

EasyFS Core Banking

Experience end-to-end banking services aligned with local regulatory requirements.

Future of core banking

The financial sector is undergoing fundamental change as AI-driven agility becomes central. As AI grows in importance, banks need to balance security with the requirements of regulatory compliance.

Modern banking

Banks are struggling to operate using old mainframe solutions as the economy goes digital and huge numbers of transactions flow through

fintechs and third parties.

European experience

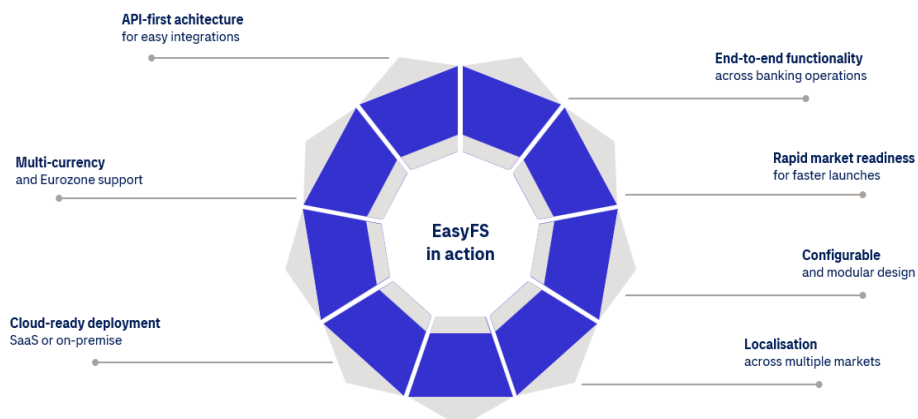

Tieto Banktech has decades of experience in core banking and a proven track record of successful implementation. Our modular core banking platform empowers your bank with end-to-end tools to deliver products and services quickly, while reducing implementation expenses and ensuring predictable running costs.

Take your financial services to the next level

EasyFS is a “plug-and-play” core banking solution with API-first architecture. Here’s how to get started:

- Choose the modules you need and expand as your business grows.
- Launch in as little as three months with our proven implementation methodology.
- Benefit from 24/7 support and continuous updates to stay compliant and competitive.

Enabling a seamless banking ecosystem

Designed to help financial institutions deliver for their customers

Easy Financial Services – our core banking software platform – enables open, modular, and scalable banking services that keep you ahead of the competition. Bundling different modules enables you to handle deposits, lending, leasing, transactional banking, treasury, and much more.

This approach enables banks to reduce operating costs through automation and increase business performance by up to 80%, giving you a competitive edge.

EasyFS Core Banking solution key benefits:

- Open, modular, and scalable architecture adapts and grows with your business needs.
- Continuous 24/7 maintenance, testing, and support ensure reliable operations.
- A fully-functional core banking system can be up and running within three months.
- Designed to meet local regulatory requirements across the EU and the Baltic region.
- Built on our Nordic heritage and more than 30 years of experience.

Build your own core:

- **Customer & Account overview:** manage customers and accounts with a complete real-time view.
- **Deposits & Payments processing:** support local and international payments with built-in integrations.
- **Lending & Financing:** handle loans, leasing and factoring across the full lifecycle.
- **Liquidity & Accounting:** control cash flow, treasury, and financial reporting in real time.
- **Digital banking:** deliver secure, user-friendly banking services across digital channels.
- **Onboarding & compliance:** enable smooth onboarding with integrated KYC & AML support.
