3.9	-34.2
Reversal of provisions	-2.2	-0.7	-2.1	-5.0
<b>31 Dec 2021</b>	<b>11.3</b>	<b>3.4</b>	<b>7.7</b>	<b>22.4</b>
of which				
Non-current	0.8	—	2.0	2.8
Current	10.6	3.4	5.7	19.6
<b>Total</b>	<b>11.3</b>	<b>3.4</b>	<b>7.7</b>	<b>22.4</b>

In 2021, TietoEvry initiated employee consultations regarding the Cloud & Infra business.

EUR million	Provisions for restructuring	Provisions for loss-making contracts	Other provisions	Total
1 Jan 2020	14.4	2.0	8.1	24.5
Translation differences	0.3	0.0	-0.1	0.2
Increases in provisions	40.6	26.3	8.7	75.6
Use of provisions	-29.6	-15.1	-1.1	-45.7
Reversal of provisions	-1.3	-0.3	-4.2	-5.7
<b>31 Dec 2020</b>	<b>24.4</b>	<b>12.9</b>	<b>11.5</b>	<b>48.8</b>
of which				
Non-current	1.4	0.0	1.9	3.2
Current	23.0	12.9	9.7	45.6
<b>Total</b>	<b>24.4</b>	<b>12.9</b>	<b>11.5</b>	<b>48.8</b>

In 2020, restructuring provisions related to the integration measures mainly in the Nordics. In addition, TietoEvry decided to end the common SmartUtilities platform resulting to provisions for terminated customer contracts.

## 17. Trade and other payables

Trade and other payables represent unpaid, non-interest bearing liabilities at the end of the reporting period. Contract liabilities relate to fixed-price projects where the customer invoicing is based on agreed milestones and the payments received by the reporting date exceeds the services rendered.

### ACCOUNTING POLICIES

Trade and other payables are presented as current liabilities if they are due to be settled within 12 months from the end of the reporting period. They are recognized at their fair value and subsequently measured at amortized cost using the effective interest method.

The carrying amount of the trade and other payables approximate to their fair values due to their short-term nature.

EUR million	31 Dec 2021	31 Dec 2020
<b>Non-current</b>		
Advance payments	29.2	29.4

## FINANCIAL RISK MANAGEMENT AND CAPITAL STRUCTURE

This section includes notes related to Tietoevry's financial risk and capital structure management. The financial risks are monitored and managed via Tietoevry's Group Treasury.

### 18. Management of financial risks and capital structure

The group's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and commodity risk), credit risk and liquidity risk. The operative management of the treasury activities of Tietoevry is centralized into Group Treasury. The Group Treasury is responsible for managing the Group's financial risk position and maintaining adequate liquidity. The Treasury Policy, which has been approved by the Board of Directors, defines the principles for measuring and managing liquidity risk, interest rate risk, foreign exchange risks and counter-party risk of the Group. The Treasury Policy also defines the division of responsibilities with regard to financial risk management. The Group reviews and monitors financial risks on a regular basis.

#### Market risk

##### Currency risk management

##### Transaction risk

Currency risk means the risk that the result or economic situation of the Group changes due to changes in exchange rates. Foreign trade, Group internal transactions and liquidity management in non-euro countries generate transaction exposure to the Group. The objective of the Groups' currency risk policy is to secure profitability of operative business by managing recognized exposures while maintaining on a Group level a sufficient flexibility to adjust to changing currency markets. The underlying exposure includes financial items denominated in non-functional currencies of operating companies, such as internal funding, foreign currency bank account balances, and estimated cash flows such as firm commitments and future trade transactions.

Swedish krona, Norwegian krone, Czech koruna, Indian rupee, Polish zloty and US dollar are the largest currencies in the exposure. Other currencies, which does not have material impact on group exposure individually, are Ukraine hryvnia and Russian rouble. During 2021, currency forward contracts and swaps were used to mitigate the risks. Gains and losses from foreign exchange contracts are recognized in the consolidated income statement.

Group Companies must hedge their identified currency risks with the Group Treasury unless there are legal restrictions preventing this. The benchmark for the Group's currency position is a situation where all the identified currency risks are eliminated. A deviation from this benchmark is defined as an open position. The following deviations can be made based on the total size of the Group's gross currency position (identified currency risks, excluding the hedging transactions):

- +/- 15 %: Group Treasury
- +/- 25 %: Treasury Committee
- Greater deviation: Board of Directors

The overall operational hedging ratio at the end of Dec 2021 was 101% (99%).

<sup>1)</sup> The maximum pre-tax effect (EUR million) of 10% negative change in exchange rates on the Group's foreign exchange position over the following year.

### Translation risk

According to the Treasury Policy, hedging translation exposure is subject to the Board of Directors' decision. Exposure includes the acquisition price, share capital and restricted and non-restricted reserves of subsidiaries in non-euro countries, as well as the result of the period. NOK 14 875 and SEK 5 113 million exposure forms the majority of the translation risk. The translation position was unhedged at the end of 2021.

### Interest rate risk management

The most significant part of Group's interest rate risk arises from Group's borrowings and financial investments. The objective of interest rate risk management is to minimize the effect of interest rate fluctuations on TietoEVRY's annual results and economic positions. Group Treasury is responsible for the monitoring and operative management of the Group's interest rate position. Interest rate position includes loans, financial investments and interest rate derivative contracts. According to the Treasury Policy, 30 months is defined as a benchmark for the Group's interest rate position, in terms of weighted average time to re-pricing. At the end of 2021, the ratio was at 24 months (26 months in 2020).

31 Dec 2021 EUR million	Amount	Average rate, %	Rate sensitivity <sup>1)</sup>

<sup>1)</sup> The maximum pre-tax effect (EUR million) of 1% rise in interest rates on the Group's net interest expenses over the following year.

<sup>2)</sup> The duration of underlying instruments was 3.2 (4.1 in 2020).

### Commodity risk management

Majority of power procurement has been centralized to a selected supplier and under the selected model, Group does not enter into any new power derivative agreements in its own name.

### Credit risk management

Credit risk is managed on Group level. Credit risk derives from financial investments, derivative contracts and customer-related risks, such as accounts receivables. Group Treasury maintains a list of approved counterparts for commercial paper investments and other financial transactions. Core banks of the Group should have a minimum long-term rating of Baa3 or BBB-.

