

PPS Programme Management

Are you facing big business changes?
Is it clear what change you want to achieve?
Do you have the power to coordinate all the efforts required?

PPS Programme Management teaches you the PPS definitions and views on programmes. A Programme is an excellent way of coordinating projects and business change work to achieve Expected Benefit. You will learn the model and roles for programmes. We explain the connection between programmes and the business objectives. The course gives you access to skills and templates for programme management.

Objective

After the course you will have knowledge of:

- when is it suitable to organise projects and related line activities as a Programme
- to define and limit a Programme's commitment
- identifying, calculating and realising benefits
- leading business change
- planning and monitoring of a Programme's commitment
- roles and responsibilities in a Programme organisation.

Target Group

Programme Managers, Organisation Change Managers, Programme Owners and Organisation Leaders who will execute business change within the framework of a programme and/or who wish to understand how comprehensive and complex business change can be to organise and manage.

Basic Knowledge

Experience and knowledge of project management. The PPS Portfolio Management is recommended as a complementary course to extend your knowledge of the management of project portfolio with a Programme.

Content

Overview of PPS Programme Management | Model for Programme Management| Decisions in a Programme | Programme Objective | Benefit Identification | Benefit Valuation| Benefit Realisation | Lead Business Change | Prepare Business Change | Communicate Business Change | Create Business Change | Programme Planning | Programme Monitoring | Programme Organisation
