

Building Trusted Digital Societies

TietoEVRY Veturi Programme

The mission of the TietoEVRY Trusted Digital Societies programme is to develop affordable, accessible, and trusted digital services for citizens. Together with our ecosystem partners we will accelerate the development of trusted technologies, develop Finland's technological know-how and help Finnish IT companies to build globally scalable business value from responsible data-enabled platforms.

This programme is part of a Business Finland funded initiative to solve some of society's most pressing challenges through increased research, development, and innovation investments in Finland.

TietoEVRY is inviting partners to join the ecosystem for research collaboration.

Develop **trusted data-enabled platforms**, building on cutting-edge technology, to create scalable business value

Co-create **platform business models** together with the Finnish IT ecosystem, expanding in global markets

Build **re-usable technology modules** and use open-source components to develop solutions faster and more cost efficiently

Strengthen long-term **industry and academia collaboration** for future competitiveness

Financial Services

Health & Care

Energy & City

HORIZONTAL RESEARCH INITIATIVE

- Machine learning and analytics life cycle management
- Trustworthy AI
- Digital identity

- Data orchestration and collaboration
- Secure communication
- Ecosystem models, compliance and operations framework

VERTICAL INDUSTRY TOPICS

- Real-time bill payments and secure ecosystem distribution for valued added payment services
- Financial crime prevention
- Financial insights

- Digital treatments & remote home services
- Digital self-care & remote diagnostics
- Data & AI-supported insights and decisions

- New method for power grid designs
- Automatic Metering
- Solutions for distributed energy management
- Data-driven energy & climate transition for cities

Banking

Financial services are one of the selected strategic business areas for Tietoevry with high ambition for global expansion with our repeatable solutions and platforms. To meet the ongoing significant changes in the banking and payment industry we need strong industry and cross industry collaboration to design both solutions and Target Operation Models for new common operation platforms.

Care

Health & Care organizations make solid progress in advanced medical diagnosis and treatment options. They invest in digitalization and Health 4.0 solutions to meet the challenges in cost, resourcing and aging population and covid-19 related topics. The Tietoevry Veturi ecosystem will help health and care organizations to make a shortcut to a new Health 4.0 era by providing integrated platform for Digital Care services, remote diagnostics and home care, and advanced data analytics enhanced with AI.

Energy & city

The energy sector is in the middle of a transition from centralized large-scale fossil-based energy production to distributed and smart renewable energy sources, with new challenges in system management. Tietoevry's Veturi ecosystem develops data and AI-driven solutions for the shift to green and dynamic energy infrastructure.

Common Enabling Technologies

We want to initiate research collaboration in horizontal technologies to enable long-term business infrastructure, to establish common technology-specific platforms and to ensure compliance to EU-level acts and regulations.

Do you have a business idea or an emerging technology solution in mind? Contact us if you wish to partner to enable research and development of future impactful solutions. We are looking for partners of all sizes and types, to establish industry changing ecosystems.