Customer-related credit risks are assessed based on payment history and financial strength in accordance with the Credit Policy. The Credit Policy defines the limits for the acceptable level of customer credit risk in terms of invoicing schedules and payment terms. In addition, the Group uses customer credit insurance, given by global credit insurer, as a collateral. Excluded from credit insurance cover are all Public Sector customers and some other selected customers. In case of default by customer under insurance, the credit insurer covers 90% of the open accounts receivables, or up to customer specific limit received from credit insurer. The maximum exposure to customer related credit risk at the reporting date is the carrying value of trade receivables. There are no major concentrations of credit risk in the Group, whether through exposure to individual customers, specific industry sectors and/or regions.

### Liquidity risk management and funding

Liquidity risk management and funding principles are defined in the Treasury Policy. One of the key tasks of Group Treasury is to secure adequate funding for the Group. The Group has a committed EUR 250 million revolving credit facility, which matures in 2024. The Group has also overdraft facilities and a EUR 250 million commercial paper programme available to maintain flexibility in funding. In addition, the Group has two Sale of Receivables facilities, EUR 50 million and SEK 450 million.

### Capital management

The objective is to keep the capital structure on a level securing adequate financial flexibility for the operations. The capital structure of the Group is being continuously monitored through Net debt/EBITDA ratio. The ratio is calculated by dividing interest-bearing net debt with the last 12 months' EBITDA of the Group.

Net debt/EBITDA ratio is a covenant used in certain funding arrangements. TietoEvry Group is within limits for this covenant as at the reporting date and comparative period.

	31 Dec 2021	31 Dec 2020
Net debt	610.6	883.3
12 months EBITDA	557.4	351.3
Net debt/EBITDA	1.1	2.5

## 19. Interest-bearing loans and borrowings

TietoEvry Group's interest-bearing liabilities consist of bonds, other loans, lease liabilities and Cash Pool liabilities towards joint ventures.

### ACCOUNTING POLICIES

Interest-bearing loans and borrowings are initially recognized at fair value, net of transaction costs which are recognized in income statement as interest expenses over the loan term. Debt is classified as short term if it is payable within 12 months period, otherwise it is classified as non-current.

EUR million	31 Dec 2021	31 Dec 2020
<b>Non-current</b>		
Bonds	397.8	397.2
Other loans	333.8	488.8

The company issued a EUR 300 million bond in June 2020 to refinance a bridge loan related to the merger. The bond has a coupon of 2% and it will mature in June 2025.

## 20. Leases

TietoEVRY Group mainly acts as a lessee and leases premises, IT equipment and cars. In monetary terms, the highest portion of the Group's lease portfolio is for leasing premises. TietoEVRY Group also leases equipment for Data centres to support continuous service delivery to its customers. Rent of company cars is part of employees' benefit package, the portion of employee share in payment being subject to local HR policies and varies between 0% to 100%.

### ACCOUNTING POLICIES

#### Group as a lessee

Initially, lease liabilities are measured at the commencement date at the present value of the lease payments, discounted using the interest rate implicit in the lease, if it can be readily determined. If the rate can't be readily determined, such as in real estate leases, the incremental borrowing rate is used.

Incremental borrowing rate is defined for each legal entity, differentiated based on lease contract length and updated on a yearly basis, which further impacts the value of right-of-use asset, lease liabilities in the statement of financial position, and split between depreciations and interest expenses. Management judgement has been used in determining the incremental borrowing rate that would reflect the rate of interest that TietoEVRY group would pay to borrow over similar term, and with similar security, the funds necessary to obtain an asset over similar value to the right-of-use asset in similar economic environment. Average annual incremental borrowing rate applied to discounting future cash flows for existing lease agreements at year-end is 4.3%.

Lease term includes non-cancellable period for which the Group has the right to use the underlying asset, together with both enforceable:

- Periods covered by an option to extend the lease, if the Group is reasonably certain to exercise that option; and
- Periods covered by an option to terminate the lease, if the Group is reasonably certain not to exercise that option.

The decision if extension or termination options of lease contracts would be used, lies within related organisation responsible for underlying asset management and is in line with overall strategy and business development plans.

In determining if either lessor or lessee would incur more than insignificant penalties by using or not using either of options, the Group considers not only penalties directly defined in contracts, but also wider economic costs, such as, reallocation costs or finding new tenants.

Lease payments include fixed payments, in substance fixed payments, lease payments that depend on index or rate and exercise price of purchase option, if it is reasonably certain to be exercised.

Subsequently, lease liabilities are measured at amortized cost, by increasing or reducing the carrying amount to reflect interest on the lease liability and the lease payments made, respectively. Lease liabilities are remeasured for lease reassessments done or modified to reflect revised in-substance fixed lease payments.

Interest expenses are recognized in profit or loss.

Right-of-use assets are initially measured at the amount equal to lease liability:

- less payments made at or before commencement date and lease incentives received
- adding initial direct costs; and
- adjusting by estimated dismantling or site restoration costs.

Subsequently, right-of-use assets are measured applying cost model, where asset cost is reduced by accumulated depreciation and impairment losses and adjusted by remeasurement of a respective lease liability.

Right-of use assets are depreciated over the shorter period of lease term and useful life of the underlying asset.

TietoEVRY has applied recognition exemptions allowed by the standard not to capitalize short-term leases (lease term less than 1 year at commencement, where there is no purchase option) and leases of low value assets. Typically, such assets would include lease of individual IT equipment and office furniture. Payments for such assets are recognized in profit or loss on straight-line basis during the lease term.

The Group has also elected to separate service component of a lease for all asset types, except for cars, where only variable lease payments are excluded from the measurement of lease liability. Non-lease components are separated from lease payments on fair market value basis. If such information is not readily available, management judgement has been applied in estimating the value.

The Group presents cash payments for the principal portion of lease liabilities as cash flows from financing activities and interest portion within cash flows from operating activities. Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability are presented as part of operating activities.

#### Group as a lessor

If an arrangement conveys a right to use a specific asset to a purchaser, often together with related services, the assets, mainly technical equipment, are classified as embedded finance leases. Further the lease is classified either as Operating lease or Finance lease. As of 31 Dec 2021, all such cases have been classified as Finance leases. Sales derived from these embedded finance leases are recognized at the beginning of the agreement period. The annual payments are disclosed as amortization of the finance lease loan receivable and interest income.

