

TIPS for Packaging Solution Overview

Packaging companies range in size from the very small, typically family-owned, single-site that specialise in a particular technology to the very large, typically listed, integrated companies with multiple plants. One aspect they share is the need to respond quickly to the rapidly changing needs of the market. Another common aspect is the need to reduce carbon footprint, whether through recyclability or reduced use of materials.

TIPS for Packaging is Tietoevry's proposal to the global packaging market, it is a single-source, integrated order-to-cash solution for packaging paper mills and converting plants.

Tietoevry brings to the paper/board packaging industry its knowledge of the entire supply chain coupled with comprehensive coverage of all the necessary functionalities.

Tietoevry relies on ERP partners such as SAP and Microsoft Dynamics to complement the solution by providing

- Finances and Accounting
- Human Resources
- Asset Management & Maintenance