### ACCOUNTING ESTIMATES AND JUDGEMENTS

#### Lease term, use of extension and termination options

Management judgement has been applied in determining lease term, where there are either extension or termination options included in lease contracts. Lease terms are negotiated on individual basis and contain a wide range of renewal and termination options. As of 31 Dec 2021, weighted average residual lease term for lease contracts is 6.4 years (residual term vary between 0.1–47 years). Lease term for premises leases referred to as "evergreen leases" or "rolling" leases has been determined based on the internally defined site categories. Those take into consideration the number of full time employees and strategic importance of the site, allowing longer lease term for larger Level 1 sites (5 years and more) and recognizing higher flexibility for smallest Level 1 sites (1 year, short-term lease exemption from on balance sheet treatment not applied). Total annual leasing expenses (depreciation and interest) for such leases amounted to EUR 6.3 million during year 2021, weighted average remaining lease term being 2.6 years.

<b>Total</b>	<b>2.1</b>	<b>-24.4</b>	<b>0.8</b>	<b>0.1</b>	<b>-3.1</b>	<b>-24.4</b>

Foreign exchange gains and losses included in the operating profit were EUR 3.9 (0.8) million in 2021.

## 22. Financial assets and liabilities - carrying amount and fair value and fair value hierarchy

Financial assets and liabilities of the Group consist of trade receivables, cash and cash equivalents, lease receivables and payables, trade payables, derivatives (see [note 23](#)), bonds and other interest-bearing liabilities (see [note 19](#)).

### ACCOUNTING POLICIES

All financial assets and liabilities are initially recognized at fair value, and subsequently classified either as financial assets at amortized cost or financial assets through profit or loss.

#### Financial assets at amortized cost

Financial assets are accounted at amortized cost only when the asset is held within a business model whose objective is to collect contractual cash flows, which are solely payments of principal and interest.

This category of financial assets includes trade and other receivables, cash and cash equivalents, lease receivables and other interest-bearing receivables.

Financial assets in this category are carried at amortized cost in accordance with the effective interest method with interest income recognized in profit or loss under financial items (see [note 21](#)).

#### Financial liabilities at amortized cost

Financial liabilities under this category are initially recognized at fair value, net of transaction costs directly associated with the borrowing. For interest-bearing liabilities, after initial recognition, liabilities are measured using effective interest rate method, taking into account any issue costs and any discount or premium on settlement. Related interest expenses are recognized in profit or loss under financial items (see [note 21](#)).

#### Financial assets and liabilities at fair value through profit or loss

Financial assets and liabilities in this category are recognized on the statement of financial position at their fair value with gains or losses resulting from change in the fair value, being recognized in income statement.

This category mostly consists of derivatives. Gains or losses from revaluation of derivative contracts that relate to financial items (loans, cash, leases) are presented as financing costs (see [note 21](#)), whereas gains or losses from derivatives, mostly currency forward contracts that relate to operating activities are included in operating profit.

Fair value measurement is also applicable to trade receivables sold under non-recourse factoring agreements, which have not yet been de-recognized from the statement of financial position as of the reporting date.

Other investments include unlisted shares, where their fair value cannot be measured reliably and, therefore, the cost is considered to be a reasonable approximation of their fair value.

#### Determination of fair values

The classification of financial assets and liabilities measured at fair value in the statement of financial position, has been done on three hierarchy levels:

- Level 1: quoted prices in active markets for given or identical assets or liabilities that the entity can access at the measurement date;
- Level 2: inputs that are observable for the asset or liability, either directly or indirectly;
- Level 3: unobservable inputs for the asset or liability.

The carrying amount of all financial assets and liabilities, carried at amortized cost is considered to provide a reasonable approximation of their fair value, due to the short maturity and liquid nature of these items, except for bonds which are traded on active market.

Fair values of derivatives is determined based on prevailing marked quotes at the reporting date. Foreign exchange derivatives' fair values are calculated according to foreign exchange and interest rates on the closing date.

### Financial assets

EUR million	Note	31 Dec 2021	31 Dec 2020	Fair value hierarchy
Financial assets at fair value through profit or loss

Lease receivables	20	2.9	2.3	Level 2
Trade receivables	14	372.8	358.9	Level 2
Accrued interest income	14	0.1	0.1	Level 2
Cash and cash equivalents	24	323.8	252.3	Level 2
<b>Total</b>		<b>755.5</b>	<b>680.8</b>	

### Financial liabilities

EUR million	Note	31 Dec 2021	31 Dec 2020	Fair value hierarchy
Financial liabilities at fair value through profit or loss				
Current derivative liabilities	23	0.8	2.9	Level 2
Financial liabilities measured at amortized cost				
Non-current				
Lease liability	19, 20	144.0	171.0	Level 2
Bonds <sup>1)</sup>	19	397.8	397.2	Level 1
Other loans	19	333.8	488.8	Level 2
Current				
Trade payables	17	260.8	189.7	Level 2
Accrued interest	17	3.8	4.1	Level 2
Lease liability	19, 20	62.5	72.1	Level 2
Loans	19	31.5	39.6	Level 2
<b>Total</b>		<b>1 235.0</b>	<b>1 365.3</b>	

<sup>1)</sup> Fixed rate bond where carrying amount of EUR 397.8 million has not been adjusted to match the fair value of EUR 415.8 million. Fair value of the bond has been calculated based on the prevailing market rate at the end of the reporting period.

There has been no movement between the fair value hierarchy levels during 2021.

## 23. Derivatives

TietoEVRY Treasury uses currency forward and swap contracts to manage identified currency risks. More information on financial risk management is in [note 18](#) and for Accounting policies applied in [note 22](#). Derivatives are used for economic purposes only.

### Nominal amounts of derivatives

Includes the gross amount of all nominal values for contracts that have not yet been settled or closed. The amount of nominal value outstanding is not necessarily a measure or indication of market risk, as the exposure of certain contracts may be offset by other contracts.

EUR million	31 Dec 2021	31 Dec 2020
Foreign exchange forward contracts	479.7	484.2

### Fair values of derivatives

EUR million	31 Dec 2021	31 Dec 2020
Gross positive fair values	4.2	1.5
Gross negative fair values	-0.8	-2.9
<b>The net fair values at the reporting date</b>	<b>3.3</b>	<b>-1.4</b>

Foreign exchange derivatives' fair values are calculated according to foreign exchange and interest rates on the closing date. All outstanding derivative contracts will expire within 12 months after the reporting date.

## Offsetting financial assets and liabilities

Agreements with derivatives' counterparties are based on ISDA Master Agreements or on agreements with similar content with regards to offsetting financial assets and liabilities. Based on the terms of these agreements, offsetting is possible only under certain circumstances, such as, default of either of parties or other force majeure events. If any of those occur, then the net position owing/receivable to a single counterparty will be taken as owing.

31 Dec 2021 EUR million	Gross amounts of recognized financial instruments in the statement of financial position <sup>1)</sup>	Related amounts not set off in the statement of financial position		Net amount
		Financial Instruments	Cash collateral received	
Derivative financial assets	4.2	-0.8	—	3.4
Derivative financial liabilities	-0.8	0.8	—	-0.1

<sup>1)</sup> No amount have been set off in the statement of financial position

31 Dec 2020 EUR million	Gross amounts of recognized financial instruments in the statement of financial position <sup>1)</sup>	Related amounts not set off in the statement of financial position		Net amount

Derivative financial assets	1.5	-1.1	—	0.4
Derivative financial liabilities	-2.9	1.1	—	-1.8

<sup>1)</sup> No amount have been set off in the statement of financial position

## 24. Cash and cash equivalents

Cash and cash equivalents comprise cash balances and cash deposits with banks and other liquid investments that are readily convertible to known amount of cash within three months and which are subject to an insignificant risk of changes in value. Bank overdrafts are included in current liabilities in the statement of financial position. Cash and cash equivalents are carried at nominal value, which corresponds to their fair value.

EUR million	31 Dec 2021	31 Dec 2020
Cash in hand and at bank	309.1	223.3
Short-term deposits	14.6	29.0
<b>Total</b>	<b>323.8</b>	<b>252.3</b>

## 25. Share capital and reserves

TietoEVRY has one class of shares, and each share has one vote at the Annual General Meeting and equal rights to dividend and other distribution of assets. The company's Articles of Association includes a voting constraint at the Annual General Meeting that no-one is entitled to vote on more than one-fifth of the votes represented at the Annual General Meeting.

TietoEVRY's shares have no nominal value and their book value counter value is one euro. All issued shares have been fully paid.

### ACCOUNTING POLICIES

Dividends proposed by the Board of Directors are not deducted from distributable equity until approved by the Annual General Meeting of Shareholders.

When the company's own shares are repurchased, the amount of the consideration paid, including directly attributable costs, is recognized as a deduction in equity.

EUR million	Number of shares	Share capital	Share issue premiums and other reserves	Invested unrestricted equity reserve	Total

<b>31 Dec 2021</b>	<b>118 418 184</b>	<b>76.6</b>	<b>42.1</b>	<b>1 203.5</b>	<b>1 322.2</b>
Own shares <sup>2)</sup>	7 587				
<b>Total number of shares on 31 Dec 2021<sup>2)</sup></b>	<b>118 425 771</b>				

<sup>1)</sup> Shares granted from own shares without effect to share capital.

<sup>2)</sup> On 31 Dec 2020, the number of shares in the company's possession totalled 10 978 and the total number of shares was 118 425 771.

### Share capital

The share subscription price received in connection with the share issues is entered in share capital to the extent that it has not been recorded in the invested unrestricted equity reserve according to the share issue decision.

### Share issue premiums and other reserves

Share issue premiums and other reserves include share issue premium of Parent company and statutory reserve fund of Tieto Sweden AB.

### Invested unrestricted equity reserve

The invested unrestricted equity reserve includes the subscription price of shares to the extent that it has not been recorded in share capital according to specific resolution.

### Retained earnings

Retained earnings consists of the following:

- Costs of share-based payments which are accounted for as equity-settled and recognized as an employee benefit expense during the vesting period with a corresponding entry in equity. More information is disclosed in [note 8](#).
- Remeasurements of the defined benefit plans arising from experience adjustments and changes in actuarial assumptions. More information is disclosed in [note 15](#).
- Treasury shares. In 2021, TietoEVRY repurchased 140 000 own shares which were further delivered from the share-based incentive plans.
- Cumulative translation differences arising from translation of foreign Group companies' assets and liabilities into euro; and
- other retained earnings and losses

### Distributable funds

On 31 Dec 2021, the distributable funds of the parent company totalled EUR 1 627.8 million of which retained earnings were EUR 419.1 million and net profit for the financial year EUR 1.1 million. The Board of Directors proposes to the Annual General Meeting in 2022 that a dividend of EUR 1.40 per share is paid for 2021 (dividend of EUR 1.32 per share paid for 2020).

## OTHER INFORMATION

This section includes information about the Group structure, joint ventures, related parties and commitments.

### 26. Changes in Group structure

In 2021, TietoEvry sold its Oil & Gas software business as well as the software businesses Alystra, Jydacom and TRYGG/2000. The businesses disposed of were reported as part of the Industry Software segment. Both divestments are part of TietoEvry's strategy to seek focus and scale.

#### ACCOUNTING POLICIES

Disposed operations are consolidated until the point in time when control is transferred. Where the disposed operation is part of a cash-generating unit (CGU) to which goodwill has been allocated, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

#### Assets held for sale

Non-current assets are classified as held for sale if their carrying amounts are expected to be recovered principally through sale and the sale is highly probable. From the date of classification, the assets are measured at the lower of the carrying amount and the fair value less costs to sell, and the recognition of depreciation is discontinued.

#### Sale of Oil & Gas software business

In February 2021, TietoEvry announced an agreement with Aucerna, a Quorum Software affiliate, to sell its Oil & Gas software business. The transaction was completed in June 2021, with a minor part of asset transfers to be completed in early 2022. Through this transaction, the Oil & Gas software business will have greater global market reach and growth opportunities. The Oil & Gas software business comprises hydrocarbon management, personnel and material logistics software and related services with installations in more than 50 countries. Revenue of the divested businesses amounted to around EUR 50 million in 2020 and the number of employees was around 430.

With a consideration of EUR 156.8 million including adjustments, a capital gain of EUR 73.3 million was recognized. The cash payments in total amounted to EUR 154.7 million. In addition, TietoEvry will receive a cash compensation of EUR 2.1 million subsequent to the completion of asset transfers taking place in early 2022. The following table summarizes the effects of the sale on the consolidated financial statements.

EUR million	
Intangible and tangible assets	0.2
Right-of-use assets	0.8
Trade and other receivables	14.1
Cash and cash equivalents	7.0
Non-current liabilities	-0.7
Trade and other payables	-14.0

Consideration, including adjustments	156.8
Transaction costs	-6.1
Reclassification of foreign currency translation reserve to profit or loss	1.4
Total net assets disposed	-78.7
<b>Gain on disposal, before income tax</b>	<b>73.3</b>
Income tax expense on gain	-0.5
<b>Gain on disposal, after income tax</b>	<b>72.8</b>
Consideration received in cash	154.7
Transaction costs	-5.9
Cash and cash equivalents disposed of	-7.0
<b>Net cash flow on disposal</b>	<b>141.8</b>

### Other divestments

In October 2021, TietoEVRY announced an agreement to sell its software businesses Alystra, Jydacom and TRYGG/2000 to a Nordic software company EG. The transaction was completed in December 2021. These businesses focus on creating software products for construction, retail, and transport markets. They had limited operational dependencies with the rest of TietoEVRY. Revenue of the divested businesses amounted to around EUR 13 million in 2020 and the number of employees was around 80 in Finland and Sweden. With a consideration of EUR 40.6 million including adjustments and FX impact, a capital gain of EUR 30.6 million was recognized. The following table summarizes the effects of the sale on the consolidated financial statements.

EUR million	
Intangible assets	2.3
Trade and other receivables	0.7
Cash and cash equivalents	2.1
Non-current liabilities	-0.4
Trade and other payables	-2.0

## 28. Interests in joint ventures

TietoEVRY has established few joint ventures in order to be able to produce high quality IT services required by the customer. All other joint ventures are located in Finland except for BuyPass AS that is a Norwegian company and joint venture of TietoEVRY Norway AS.

### ACCOUNTING POLICIES

Companies, where TietoEVRY has assumed management responsibility, has contractually based joint control with a third party and has right to the net assets of the company based on the contractual arrangement are included in the consolidated financial statements as joint ventures. Joint ventures are accounted by using the equity method under which the investments in joint ventures are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the Group's share of joint venture's losses exceeds the carrying amount of the investment, the investment is recognized at zero value in the statement of financial position and the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the joint venture.

Sales to and purchases from joint ventures are made on normal market terms and conditions and at market prices. The Group's share of the joint ventures' result for the period is separately disclosed in the income statement.

### Joint ventures

31 Dec	Number of shares		Parent company's share %		Voting right %		Carrying value EUR million	
	2021	2020	2021	2020	2021	2020	2021	2020

<b>Equity adjustments, 31 Dec</b>	<b>5.1</b>	<b>8.5</b>
<b>Carrying value, 31 Dec</b>	<b>16.7</b>	<b>19.7</b>

Equity adjustments include Group level goodwill of EUR 4.5 (4.5) million.

Tietokarhu Oy's special task as a supplier of IT services for the Tax Administration ended on 31 December 2020 in accordance with the two-year notice period as the Tax Administration switches to the use of a new ready-made software. The Extraordinary General Meeting supported the liquidation of Tietokarhu as of 1 January 2021, as a result of which the company was dissolved 28 September 2021. Liquidation gain of EUR 0.3 million was booked in the third quarter, 2021.

There are no commitments or contingencies related to joint ventures.

## 29. Related party transactions

Related parties of Tietoevry include subsidiaries, joint ventures and key management of the company and their close family members. Key management includes the members of the Board of Directors, Leadership team and the President and CEO.

### ACCOUNTING POLICIES

Sales to and purchases from related parties are made on normal market terms and conditions and at market prices. There are no commitments or contingencies on behalf of related parties.

The transactions with related parties are presented below. More information on joint ventures is disclosed in [note 28](#) and subsidiaries are listed in [note 27](#). Information on management remuneration is disclosed in [note 8](#).

### Transactions and balances with joint ventures

EUR million	31 Dec 2021	31 Dec 2020
Sales	2.9	8.5
Other operating income	1.6	3.5
Purchases	2.1	3.5
Receivables	0.2	0.3
Liabilities including cash pool	5.0	13.9

## 30. Commitments and contingencies

The Group's commitments and contingencies mostly relate to lease guarantees and performance commitments.

### ACCOUNTING POLICIES

Commitments are disclosed when the Group has a contract where the existence of obligation will be only confirmed in the future.

Contingent liabilities are possible obligations whose existence will be confirmed by uncertain future events that are not wholly within the control of the entity. They can also include obligations that are not recognized in the statement of financial position because settlement is not probable or their amount cannot be measured reliably.

EUR million	31 Dec 2021	31 Dec 2020
For Tietoevry obligations		
Mortgages	—	2.5
Guarantees		
Performance guarantees	91.6	82.7
Payment guarantees	0.3	7.8
Other	0.2	0.1
Other Tietoevry obligations		
Lease commitments, not yet commenced	67.4	70.7
Other	0.6	0.7
On behalf of third parties		
Guarantees		
Performance guarantees	25.4	25.9

In addition to the above, TietoEVRY Oyj or other group companies have provided security on behalf of delivering Group company relating to some major contracts.

### 31. Events after the reporting period

TietoEvry has established six specialized end-to-end businesses. These six businesses form the reportable segments as from the first quarter of 2022. The new structure took effect on 1 January 2022.

In February, 2022, TietoEvry announced additional cost savings measures to support the plans to reach Cloud & Infra's financial targets for 2023.

# Notes to the parent company's financial statements (FAS)

## Parent company accounting principles

The financial statements of the Parent company TietoEVRY Corporation are prepared in accordance with Finnish Accounting Standards (FAS).

TietoEVRY Corporation (business identity code 0101138-5) is a Finnish public limited IT service and software company organized under the laws of Finland and domiciled in Espoo: Keilalahdentie 2-4, 02101 Espoo, Finland. The company is listed on NASDAQ in Helsinki and Stockholm and the Oslo Stock Exchange. The Board of Directors approved the financial statements on 16<sup>th</sup> February 2022. According to the Limited Liability Companies Act the shareholders have at the Annual General Meeting the right to approve, disapprove or change the financial statements after the publication.

## Foreign currency items

Foreign currency transactions are initially translated at the exchange rate prevailing on the transaction date. Foreign currency items at the end of the financial period are valued at the exchange rates on the balance sheet date. Foreign currency items are hedged using derivative contracts.

Exchange gains and losses on net financial liabilities are reported in the income statement under financial items, while other exchange gains or losses are included in operating profit. Gains and losses arising from revaluation of derivative contracts are, depending on their nature, reported either under financial items or operating profit.

## Net sales

Net sales include internal service fees and exchange rate differences from accounts receivables, less indirect taxes such as value added tax.

## Other operating income

Other operating income includes gain on sale of subsidiaries, gain on liquidation of joint venture, rental income and derivative exchange rate gains.

## Pension arrangements

The company's pension obligations are administered through pension insurance institutions. Pension obligations are fully covered.

## Financial instruments

The company applies the Finnish Accounting Act chapter 5 section 2a and records financial instruments initially at fair value.

See financial instruments accounting policies in the consolidated financial statements [note 22](#).

## Appropriations

Group contributions are included in appropriations.

## Valuation of fixed assets

Fixed assets are carried at cost less accumulated depreciation. Depreciation is charged according to plan based on the estimated economic lives of the individual assets and accounted for in accordance with the straight-line method.

The company applies the following economic lives:

	Years
Intangible assets (software)	3
Other capitalized expenditure	3–10
Trademark	6
Goodwill from operations	10
Buildings	25–40
Data processing equipment <sup>1)</sup>	3–5
Other machinery and equipment	5
Other tangible assets	5

<sup>1)</sup> Purchases of personal computers are expensed immediately.

### **Income taxes**

The income statement includes the company's income taxes based on taxable profit for the period according to local tax regulations as well as adjustments to prior year taxes. The information related to deferred tax items is included in the notes.

## 1. Net sales

EUR	2021	2020

On behalf of Third parties		
Guarantees	25 381 206.19	25 911 124.8

<sup>1)</sup> Lease commitments are principally three-year lease agreements that do not include buyout clauses.

In addition to the above mentioned contingent liabilities, parent company has provided security on behalf of delivering Group company relating to some major contracts.

## 21. Derivatives

### Nominal amounts of derivatives

Includes the gross amount of all nominal values for contracts that have not yet been settled or closed. The amount of nominal value outstanding is not necessarily a measure or indication of market risk, as the exposure of certain contracts may be offset by other contracts.

EUR	31 Dec 2021	31 Dec 2020
Foreign exchange forward contracts	559 538 204.20	578 629 042.52

### Fair values of derivatives

Foreign exchange derivatives' fair values are calculated according to foreign exchange and interest rates on the closing date.

The net fair values of derivative financial instruments at the balance sheet date	31 Dec 2021	31 Dec 2020
Foreign exchange forward contracts	234 108.04	188 348.63

Derivatives are used for economic purposes only.

Gross positive fair values of derivatives	31 Dec 2021	31 Dec 2020
Foreign exchange forward contracts	4 138 215.08	3 128 076.98

Gross negative fair values of derivatives	31 Dec 2021	31 Dec 2020
Foreign exchange forward contracts	-3 904 106.99	-2 939 728.35

### Fair value measurement of financial assets and liabilities

See note 22 in Notes to the consolidated financial statements.

## 22. Management of financial risks

The operative management of the treasury activities of TietoEvry is centralized into Group Treasury, which is operated from Parent company. The Group Treasury is responsible for managing the Group's financial risk position and maintaining adequate liquidity. The Treasury Policy, which has been approved by the Board of Directors, defines the principles for measuring and managing liquidity risk, interest rate risk, foreign exchange risks and counterparty risk of the Group. The Treasury Policy also defines the division of responsibilities with regard to financial risk management. The Group reviews and monitors financial risks on a regular basis.

Financial risks are assessed, measured and managed on a Group level. See note 18 in Notes to the consolidated financial statements.

## DIVIDEND PROPOSAL, SIGNATURES FOR THE BOARD OF DIRECTORS' REPORT AND FINANCIAL STATEMENTS AND AUDITOR'S NOTE

### Dividend proposal

Distributable funds in the parent company  
of which net profit for the current year

1 627 833 674.71  
1 069 196.35

The Board of Directors proposes that the retained earnings of  
EUR 420 216 375.19 shall be used as follows:  
a total dividend of EUR 1.40 per share to be paid to shareholders

165 785 457.60

the remainder be carried forward

254 430 917.59

In the opinion of the Board of Directors the proposed dividend distribution does not endanger the solvency of the company.

## AUDITOR'S REPORT (Unofficial translation of the Finnish original)

To the Annual General Meeting of TietoEVRY Oyj

### Report on the Audit of Financial Statements

#### Opinion

We have audited the financial statements of TietoEVRY Oyj (business identity code 0101138-5) for the year ended 31 December, 2021. The financial statements comprise the consolidated income statement, statement of comprehensive income, financial position, statement of cash flows, statement of changes in equity and notes, including a summary of significant accounting policies, as well as the parent company's income statement, balance sheet, statement of cash flows and notes.

In our opinion

- the consolidated financial statements give a true and fair view of the group's financial position, financial performance and cash flows in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU,
- the financial statements give a true and fair view of the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

Our opinion is consistent with the additional report submitted to the Audit Committee.

#### Basis for opinion

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the Auditor's Responsibilities for the Audit of Financial Statements section of our report.

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

In our best knowledge and understanding, the non-audit services that we have provided to the parent company and group companies are in compliance with laws and regulations applicable in Finland regarding these services, and we have not provided any prohibited non-audit services referred to in Article 5(1) of regulation (EU) 537/2014.

The non-audit services that we have provided have been disclosed in note 7 to the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have also addressed the risk of management override of internal controls. This includes consideration of whether there was evidence of management bias that represented a risk of material misstatement due to fraud.

Key audit matter	How our audit addressed the key audit matter
<p><b>Revenue recognition</b></p> <p>Refer to accounting policies for the consolidated financial statements and notes 5 and 6.</p> <p>Consolidated Net Sales of TietoEVRY Oyj amounted to EUR 2 823.4 (2 786.4) million. The Net Sales consist mostly of continuous services, software solutions and consulting. In addition to this, the Company has fixed-price</p> <p>Revenue from service contracts, software solutions and consulting is based on service volumes or time and materials; and the performance obligations are recognized over the accounting period in which the services are rendered. For contracts comprising fixed-price projects, revenue is recognized based on the actual service provided by the reporting date as a proportion of the total services to be provided.</p> <p>We identified as a specific risk of error and fraud in respect of improper revenue recognition given the nature of the Group's services, as follows:</p> <ul style="list-style-type: none"> <li>– Improper revenue recognition in manually recorded exceptional revenue transactions.</li> </ul> <p>Revenue recognition due to its significance require specific attention both from the accounting and the auditing perspective. In addition, management applies judgement when considering revenue recognition for fixed-price projects.</p>	<p>We evaluated the IT systems used for recognizing revenue by testing access and change management controls. We also evaluated process level controls by performing walkthroughs of each significant class of revenue transactions, assessed the design of key controls and tested the operating effectiveness of those controls.</p> <p>Our substantive audit procedures to address the identified risk relating to revenue from services consisted among others, performing transactional testing procedures to validate the recognition of revenue throughout the year as well as year-end.</p> <p>Our substantive audit procedures to address the risk of inappropriate accounting for projects were focused on judgements used by management in project estimates.</p> <p>We selected a sample of contracts based on quantitative and qualitative criteria and performed the following:</p> <ul style="list-style-type: none"> <li>– We performed interviews with project managers and financial controllers to assess the estimates on projects' status and estimated costs and income;</li> <li>– Ensured that the revenue recognition method applied was appropriate based on the terms of the arrangement;</li> <li>– Agreed project revenue estimate against the sales agreement, including contract amendments;</li> <li>– Tested the accuracy of the cost estimate by taking a sample of cost components and traced those to supporting documentation; and</li> <li>– Recalculated the revenue based on percentage of completion of the fixed price projects. Assessed the appropriateness of the percentage of completion by comparing actual costs from the Company's accounting records to the estimated total costs of the project.</li> </ul>

Key audit matter	How our audit addressed the key audit matter
<p><b>Impairment testing of Goodwill</b></p> <p>Refer to Note 11 in the consolidated financial statements.</p> <p>Consolidated financial statements includes goodwill of EUR 1 943.7 (1 974.4) million. Goodwill is measured at cost less accumulated impairment losses.</p> <p>Goodwill is subject to annual impairment test. For testing purposes goodwill is allocated to cash-generating units. As a result of management's goodwill impairment test, no impairment was identified.</p> <p>Goodwill impairment testing requires substantial management judgment over the projected future business performance, cash flows and applied discount rate.</p> <p>Note 11 in the consolidated financial statements describes key assumptions used by management in the impairment test and related sensitivity analysis.</p>	<p>As part of our audit procedures we have assessed key controls over management's goodwill impairment testing for each cash generating unit.</p> <p>The recoverable amounts of the cash-generating units are determined based on value-in-use calculations. Cash flows used in these calculations are based on five-year financial plans defined by group management.</p> <p>We have assessed the key assumptions used by management in the impairment test for cash generating units:</p> <ul style="list-style-type: none"> <li>– comparing the growth and profitability estimates to historical performance.</li> <li>– comparing the estimates with the latest approved budgets and strategic plans.</li> <li>– involving our valuation specialists to verify that the discount rates and the long-term growth rates are consistent with observable market data</li> <li>– validated the mathematical accuracy of the impairment calculations</li> </ul> <p>We have also assessed the related disclosure information.</p>
<p>We have no key audit matters to report with respect to our audit of the parent company financial statements. There are no significant risks of material misstatement referred to in Article 10(2c) of Regulation (EU) No 537/2014 with respect to the group financial statements and the parent company financial statements.</p>	

### Responsibilities of the Board of Directors and the President and CEO for the financial statements

The Board of Directors and the President and CEO are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and CEO are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and CEO are responsible for assessing the parent company's and the group's ability to continue as going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the group or cease operations, or there is no realistic alternative but to do so.

### Auditor's responsibilities in the audit of financial statements

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the President and CEO's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Other Reporting Requirements

### Information on our audit engagement

We have been acting as TietoEVRY's auditors a total period of uninterrupted engagement of 4 years since 2018.

### Other information

The Board of Directors and CEO are responsible for the other information. The other information comprises the report of the Board of Directors and the information included in the Annual Report, but does not include the financial statements and our report thereon. We have obtained the report of the Board of Directors prior to the date of the auditor's report, and the Annual Report is expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to report of the Board of Directors, our responsibility also includes considering whether the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

# About our sustainability report

## Scope

The non-financial data and information included in our Annual Report 2021 describes our sustainability efforts across our value chain, ranging from our purchasing activities to the use of our services and products. The disclosures focus on the sustainability topics that are most material regarding our economic, social and environmental impact.

The sustainability disclosures in this year's report include the Parent company TietoEVRY Corporation and all subsidiaries over which the Parent company has direct or indirect control with following exceptions: Greenhouse gas emission data does not cover TietoEVRY's Norwegian subsidiary Bekk (around 500 employees). This year's data regarding completion of Code of Conduct e-learning training includes subsidiaries Infopulse and EVRY India, but does not cover Avega (around 300 employees) and Bekk. HR data

covers the Parent company and includes all subsidiaries that the Parent company has direct or indirect control over, except for the GRI disclosure 405-1 (employees and managers split by gender and age), GRI disclosure 102-8 (employment type split by gender) and GRI Disclosure 401-1 (new employee hires and turnover split by gender and age) where data does not cover the subsidiary Avega. The GRI General Disclosures cover the entire TietoEVRY Group.

Unless otherwise stated, our workforce related figures in the Sustainability section of the report are based on GRI Standards. The numbers include joint ventures, hence differing from the headcount in the Financial section. The data sources are company systems that provide data on full-time, part-time, permanent and temporary employees. As Avega, Infopulse companies and EVRY India Private Limited use external systems, data will be transferred via e-mail and excel in those cases.

Our sustainability report is prepared in accordance with the core option of the GRI Standards.

We strive to include data for all Tietoevry's subsidiaries in our sustainability reporting. In last year's report, data on the Norwegian subsidiary Bekk was not included in the disclosure "Total number of employees". The total number of employees reported in 2020 was 24,061, excluding Bekk. In this year's report the number has been updated to include Bekk which means that the Total number of employees in 2020, including Bekk was 24,549. The percentage of male and female and share of employees belonging to certain age groups was not affected by the restatement. The effect of this restatement is increased comparability between figures for 2020 and 2021.

Unless otherwise stated, all information and data pertain to activities from 1 January to 31 December 2021. The regional data is divided between HR and financial data due to system restrictions.

Our energy reporting and corresponding scope 1 and 2 emissions cover all operating sites (offices, laboratories and data centers) except Tietoevry's Norwegian subsidiary Bekk. The scope of the energy data collection is aligned with our Environmental Management System; data is collected from data centers, laboratories and offices with 20 employees or more. The energy consumption by offices excluded from the scope of the data collection is based on our global average values, with a 10% safety margin. The original data sources are on-line energy management systems, energy invoices and data from utility providers.

The scope 3 business-travel-related GHG emissions include flights and the use of employees' own cars for business purposes. GHG data (tCO<sub>2</sub>) comes mainly from the travel agency's IT systems. Defra-emission factors have been used for air travel not included in the report from the travel agency. Defra-emission factors are also applied for

cars used for business purposes, when calculating the emissions based on driven kilometres. Locations with major operations and a significant amount of travel are within the scope.

Energy and emission calculations follow the Greenhouse Gas Protocol, and emissions are reported as CO<sub>2</sub> equivalents (CO<sub>2</sub>e). The electricity-emission factors are based on national gross electricity production mixes (annual statistics) from the International Energy Agency's statistics (IEA stat). Emission factors per fuel type are based on assumptions in the IEA methodological framework. Factors for district heating/cooling are either based on actual (local) production mixes, or average IEA statistics. The scope 2 market-based calculations are determined by the purchased Guarantees of origin (GoO)/ Renewable Energy Certificates (REC). When acquiring GoOs or RECs, the supplier certifies that the electricity is produced exclusively by renewable sources, which have an emission factor of 0 grams CO<sub>2</sub>e per kWh. However, for electricity without certificates, the emission factor is based on remaining electricity production after all GoOs and RECs for renewable energy are sold. The emission factors used for European residual mixes are provided by European Residual Mixes 2021. Country-specific IEA emission factors are used for non-EU countries. Purchased renewable district-heating and cooling products are counted as zero emissions, according to the scope 2 market-based method.

The base year for the scope 1, 2 and 3 GHG calculations is 2020, with the exception of the business-travel category, which is in scope 3. The base year for scope 3 business travel GHG calculations is 2019. In the report, the metric ton/ UK tonne equivalent to 1,000 kilograms is stated solely as a ton.

## Reporting framework and communication to initiatives

Our sustainability report for 2021 is prepared in accordance with the core option of the GRI Standards.

TietoEVRY has signed the UN Global Compact, which means that we commit to implementing the ten principles for sustainable business. The Global Compact requires a yearly report on progress and performance. TietoEVRY's annual report and sustainability report are designed to meet these requirements. In the GRI-index, page [242](#), references to the principles can be found.

TietoEVRY supports UN's Sustainable Development Goals and we have analysed our impact on them with the help of 'principled prioritisation'. This means that we have aligned our company strategy, efforts and allocated resources that reflect our significant impacts assessed as a part of our materiality analysis. The references to how we work with the global goals and sub-targets can be found in the GRI index.

## Legislation on non-financial reporting

Information about the companies within the TietoEVRY group that are covered by the legislation are included in the non-financial information in the Board of Directors' report. TietoEVRY's Board of Directors submits the non-financial information.

## External assurance

An independent third party, Deloitte Oy, has provided limited assurance on the sustainability information disclosed in TietoEVRY's Annual Report 2021. The scope of the assured information is indicated in the independent practitioner's assurance report as well as in the GRI content index. In our view, a third-party independent assurance increases transparency, helps us to improve, and is key to delivering a high-quality report.

## Publication

Our combined annual and sustainability report 2021 was published on 2 March 2022.

# Independent limited assurance report

To the Management of TietoEVRY Oyj

To the Management of TietoEVRY Oyj

We have been engaged by the management of TietoEVRY Oyj (business identity code 0101138-5, hereinafter also the Company) to provide a limited assurance on the selected sustainability disclosures in the TietoEVRY Annual Report 2021 for the reporting period of January 1, 2021 to December 31, 2021. The assured information is indicated in the Company's GRI Content Index 2021 (hereinafter Sustainability Information).

## Management's responsibility

The Management of TietoEVRY is responsible for the preparation of the Sustainability Information in accordance with the Reporting criteria as set out in the Company's reporting instructions and the GRI Sustainability Reporting Standards of the Global Reporting Initiative (hereinafter also the Reporting criteria). This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of the Sustainability Information that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate criteria and making estimates that are reasonable in the circumstances.

## Assurance provider's responsibility

Our responsibility is to express a limited assurance conclusion on the Sustainability Information based on our engagement. We conducted our assurance engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised).

ISAE 3000 standard requires that we comply with ethical requirements and plan and perform the assurance engagement to obtain limited assurance whether any matters come to our attention that cause us to believe that the Sustainability Information has not been prepared, in all material respects, in accordance with the Reporting criteria.

We did not perform any assurance procedures on the prospective information, such as targets, expectations and ambitions, disclosed in the Sustainability Information. Consequently, we draw no conclusion on the prospective information. Our assurance report is made in accordance with the terms of our engagement with TietoEVRY. We do not accept or assume responsibility to anyone other than TietoEVRY for our work, for this assurance report, or for the conclusions we have reached.

A limited assurance engagement with respect to responsibility related data involves performing procedures to obtain evidence about the Sustainability Information. The procedures performed depend on the practitioner's judgment, but their nature is different from, and their extent is less than, a reasonable assurance engagement. They do not include detailed testing of source data or the operating effectiveness of processes and internal controls, and consequently they do not enable us to obtain the assurance necessary to become aware of all significant matters that might be identified in a reasonable assurance engagement.

Our procedures on this engagement included:

- Interviewing senior management of the Company;
- Conducting interviews with employees responsible for the collection and reporting of the Sustainability Information and reviewing of the processes and systems for data gathering, including the aggregation of the data for the Sustainability Information;
- Reviewing internal and external documentation to verify to what extent these documents and data support the information included in the Sustainability Information and evaluating whether the information presented in the Sustainability Information is in line with our overall knowledge of corporate sustainability at TietoEVRY;
- Performing analytical review procedures and testing data on a sample basis to assess the reasonability of the presented Sustainability Information;
- Conducting an interview with TietoEVRY's sites in Sweden and India through a video conference;
- Assessing that the Sustainability Information has been prepared in accordance with the Sustainability Reporting Standards (Core) of the Global Reporting Initiative.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

## Our independence, quality control, and competences

We have complied with Deloitte's independence policies which address and, in certain cases, exceed the requirements of the Code of Ethics for professional accountants issued by the International Ethics Standards Board for Accountants. We have maintained our independence and objectivity throughout the year, and there were no events or prohibited services provided which could impair our independence and objectivity.

Deloitte Oy applies International Standard on Quality Control 1 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements. This engagement was conducted by a multidisciplinary team including assurance and sustainability expertise with professional qualifications. Our team is experienced in providing sustainability reporting assurance.

## Conclusion

Based on the procedures we have performed, nothing has come to our attention that causes us to believe that TietoEVRY's Sustainability Information for the reporting period ended 31 December 2021 is not properly prepared, in all material respects, in accordance with the Reporting criteria.

Our assurance statement should be read in conjunction with the inherent limitations of accuracy and completeness for sustainability information.
